### MINUTES ROGERS PLANNING COMMISSION April 16, 2019

#### **CALL TO ORDER**

The meeting of the Rogers Planning Commission was held on April 16, 2019 at 7:00 p.m. and was called to order with Commissioners Jullie, Silverstein, Bryan, Kraemer, Nei, Bourgeois and Terhaar.

Member(s) excused: Binkley, Plansky

Also present were Councilmember Bruce Gorecki, City Planner/Economic Development Coordinator Jason Ziemer, and Associate Planner Amy Patnode.

#### **SET AGENDA**

The Agenda was set as submitted.

Commissioner Nei moved, Commissioner Kraemer seconded the motion to approve the agenda as submitted.

On the vote, all members voted AYE. Motion carried.

#### **CONSENT AGENDA**

**4.1 Approval of the Amended January 15, 2019 Planning Commission Meeting Minutes.** Commissioner Kraemer moved, Commissioner Nei seconded a motion to approve the Amended Planning Commission Minutes.

On the vote, all members voted AYE. Motion carried.

#### 4.2 Approval of the March 19, 2019 Planning Commission Meeting Minutes.

Commissioner Nei moved, Commissioner Bryan seconded a motion to approve the March 19, 2019 Planning Commission Minutes.

On the vote, all members voted AYE. Motion carried.

#### **PUBLIC HEARINGS**

#### 5.1 Public Hearing to Consider a Request for a Special Home Occupation License

Associate Planner Patnode provided a brief background and commented on the following:

- Property is located at 13145 Basswood Lane and zoned R-2, on 5.49 acres of land.
- Home occupation is proposed to be an at-home salon, in the third stall garage.
- Septic tanks must be installed to handle the salon waste, according to Hennepin County.
- 240 square feet will be used for the salon.

Chair Silverstein opened the meeting for public comment.

Commissioner Nei moved, Commissioner Kraemer seconded the motion to close the public hearing.

On the vote, all members voted AYE. Motion carried.

There was a brief discussion by the Planning Commission.

Commissioner Silverstein moved, Commissioner Nei seconded a motion to approve the Special Home occupation business for 13145 Basswood Lane to conduct an at-home salon business, subject to the following conditions:

- 1. The Applicant must install appropriate waste handling facility and conform to Hennepin County memo dated March 4, 2019.
- 2. Conform to Special Home Occupation standards according to Section 125-36 of City Code.
- 3. The salon is allowed to conduct business in the third stall garage.

On the vote, all members voted AYE. Motion carried.

# 5.2 Public Hearing to Consider a Variance Request to Construct a Detached Accessory Structure, Located at 12500 Scharber Street

Associate Planner Patnode provided background and commented on the following:

- Applicant is requesting a structure to be located in the side yard, and to exceed the allowable size of the shed to 2,000 square feet; 1,472 sq. ft. more than allowed.
- Property is 5.11 acres and located on a dead-end street in the R-2 zoning district.
- Wetland limits the location of a shed in the rear yard, as required by code.
- Proposed shed is 2,000 square feet with 12-foot side wall heights.
- Staff recommends approval of the variance for the location but denial of size.

Chair Silverstein opened the meeting for public comment.

<u>Rick Filibeck</u>, 12469 <u>Fletcher Drive</u>: Where will the shed be located and how many trees will be taken down?

<u>John Hunter</u>, 12444 Pointe Circle: What is the recommendation that staff is making?

<u>Kim Smith, 12490 Buckthorn Circle</u>: Our backyard abuts up to the lot line. The neighbor wrote letter and would like to know if those will be read. Our concern is the 2,000 square feet and our property value.

<u>Daniel Scharber</u>, 12500 Scharber Street: Planned to show pictures of the property, the treeline and the proposed shed area. Technical difficulties hindered those efforts.

<u>John Seifert, 12580 Scharber Street</u>: Spoke on the previous concept of cul-de-sac on Scharber Street. There is no adopted plan, although conversations and plans were reviewed by staff at the time of plat approval for Scharbers 5<sup>th</sup> Addition.

Rosie Loxtercamp, 21195 Douglas Drive: Spoke with Daniel and have no objection to the detached shed. We have no view of the proposed shed.

<u>Daniel Scharber</u>: Answered a question on if the lot will be split in the future. The west side of the property (Outlot C) is in a family trust, and the rest of the subject property doesn't have development plans.

<u>John Hunter</u>: Woodland would obscure the view but the concern is development in the future and impaction of the new homes. The long-term view can change and something needs to ensure the view is obscured.

Commissioner Nei moved, Commissioner Kraemer seconded the motion to close the public hearing.

On the vote, all members voted AYE. Motion carried.

The Planning Commission discussed the following:

- The streetscape is proposed to have a lot of garage doors. Consideration for approval for a bigger structure but the garage doors would look out of place for the neighborhood.
- Approval of the location is justified. The size is too big, would consider a smaller size but bigger than what is permitted.
- Expressed outdoor storage is unsightly. Advocate for indoor storage when possible.
- Size of the lot is a factor in the request, would be more comfortable with a smaller shed.

Commissioner Nei moved, Commissioner Kraemer seconded a motion to approve the variance to locate the detached accessory structure within the side yard, located at 12500 Scharber Street, with the following conditions:

- 1. The detached accessory structure shall be constructed at the location indicated on the site plan.
- 2. The detached accessory structure shall not be constructed in front of the house.
- 3. There shall be no additional driveway installed; only one driveway shall service the Subject Property.

On the vote, all members voted AYE. Motion carried.

Commissioner Nei moved, Commissioner Bryan seconded a motion to deny the variance to allow a 2,000 square foot detached accessory structure to be located at 12500 Scharber Street.

On the vote, all members voted AYE. Motion carried.

# 5.3 Public Hearing to Consider a Request for an Interim Use Permit, to Conduct an Extended Home Occupation, Located at 14590 Starlite Drive

Associate Planner Patnode provided background and commented on the following:

- Property is zoned RE-2 and located on 3 acres.
- Applicant plans to operate business out of detached structure with 2 employees.

- Corner lot and has two driveways. Secondary driveway should be paved from right of way to the property line only.
- Minnesota Concrete Lifting LLC plans to have two trailers parked outdoors.

Steve Swanson, 14560 Starlite Drive: No problem with the permit application.

<u>Dan Proell, 22275 Oak Ridge Drive</u>: No problem with the request.

Commissioner Nei moved, Commissioner Kraemer seconded a motion to close the public hearing.

On the vote, all members voted AYE. Motion carried.

There was a brief discussion by the Planning Commission.

Commissioner Jullie moved, Commissioner Nei seconded the motion to approve the interim use permit with the following conditions:

- 1. The Applicant shall provide the building inspector with documents for the accessory structure and conform to applicable requirements.
- 2. The Applicant shall not have any materials related to the home occupation stored outdoors aside from the two approved trailers.
- 3. The second driveway access must be paved from the edge of the existing roadway through the property line, but shall not pave the entire second driveway.
- 4. The IUP is valid for 5 years; until May 1, 2024, or until the property is sold or the business ceases operation.

# 5.4 Public Hearing to Consider a Preliminary Plat for Laurel Creek 4<sup>th</sup> Addition, Rezoning to PUD and Amendment to the Master Planned Unit Development for Laurel Creek

City Planner Ziemer provided background and commented on the following:

- Lennar bought roughly an acre of land north of 116<sup>th</sup> Ave contiguous to the 2<sup>nd</sup> phase of the Laurel Creek development.
- The newly acquired property has an existing home that will be demolished and 5 parcels will be platted and built for single family homes.
- The additional parcels trigger a Master Planned Unit Development amendment due to an increase in the amount of overall homes in the development.
- Utilities were installed right up to the newly acquired property when the second phase was constructed.
- The newly acquired property needs to be rezoned from RE-5 to PUD.

Chair Silverstein opened the meeting for public comment.

<u>Terie Broz, 19625 Territorial Road</u>: Questioned the type of housing that will be on the lot, and questioned whether the 'arm', located north of her property is actually Lennar's. She believes the land does not belong to the development and that should get figured out in case development is proposed in that area.

Commissioner Kraemer moved, Commissioner Jullie seconded a motion to close the public hearing.

On the vote, all members voted AYE. Motion carried.

There was a brief discussion by the Planning Commission, and the 'arm' of the development will be further explored.

Commissioner Jullie moved, Commissioner Bryan seconded a motion to approve the Amendment to the Master Planned Unit Development, rezoning of the property from Rural Residential 5-acre to PUD, and the Preliminary Plat for Laurel Creek 4<sup>th</sup> Addition.

On the vote, all members voted AYE. Motion carried.

# 5.5 Public Hearing to Consider a Request for a Conditional Use Permit for Capitol Beverage, 20240 South Diamond Lake Road

City Planner Ziemer provided background and commented on the following:

- The approved Conditional Use Permit from 2017 has expired.
- The CUP is for the parking of trailers outdoors, and in the front yard.
- The Site Plan and Variance request from Capitol Beverage was approved in 2017 and still valid.

Chair Silverstein opened the meeting for public comment.

Commissioner Nei moved, Commissioner Jullie seconded a motion to close the public hearing.

On the vote, all members voted AYE. Motion carried.

There was a brief discussion by the Planning Commission.

Jim Morresy with Captiol Beverage wanted clarification of condition 4. It was discussed that deliveries from FedEx, UPS and USPS mail services are exempt from the 'loading' and 'unloading' zone. The condition was meant for Capitol Beverage (un)loading of products.

Commissioner Jullie moved, Commissioner Nei seconded a motion to approve the Conditional Use Permit request from Capitol Beverage, permitting outdoor storage for the purpose of parking trucks and trailers on 20240 South Diamond Lake Road with the following conditions:

- 1. The conditional use permit shall only apply to the parking of trucks and trailers. No outdoor storage of equipment and/or materials shall be allowed.
- 2. The parking of trucks and trailers shall not encroach into setbacks, and may only occur in areas defined by this Conditional Use Permit.
- 3. The parking of trucks and trailers related to the operation of the business are permitted to park in the 19 parking stalls; no employee or public parking allowed.
- 4. The outdoors storage area shall not be used as a loading and unloading zone for shipments and deliveries, and must be maintained and free from debris at all times.

5. The Applicant shall screen the parking area according to the approved Site Plan.

On the vote, all members voted 6-0-1. Kraemer abstained due to personal conflict. <u>Motion carried.</u>

#### **NEW BUSINESS**

# 6.1 Consider Approval of a Site Plan for a New Building at Lions Central Park, Formerly Triangle Park, 21400 Rouillard Avenue.

City Planner Ziemer provided background information and commented on the following:

- Site is intended for community use, event space, rental area and special occasions.
- 9 separate lots will be combined for this project; a preliminary plat will follow site plan approval.
- Little alterations are needed to the site plan. ADA standards must be met, and walking trails to be altered.

There was a brief discussion by the Planning Commission.

Commissioner Kraemer moved, Commissioner Nei seconded a motion to approve the site plan for the Lions Central Park building with the following conditions:

- 1. Revise the Site Plan to extend the sidewalk from the parking lot to the trail on the west side of the Subject Property, adjacent to the western entrance.
- 2. Revise the Site Plan to depict the location of a monument sign at the new western entrance into the Subject Property.
- 3. Revise the Site Plan to show the lighting plan for the trails and parking lot, including photometrics. Lighting types may be defined with the proposed streetscape plan.
- 4. Revise the parking plan for on-site parking lot to include one (1) accessible parking space and one (1) van accessible parking space as required by ADA.
- 5. Submit final, detailed architectural plans and elevations, including color elevation renderings, of the building to City Planning staff for review prior to application for building permit.
- 6. Revise the Landscape Plan regarding tree caliper sizes, changing them from 1.5 inches to 2.5 per City standards.

On the vote, all members voted AYE. Motion carried.

#### **ADJOURN**

Commissioner Jullie moved, Commissioner Silverstein seconded a motion to adjourn the meeting at 8:54 p.m.

On the vote, all members voted AYE. Motion carried.

Meeting Date: May 21, 2019

Agenda Item: No. 5.1

Subject: Conduct a Public Hearing to Review the 2040 Comprehensive Plan and

Recommend Submittal of the Plan to the Metropolitan Council.

Prepared Prepared

Jason Ziemer, City Planner / Community Development Coordinator

By:

### **Recommended Planning Commission Action**

See attached Memo.

#### **ATTACHMENTS:**

Description

SRF Memo

SRF No. 10165

**To:** Rogers Planning Commission

From: Stephanie Falkers, Senior Associate

**Date:** May 14, 2019

**Subject:** Rogers 2040 Comprehensive Plan

### **Comprehensive Plan Update**

The City of Rogers is nearing the completion of the 2040 Comprehensive Plan Update. This effort is intended to update the existing 2030 Comprehensive Plan to align with existing demographics, updated community input and regional planning efforts. The City, along with all cities and counties in the seven-county metro, must update their Comprehensive Plan according to Minnesota Statutes Section 473.858 and 473.864.

The Metropolitan Council outlines requirements and growth forecasts that the City should use to inform their planning efforts. The following table outlines the population, household and employment growth forecasts that were used to inform the update.

	2010	2017	2020	2030	2040
Population	11,197	12,753	14,200	18,400	22,800
Households	3,748	4,184	5,000	6,700	8,500
Employment	7,907	9,714	11,400	13,100	14,800

Source: 2010 US Census, 2017 Metropolitan Council Estimate and Forecasts

The Comprehensive plan is the City's guiding document, and should be referenced as decision are made related to growth and development. The plan identifies a vision for Rogers over the next 20 years, and policies to help the City achieve it. Elected and appointed officials, staff, developers, and residents should refer to the Comprehensive Plan to understand the City's policies and vision for growth and development. The plan includes the following chapters:

- 1. Introduction
- 2. Community Profile
- 3. Vision and Goals
- 4. Land Use
- 5. Housing **NEW**

- 6. Parks, Open Space and Trails
- 7. Economic Competitiveness **NEW**
- 8. Water Resources
- 9. Transportation
- 10. Resilience **NEW**
- 11. Implementation

### **Comprehensive Plan Process**

The City of Rogers began the update to its Comprehensive Plan over a 26-month process, beginning in March of 2017. The early phases of the planning process included public engagement to understand the community's desire for the future of Rogers. This data shaped the vision for the plan and subsequent recommendations.

A draft plan was completed in December of 2018 and was shared with the Planning Commission and City Council for review. This review coincided with a public meeting and comment period for the draft plan. Following these meetings and discussions, the draft plan was updated and prepared for the 6-month affected and adjacent community review required by Met Council.

### **Affected and Adjacent Jurisdiction Review**

The affected and adjacent community review is a required component of the Comprehensive Plan update process, per Minnesota Statute 473.858. This process provides an opportunity for adjacent communities to review Rogers's draft plan and provide comments or feedback. The following jurisdictions were notified of the Comprehensive Plan and were provided an opportunity to comment.

Jurisdiction Type	Jurisdiction Name
Adjacent Community	Corcoran
Adjacent Community	Dayton
Adjacent Community	Maple Grove
Adjacent Community	Hennepin County
Out of Region Community	Hanover
Out of Region Community	Otsego
Out of Region Community	Saint Michael
Out of Region Community	Wright County
School District	279; Osseo
School District	728; Elk River
School District	877; Buffalo-Hanover-Montrose
Watershed Management Organization	Elm Creek Watershed Management Commission
Regional Park Implementing Agency	Three Rivers Park District
State Agency	MnDOT
State Agency	MnDNR

Rogers has received a response from all jurisdictions provided in the list above and therefore the comment period is closed. Of the 15 jurisdictions that were sent the plan, 7 responded with no comment. These jurisdictions included the City of Hanover, Osseo Area Schools, MnDOT, Buffalo-Hanover-Montrose School District, City of Otsego, City of Saint Michael, and Wright County. Comments were received from the remaining 8 jurisdictions, and the responses are included in **Attachment 1**. Many of the responses complimented the various policies and goals of the Comprehensive Plan. Others offered additional tools that could be considered or suggested modifications to the plan.

#### **Comprehensive Plan Updates**

The Draft 2040 Comprehensive Plan was updated to respond to the comments received from the affected and adjacent communities as warranted. City staff and the consultant team worked together to review the comments and address changes as needed.

#### **Next Steps**

The next step in the overall process is to submit the draft Comprehensive Plan to the Metropolitan Council for review. This review will occur in an overall two steps process, and will result in the Council's approval of the plan. Once approved, the City will be authorized to adopt the Comprehensive Plan and begin its implementation.

It is required that the Rogers 2040 Comprehensive Plan be authorized for submittal to the Metropolitan Council with the passing of a resolution.

TO:

Corcoran City Council

FROM:

Kendra Lindahl, Landform

DATE:

January 14, 2019 for the January 24, 2019 City Council Meeting

RE:

Draft City of Rogers 2040 Comprehensive Plan

#### 1. Background

The City received notice of the draft 2040 comprehensive plan from City of Rogers on December 21, 2018. The draft plan is available at city hall or via this link (<a href="www.2040compplan.rogersmn.gov">www.2040compplan.rogersmn.gov</a>) and due to the file size, the full plan is not attached to this report. Per MN Statutes §473.858, Subd. 2, the City of Corcoran has 6 months to provide comments to the County. Staff has noted a number questions or concerns in the attached letter, which could affect the City of Corcoran's planning efforts.

Please review the attached letter and make any necessary modifications. The Council must authorize staff to send the letter prior to June 21, 2019 when our 6-month statutory review period ends.

#### 2. Recommendation

Move to authorize the Mayor and City Administrator to sign and send the attached letter to City of Rogers.

#### **Attachments**

- 1. Response Letter Form
- 2. Draft Letter to City of Rogers

Jason Ziemer 12800 Arbor Lakes Parkway Rogers, MN 55369

RE: Rogers Draft 2040 Comprehensive Plan

Jason,

The City of Corcoran has reviewed the City of Rogers 2040 Comprehensive Plan update, which was received with your email dated December 21, 2018.

The City of Corcoran has reviewed that draft plan and we offer the following comments:

#### Chapter 4 - Land Use

• The 2040 land use plan shows "mixed use neighborhood" (service commercial) at CR 116/CR 117 which is adjacent to our Low Density Residential and Existing Residential land use designations. The City of Rogers should provide buffering from these planned commercial and higher density residential uses to the low density residential that exists in Corcoran and is planned to remain.

#### Chapter 6 - Parks and Open Space

- We applaud the City's commitment to active living and eliminating gaps in the trail system. To that end, we request that the City consider the addition of trail connections to connect with planned trails in Corcoran. Specifically:
  - The City of Corcoran has a planned on road trail on Robert Lane that extends to our northern border just to the southwest of Stieg Woods. A future trail connection within the City of Rogers would expand this trail network.
  - The City of Corcoran has an off-road trail planned between CR 101 and Robert Lane that extends to our northern border just southeast of Stieg Woods and the trail loop shown on Figure 6-2 of the draft plan. A future trail connection within the City of Rogers would expand this trail network.
  - The plan shows a trail that crosses Valley Drive and abruptly ends. The City of Corcoran plan shows an off-road trail on the west side of Pheasant Ridge golf course and ending at County Road 117. We encourage the City of Rogers to consider extending the dead-end Valley Drive trail to connect with the planned Corcoran trail at County Road 117.
  - o The City of Corcoran also shows on-road trails planned for Trail Haven Road and Bechtold Road and encourage the City of Rogers to consider extending those trails in Rogers.
  - O Both Corcoran and Rogers show a trail connection planned to connect with County Road 117 just east of Bechtold Road. The two trails are slightly offset as currently shown by the two cities. We look forward to working with Rogers and Hennepin County to provide a County Road 117 trail crossing in a mutually agreeable location.

#### Chapter 8 - Water Resources

- The North Fork of Rush Creek is impaired. The current plan makes no mention of this impairment. We request that the North Fork of Rush Creek be identified as impaired as there is a potential for joint water quality projects or grants.
- The text identifies Figure 8-3 as the Drinking Water Supply Management Area (DWSMA), however, Figure 8-3 shows a
  watershed map. The DWSMA is of interest to Corcoran for water supply planning purposes and the graphic should be
  updated.

- The water main figure shows a trunk water main at the Corcoran border. Corcoran supports planning for the option of a future intra-City interconnect
- An area west of CR 116 shows a sanitary sewer gravity stub at the Corcoran border draining into Rogers. Corcoran has a plan to service this area, however the shared system would be considered upon development.

#### Chapter 9 - Transportation

The transportation plan is consistent with the Corcoran plan.

We look forward to working with City of Rogers. Please feel free to contact City Administrator Brad Martens with questions at bmartens@ci.corcoran.mn.us and 763-400-7030.

Sincerely,

Ron Thomas Mayor City of Corcoran Brad Martens City Administrator City of Corcoran

	We have review the proposed Rogers 2040 Comprehensive Plan and offer the comments provided in the following pages (include additional sheets as necessary).

### **General Comments:**

Please provide any comments or questions regarding the plan as a whole. Please include page, figure, or table numbers as warranted.

Thank you for your continued support of Dayton transportation improvements. The City of Rogers continues to be a valued partner of Dayton and we look forward to maintaining our collaborative relationship.

One comment that could be added may be related to the Water Supply System Chapter. It may be beneficial to add a note about "continued work on regional issues like water supply. Future projects may include future exploration of a regional water supply and/or surface water treatment from the Mississippi River with the assistance of nearby cities (Corcoran, Dayton, Ramsey) and Department of Health and other jurisdictions."

We aren't looking for anything specific as specifics for any regional surface water treatment have not been fleshed out.

# **Economic Competitiveness Plan:**

Please provide any comments or questions regarding Chapter 7, Economic Competitiveness. Please include page, figure, or table numbers as warranted.

### **Water Resources Plan:**

Please provide any comments or questions regarding Chapter 8, Water Resources. Please include page, figure, or table numbers as warranted.

# **Transportation Plan:**

Please provide any comments or questions regarding Chapter 9, Transportation. Please include page, figure, or table numbers as warranted.

The City of Maple Grove supports the extension of County Road 117 between County Road 116 and County Road 101 to help improve east/west movement, as well as access to Interstate 94 via the soon-to-be constructed Dayton Parkway interchange.

**Hennepin County Comments** 

	rtment	Division/Group	Page Number	Chapter	Comment
	PW	Trans Planning	113	Transportation	Perhaps a turnback of CR 159 between CR 116 and CSAH 101 should be further disucssed between the county and the city
	PW	Trans Planning	114 / Figure 9-1	Transportation	Revise TH 101 north of I-94 to 'State Roadway'. Would be helpful to label CR 159, CR 116 (Fletcher Ln), and CSAH 101 (Brockton Ln) as well
	PW	Trans Planning	118 / Figure 9-3	Transportation	With an extension of CR 117 to the Brockton Interchange, an upgrade to A- Minor status will likely be necessitated along with a change in State Aid funding designation
	PW	Trans Planning	119	Transportation	Programmed and Planned Improvements - Hennepin County staff currently envision CSAH 144 (I-94 overpass to CSAH 13) as a future 3-lane section, at least outside of the major intersection approaches. We will have to further coordinate to determine ultimate improvements here
	PW	Trans Planning	122 / Figure 9.5	Transportation	Hennepin County forecasts for CSAH 13 (Brockton Ln) north of CSAH 81 are considerably lower (15,800) than this listed forecast of 25,000? Is this perhaps a misprint?
	PW	Trans Planning	123 & 126 / Table 9.3 & Figure 9.8	Transportation	Please consider excluding the four lane undivded section from the reference table. Hennepin County no longer considers this design in new construction due to the high propensity for crashes
	PW	Trans Planning	127 / Figure 9.9	Transportation	While no capitol improvments are currently planned, our 2040 plan envisions CSAH 81 East of TH 101 as a future 4-lane divided section. This would certainly alleviate forecasted capacity concerns
	PW	Trans Planning	129 / Table 9.4	Transportation	Please advise South Diamond Lake Rd/David Koch Ave (CSAH 49) is no longer a county roadway - Revise site locations #'s 1, 3, 7, 11, and 12 and following text
PW		Trans Planning	132 / Figure 9.11	Transportation	In looking at the Hennepin County Planned and Existing Bike Routes map, we include a short trail segment to the west of 101. Our map includes additional planned off-street trails that are not included in Figure 9.11.

We have review the proposed Rogers 2040 Comprehensive Plan and do not have any comments. We are therefore waiving further review.
We have review the proposed Rogers 2040 Comprehensive Plan and offer the comments provided in the following pages (include additional sheets as necessary).

### **General Comments:**

Please provide any comments or questions regarding the plan as a whole. Please include page, figure, or table numbers as warranted.

ISD 728 recognizes how our communities are ever-evolving and appreciates the opportunity to provide feedback, as well as the continued partnership. We appreciated the process, as well as the commitment to the outlined values and issues highlighted.

ISD 728, which includes the City of Rogers, IS a community of choice for living and learning with attainable housing for all persons, vibrant neighborhoods, and academically inclusive schools.

We support the work of the City, and would welcome ways to collaborate further in all of the outlined areas, especially those relating to land use, parks and trails, and housing. Moreover, as we continue to grow, we would be interested to think about and explore mutual interests (i.e. swimming pools, multi-purpose spaces, etc.).

### Land Use Plan:

Please provide any comments or questions regarding Chapter 4, Land Use. Please include page, figure, or table numbers as warranted.

Your work and plan aligns well with our strategic plan and research. We were a bit surprised about the percentage related to agriculture. Further conversations about how we can partner will be valuable.

### **Housing Plan:**

Please provide any comments or questions regarding Chapter 5, Housing. Please include page, figure, or table numbers as warranted.

Interesting to see this data as it relates to our recent demographic study in ISD 728, win which you worked. We will want to watch these trends closely as we plan for enrollment, building capacity, and future boundary change considerations.

### Parks, Open Spaces & Trails Plan:

Please provide any comments or questions regarding Chapter 6, Parks, Open Spaces, and Trails. Please include page, figure, or table numbers as warranted.

We agree completely with your comments and assessment (See Below): Athletic Facilities

Current and future Athletic Facilities rely heavily on ongoing collaboration between the City and School District to fulfill recreational needs within the community. Currently, some of the athletic fields are utilized jointly by both community recreational groups and School District. Due to a large amount of economic development in the region, the School District may be expanding in the near future and relocating fields closer to the school campuses. These are opportunities for the City to develop new athletic fields or re-purpose current sites for other recreational uses.

We support the city's efforts related to parks, open spaces and trails and would appreciate further conversation as the District considers future referendums.

### **Economic Competitiveness Plan:**

Please provide any comments or questions regarding Chapter 7, Economic Competitiveness. Please include page, figure, or table numbers as warranted.

As Rogers seeks to create a climate for meaningful economic growth and provide a strong economic base for its residents and workforce, it also seeks to be competitive with other cities. We believe the School District can contribute in this area, and would like to explore further options with the City. Attracting and retaining a strong economic base, everyone benefits.

# **Water Resources Plan:**

Please provide any comments or questions regarding Chapter 8, Water Resources. Please include page, figure, or table numbers as warranted.

# **Transportation Plan:**

Please provide any comments or questions regarding Chapter 9, Transportation. Please include page, figure, or table numbers as warranted.

The information related to capacity is appreciated, and the District would support efforts to meet these needs. Please let us know how we can partner to support efforts to ensure future efficiencies and safety for our children and residents.

### **Resiliency Plan:**

Please provide any comments or questions regarding Chapter 10, Resiliency. Please include page, figure, or table numbers as warranted.

### Implementation Plan:

Please provide any comments or questions regarding Chapter 11, Implementation. Please include page, figure, or table numbers as warranted.

This plan is thorough and strategic. It will require much effort, energy, and resource, but will absolutely benefit, attract and retain residents, keeping Rogers a desired destination to learn and live.

# **Rogers 2040 Comprehensive Plan**

Adjacent and Affected Jurisdiction Review and Comment Form

December 21, 2018

Dear Government Partner,

The City of Rogers has completed its draft 2040 Comprehensive Plan. The plan is set to guide City decision-making to 2040 based on its Vision and Guiding Principles. The draft plan is broken into the following chapters to respond to the needs of the City and the region as a whole:

- 1. Introduction
- 2. Community Profile
- 3. Vision & Guiding Principles
- 4. Land Use
- 5. Housing
- 6. Parks, Open Spaces and Trails

- 7. Economic Competitiveness
- 8. Water Resources
- 9. Transportation
- 10. Resiliency
- 11. Implementation

Per Minnesota Statute 473.585 Subd. 2 and the Metropolitan Council, we are distributing the draft of the Rogers 2040 Comprehensive Plan for your review and comment. The draft Plan can be found here: www.2040compplan.rogersmn.gov

It is respectfully requested that you review the proposed Rogers 2040 Comprehensive Plan and send comments, or indication of no comment, to Jason Ziemer (contact information below) by June 21, 2019. That being said, the City is asking you to expedite your review of the Plan as the City has a number of development projects dependent on the new 2040 Plan. Attached is a comment form for your use.

Thank you!

#### Jason Ziemer

X	We have review the proposed Rogers 2040 Comprehensive Plan and offer the comments provided in the following pages (include additional sheets as necessary).	

### **General Comments:**

Please provide any comments or questions regarding the plan as a whole. Please include page, figure, or table numbers as warranted.

Please see Water Resources Section Comments

### Water Resources Plan:

Please provide any comments or questions regarding Chapter 8, Water Resources. Please include page, figure, or table numbers as warranted.

Commission staff reviews Member Community Comprehensive Plans for conformance with the Commission's 3rd Generation Stormwater Management Plan. The review focuses on the requirements of the communities as outlined in MS 103B.231 and .235.

Updates to the local stormwater management plans are expected to include:

- Updated land use, hydrologic, and hydraulic data, and existing or potential water resource related problems that may have changed since the last LWMP.
- An explanation of how the member city will help to implement the actions set forth in the Commission's Plan, including specifically addressing adoption and enforcement of a manure management ordinance.
- Show how the member city will take action to achieve the load reductions and other actions identified in and agreed to in TMDL Implementation Plans.
- Updated Implementation Plan identifying the specific structural, nonstructural, and programmatic solutions to the problems and issues identified in the LWMP.
- Set forth an implementation program including a description of adoption or amendment of official controls and local policies necessary to implement the Rules and Standards; programs; policies; a capital improvement plan; and estimates of cost and funding mechanisms.

Staff received the draft Roger 2040 Comprehensive Plan for review and comment on January 2, 2019. Staff concentrated on Chapter 8, Water Resources, in said plan.

Based on our review, none of the requirements from MS 103B are addressed in this draft plan.

### Transportation Plan:

Please provide any comments or questions regarding Chapter 9, Transportation. Please include page, figure, or table numbers as warranted.

Text revisions requested. "Sylvan Lake is a treasured asset for Rogers and one of three lakes situated entirely within the City."

> Page 70 and 71 (Table 6.1)

Appointed At Large

"Park and open space offerings for Rogers include 32 City parks occupying 601 acres, and the 2,182 2,188-acre Crow-Hassan Park Reserve managed by Three Rivers Park District..."

Boe Carlson Superintendent

Text revisions requested.  "At approximately 2,600 acres total, which includes acreage within the City of Hanover,		Page 73
	pace is defined by the large uninterrupted native landscapes."	
<b>Text revisions requested.</b> "The Crow River <u>Regional Trail</u> has a proposed route that stretches from the Luce Line State Trail in Watertown Township, through Rogers, and over to the West Mississippi River Regional Trail in Dayton."		<b>Page</b> 75
Мар	clarification requested.	Page
• F	e 6.2 defines local parks, trails, bikeways and sidewalks throughout the City of Rogers. For clarification purposes, the existing trail network within Crow-Hassan Park Reserve is impaved. However, this map does not differentiate between paved and unpaved, and may lead to confusion by the reader. Please add an additional category or color to make that differentiation clear. This comment is consistent with Figure 6.2 being also shown on page 132.  The Crow River Regional Trail Master Plan defined existing segments of the local paved, off-street trail network that is slated to become regionalized. Our records indicate that	76 & 132
t F	here is an existing trail along the south side of $141^{\rm st}$ Avenue N from Marie Avenue to Rogers High School entrance.	
-	clarification requested.	<b>Page</b> 77
Figure	e 6.3 defines regional and county trails/bikeways throughout the City of Rogers.  Please add the following text to the legend label, "Regional <b>Trail</b> Search Corridor."	, ,
•	There appears to be overlap of designations and colors depicted, which does not allow the map to be accurately shown. This is evident with the comment for Figure 6.2 regarding the existing trail along the south side of 141st Avenue N from Marie Ave. to Rogers High School – as it appears to be shown underneath the Crow River Regional Trail line work.	
•	There appears to be two lines showing the Rush Creek Regional Trail. The Park District and City of Rogers have worked in the recent past to tweak the proposed Rush Creek Regional Trail route alignment – however having two lines on the map is confusing. Please modify the map to show one route.	
•	NOTE: It may be helpful to merge Figures 6.2 and 6.3 to show the planned bike/pedestrian system in its entirety.	
Chap	ter 8   Water Resources – General Comments	
poten	le reference, associated summary and recommendation of the Elm Creek watershed TMDL tial issues exist, how to mitigate said issues and to what degree Rogers is responsible for left.	
Text	revisions requested.	Page
The fo	ollowing text is misleading, as it implies that there are only three lakes in Rogers, "The lakes in Rogers - Cowley Lake, Henry Lake"	89
and S Recre	ested wording could include something such as, "Three lakes in Rogers (Cowley, Henry ylvan) were assessed and determined to be impaired by the MPCA for Aquatic ation due to nutrients. A TMDL for the Elm Creek watershed was approved by the EPA in and included an assessment of these impairments."	

#### Text revisions for consideration.

- Address load reduction versus meeting current standards. Specifically, current stormwater rules indicate that nutrient loading cannot exceed existing conditions – but in order to reach reductions, cities may need to increase standards to reduce loading.
  - It is mentioned that there is enforcement of regulations, however the city may wish to review the types of regulation when areas are being developed and redeveloped.
- When referencing floodplain management, the city may wish to add that because of increased extreme precipitation events, work within the floodplain should be designed to accommodate such events – including higher flow rates.

#### Text revisions for consideration.

When discussing the future water supply system it is beneficial to include water recharge dialogue, specifically language regarding promoting and/or protecting water infiltration areas.

### Page

Page 91

93

#### Chapter 9 | Transportation - General Comments

Several Hennepin County roads border Crow-Hassan Park Reserve including 141<sup>st</sup> Avenue North, Sylvan Lake Road and Park Drive. City staff have expressed a desire to realign/adjust this road network in proximity to the park reserve however, it does not appear that this has been expressed within this Plan. Should this desire for a modified road alignment become realized, the Park District would request to be included in this conversation at an early stage to minimize negative impacts to the park reserve.

#### Text revisions requested.

"The roadway network in Rogers has been significantly shaped by several physical features, including the Crow River, I-94, TH 101, Crow\_Hassan Regional Park Reserve..."

### Page

112

#### Chapter 10 | Resiliency - General Comments

The importance of trees is mentioned several times throughout this chapter. In order to minimize loss if new pests and/or diseases are introduced, the city may which to specify that diversification of tree species is important to promote.

# Community of Rogers 2040 Comprehensive Plan Update

### Adjacent and Affected Jurisdiction Review and Comment Form

Date:	3/1/19
,	ent or Affected Jurisdiction Name:Minnesota DNRent or Affected Name:Minnesota DNR
	We have reviewed the proposed Plan Update, do not have any comments, and are therefore waiving further review.
	We have reviewed the proposed Plan Update and offer the following comments (we are using the Met Council format, because our comments did not fit in the form provided)

The mission of the Minnesota Department of Natural Resources is to work with citizens to conserve and manage the state's natural resources, to provide outdoor recreation opportunities and to guide sustainable commercial uses of natural resources. With these things in mind, we appreciate the opportunity to provide comments on the city of Rogers' draft 2040 Comprehensive Plan. We support the city's strategy to invest in places of historical, cultural and environmental significance to preserve the physical characteristics of the community. The following comments outline other ways to further these goals.

**Natural Resource Planning.** We recommend that the introduction includes a figure showing the location of ecologically-significant areas and natural resources corridors, as mapped in Hennepin County's interactive Natural Resource Map (including DNR Native Plant Communities and Sites of Biological Diversity).

(<u>https://gis.hennepin.us/naturalresources/map/</u>). To provide a more complete picture of the water features, the DNR's Stream Routes map could be added to the Water Resources map (Fig. 2.3).

Some of the city's natural features are not visible, particularly the hydric soils that have been drained. The plan guides most of the southwest areas of the city from agriculture to residential. As this transition happens, showing the natural resource corridors (referenced above) on inventory maps as an underlay to the land use map would illustrate how your city can realize its greenways and natural systems goals, as shown on p. 73-74. In the Sylvan Lake Focus Area discussion and maps, showing an underlay of the hydric soils would indicate a finer scale pattern of where natural resources corridors and drainage-ways could be developed as agricultural uses transition to residential. These corridors can serve multiple functions, as storm water storage and filtration to protect the lake, and as wildlife habitat. In addition, the proposed trails in the Parks and Trails (Fig. 6.2) map could be added to the focus area map.

For further conservation planning and to ensure compliance with the Minnesota endangered species laws, the DNR encourages communities to check the NHIS Rare Features Data for known occurrences of state-listed species. The NHIS Rare Features Data contains nonpublic data and can only be accessed by submitting a License Agreement Application Form for a GIS shapefile or by submitting a NHIS Data Request Form for a database printout. Both of these forms are available at the NHIS webpage. Consider adding a discussion of what the city can do to preserve the species and preserve needed habitat into the future. For more information on the biology, habitat use, and conservation measures of these rare species and plant communities, please visit the DNR Rare Species Guide. NHIS training includes rules for using/displaying nonpublic data in public documents.

We strongly support the strategy listed on p. 24, to "develop a natural resource stewardship plan that promotes an ecosystem-based approach to managing natural systems and balancing land pressures of a growing community." This plan will be more successful if it is integrated with land use and development review processes in the city.

**Native Species.** We suggest strategies that encourage developers to plant with native flowers, grasses, shrubs and tree species. Species such as monarchs rely on these plants, and it does not take many plants to attract butterflies, other beneficial pollinators as well as migrating and resident birds. Adding more native plants into landscaping not only enhances the health and diversity of pollinators and wildlife populations, these plants can also help filter and store storm water, which would serve other goals in your plan. For more information consult DNR's pollinator page. Plant lists and suggestions for native plants can be incorporated into:

- o Proposed landscape guidelines to improve the aesthetics in for commercial and industrial areas
- o Street tree planting plans
- o City gateway features
- o Along ponds and waterways.
- o Small nature play areas in children's parks
- o Along the edges of ballfield complexes.
- o Lakeshores

**Development / Transportation Policies to Protect Wildlife.** Consider adding policies that take wildlife into consideration as transportation and redevelopment projects occur. To enhance the health and diversity of wildlife populations, encourage developers of private and public lands to retain natural areas or restore them with native species after construction. One larger area is better than several small "islands" or patches; and connectivity of habitat is important. Animals such as frogs and turtles need to travel between wetlands and uplands throughout their life cycle. Consult <a href="DNR's Best Practices for protection of species">DNR's Best Practices for protection of species</a> and <a href="Roadways and Turtles Flyer">Roadways and Turtles Flyer</a> for self-mitigating measures to incorporate into design and construction plans. For example, the proposed extension to 109 (it looks like it runs along Rush Creek wetlands and floodplains) is a good opportunity to consider wildlife needs. Examples of more specific measures include:

o Preventing entrapment and death of small animals especially reptiles and

- amphibians, by specifying biodegradable erosion control netting ('bio-netting' or 'natural netting' types (category 3N or 4N)), and specifically not allow plastic mesh netting. (p. 25)
- o Providing wider culverts or other passageways under paths, driveways and roads while still considering impacts to the floodplain.
- o Including a passage bench under bridge water crossings. (p. 17) because typical bridge riprap can be a barrier to animal movement along streambanks.
- O Curb and stormwater inlet designs that don't inadvertently direct small mammals and reptiles into the storm sewer. (p. 24). Installing "surmountable curbs" (Type D or S curbs) allows animals (e.g., turtles) to climb over and exit roadways. Traditional curbs/gutters tend to trap animals on the roadway. Another option is to install/create curb breaks every, say, 100 feet (especially important near wetlands).
- O Using smart salting practices to reduce impacts to downstream mussel beds, as well as other aquatic species.
- o Fencing could be installed near wetlands to help keep turtles off the road (fences that have a j-hook at each end are more effective than those that don't).

Community Forestry. P. 139 discusses the importance of an Urban Tree canopy, and the implementation section discusses the need to increase tree coverage. Recently Emerald Ash Borer has been reported in Rogers, and we recommend that this issue be discussed in more depth. The first step to achieving a resilient community forest is conducting a tree inventory. The second step is developing a community forestry management plan that includes strategies for managing trees, especially ash, and encouraging a diverse tree canopy on private and public lands. It would be worth mentioning in the narrative of the comprehensive plan if Rogers has developed a plan for the city's forestry needs as part of an overall strategy to meet its environmental goals and policies. If not this effort could be part a first step to creating a relevant and timely Natural Resources Stewardship plan.

Parks and Trails. We suggest you add the word "restore" to the phrase "identify opportunities to protect sensitive areas and valued natural resources" (P.70). It would be helpful to see Figures 6.1, 6.2, 6.3 all on one map. Consider discussing snowmobile trails in the parks chapter and showing them on the trail map. State-supported grant-in-aid trails connect your community to an extensive network of trails throughout the state. Including the trails on inventories would raise awareness of this recreational activity. The snowmobile GIA Program webpage below also has more information on the program and funding. https://www.dnr.state.mn.us/grants/recreation/gia\_snowmobile.html

Agenda Item: No. 5.2

**Subject:** Consider Requests from NLD Rogers, LLC for Items Related to the

Redevelopment of the Former Minnie's Diner Site, 13105 Main Street.

Prepared

Jason Ziemer, City Planner / Community Development Coordinator

By:

# Overview / Background

NLD Rogers, LLC (Applicant) has submitted a Zoning & Land Use application, requesting City approval of a Preliminary Plat, Final Plat, Site Plan and Variance for the redevelopment of 13105 Main Street, previously Minne's Diner. The property is 1.37 acres (60,004 square feet)and abuts to Interstate 94 and Main Street (Co. Rd. 81); PID #: 23-120-23-21-0031 (Subject Property).

In addition to the Subject Property, the property to the south will be part of the preliminary and final plat to become the Bluewater Bay Development. The southern property is the Speedway gas station located at 13101 Main Street (PID #: 23-120-23-21-0008 & 23-120-21-0007). The gas station has two separate parcels that will be combined into one. The Subject Property will be divided into two (2) lots, each with a building on the lot. The entire Bluewater Bay plat is 2.28 acres (99,454 square feet). Although we are replatting the Subject Property and the gas station to the south, redevelopment will only occur on the Subject Property.

The Applicant is requesting a variance to reduce the number of parking stalls on the property and to encroach into the access drive setback of five (5) feet.

Due to the Subject Property's access, size and location, please note many private easements are drafted between properties affected by this redevelopment. Infill and redevelopment sites often face obstacles that require participation, negotiation and flexibility from the developer, City and surrounding property owners. Details within this memo, and noted on the attached site plans will show and address some of the proposed or existing easements on the property.

The application was submitted on March 6, 2019. At the time of application, the Subject Property was under an interim ordinance (moratorium) that prohibited review of development or land use requests. On March 26, 2019, the City Council excepted the two properties, per Resolution No. 2019-30, enabling the City to consider the application. The application was determined complete on April 16, 2019. The 60-day review period expires on June 15, 2019.

### **Primary Issues to Consider**

- 1. Land Use & Zoning
- 2. Preliminary & Final Plats
- 3. Site Plan
- 4. Variance Standards

# **Analysis of Primary Issues**

# 1. Land Use & Zoning

The Subject Property, a 2.28-acre site, is currently guided as **Commercial**, per the Rogers 2030 Comprehensive Plan, which is defined as follows: *Commercial uses include community and regional scale retail and service. Commercial land uses should be located in places with good accessibility to the regional highway system as well as to alternative roadway access points that provide convenient access for the local community. Commercial nodes should be sized to accommodate a critical mass of uses that create a strong and vibrant commercial center. These nodes typically range in size from 100,000 to 350,000 square feet. The draft 2040 Comprehensive Plan guides the property as Commercial.* 

The corresponding zoning for the property is **Retail Business District (B-1)**. The proposed uses for the Subject Property are permitted according to the B-1 zoning district [125-197].

The property does fall within the **Highway Corridor Overlay District** *South side commercial and industrial subdistrict* as established by City Code Section §125-225(f)(3). This Overlay District establishes development standards emphasizing greater sensitivity to the environment and higher quality architectural and site design. Those standards shall be reviewed as part of the Site Plan.

Land Use and Zoning conditions are satisfied. The HCO requirements are subject to variance approval.

# 2. Preliminary & Final Plats

The Applicant is proposing to plat 2.28-acres to become three parcels; legally described to be Lots 1, 2 & 3, Block 1, Bluewater Bay. The Preliminary Plat satisfies City requirements for platting. The Applicant is providing drainage and utility easements (D/UE) around all perimeters of the property and between Lots 2 & 3. Public Works staff has agreed to void the requirement of D/UE easements between Lot 1 & 2.

### Platting conditions are satisfied.

### 3. Site Plan

<u>Site</u>

Currently, the Subject Property is an unplatted single parcel with an area of 1.37 acres (60,004 square feet). The Subject Property will be platted into Lot 1 & 2. Lot 1 is proposed to be 0.614 acres (26,732 square feet) and Lot 2 will be 0.725 (31,578 square feet). Lot 3 will be gaining 1,917 square feet from the Lot 2 to straighten the lot line and end up with a total lot size of 0.944 acres. The existing 4,020 square foot building on the property has sat vacant for a number of years, since Minne's Diner closed. As described above, the Applicant is proposing to plat the Subject Property, plus the two southern parcels. Redevelopment will only occur on the Subject Property. The Development has access from Main Street (right-in, right-out only) and Industrial Boulevard. The Applicant has drafted new easements and redrafted older agreements to ensure there is legal access to and from the Subject Property. If not for those easement agreements, this parcel would essentially be landlocked.

The proposed building for Lot 1 (Building 1) is 3,400 square feet and will be constructed with a drive-thru and an outdoor patio area. The proposed building for Lot 2 (Building 2) is 5,170 square feet. Building 2 also has a drive-thru for a coffee shop (2,000 sq. ft.) on the southern end of the building,

and retail space (3,160 sq. ft.) in the remaining area of the building. The retail space has two building entrances and the space could be built to suite, or a bigger retailer could occupy the entire space. The two drive-thru uses have tenants known as Freddy's Custard and Steakburger, and Dunkin'. Currently, there is not a retailer who plans on occupying the retail space.

The Applicant is proposing to install a six (6) foot white vinyl privacy fence to border the west property line that abuts to the AmericInn motel. The trash enclosure for both Buildings 1 & 2 with be placed on the south end of Building 1.

# Lot Coverage

The total impervious area shown on the Site Plan totals 51,382 square feet (1.179 acres), or 88.0% of the total Subject Property (60,004 square feet). There are no lot coverage standards for developments in Commercial districts. In comparison, in residential districts the maximum impervious surface area is 75% [City Code §125-329(4)].

# Lot coverage is satisfied.

### Parking & Site Circulation

The parking plan shows 64 total parking spaces, including 4 accessible spaces. According to City Code §125-313(c)(7), parking requirements for restaurants with drive-thru's, require one stall per 15 square feet at the counter area, 40 square feet for dining areas and 80 square feet for kitchen space. Retail space requires one (1) stall per 200 square feet. Based on that requirement, the number of parking spaces for the Subject Property is 139. The Applicant is requesting the parking to be reduced by approximately half of what is required for a total of 64 stalls. The site plan shows ten (10) vehicles can be stacked in the drive-thru lane. Building 1 & 2 can each accommodate 10 vehicles from the order board to the pick-up window. Various cities count the stacking number for a drive through in their total parking count, which would bring the ratio to 84 parking stalls. The City of Rogers has not used that practice before.

The attached narrative provided by the Applicant expresses their confidence in the reduced parking number. Dunkin' is tailored to morning traffic while Freddy's opens mid-day. The number of employees, stacking numbers and the usual time spent at these establishments all contribute to the variance request.

### Main Street Access

A concern with the Development is the existing driveway on Main Street- currently only a right-in right-out. Both MnDot and Hennepin County have commented on this access. According to MnDot (memo attached), "the access is not ideal but appears to be unavoidable due to lack of other viable access locations". Hennepin County on the other hand continues to express concern over this access point. Although there is a permit from the County indicating the access will remain under current conditions the redevelopment of the site is prompting a question as to whether access should be further restricted. In an ideal world, the County would seek closure of this access, requiring full ingress and egress of the site, and the adjacent gas station, from Industrial Boulevard. However, the County understands the potential business impacts resulting from a full closure and is willing to further explore retaining the access, but with restrictions. Two options discussed include adding a "porkchop" island to force right-in right-out turning movements or a right-in only. County and City staff agree a "porkchop" island would serve no benefit. It has been suggested by City staff that the developer, owner or the gas station, and County

staff come to an agreement on the best alternative for this access. A meeting has been scheduled for Tuesday morning, May 21 with these parties.

# Parking requirements are not satisfied. Variance is requested.

### **Materials**

Developments in commercial business districts must satisfy architectural design standards. Those standards [§125-346], state: *In all commercial and business zoning districts* (*B-1, B-2, B-3 and B-C*) *75 percent of the exterior building finish shall consist of the following materials: face brick; natural stone; glass; cast stone; cultured stone; EIFS; precast concrete panel with an exposed aggregate of granite, marble, limestone or other natural stone material with at least two architectural reveals per panel.* The building must also use up to three of the following to break up long walls: *window bays, special treatments at entrances, variations in rooflines or parapet, and building setbacks or articulation of the façade.* For buildings 10,000 to 20,000 square feet in total gross area, no wall can exceed 50 linear feet without some type of variation to the wall. Both buildings on the Subject Property meet, and exceed the architectural design requirements.

The colored architectural elevation provided by the Applicant shows a high-quality finished design, using a mix of high-quality materials with articulations in the roof. With the exception of the window bays and doors, the exterior of the building shall be comprised of a stone veneer and EIFS with neutral finishes. In addition to the exterior finish requirements for commercial building, City Code also requires trash enclosures to be of the same materials. According to the plans the enclosure is of the same stone veneer.

# Material requirements are satisfied.

# Surface Water

Properties must have approved ponding systems to deal with the water runoff and accumulation produced from the property. Currently, no water mitigation efforts are in place for the Subject Property. Due to the small size of the site, the Applicant is proposing to install an on-site underground storm system. The City engineer has reviewed the stormwater plans including the underground system and has found the proposed stormwater management system acceptable. The Elm Creek Watershed Management Commission (District) is reviewing the plans and will act on the proposed stormwater management system at its June meeting. The District reviews the plans to determine that the site, and proposed underground system, satisfies requirements for both water quality and rate control. The District has indicated it would grant a grading and erosion control permit administratively to allow the developer to move forward with construction, pending City approvals.

The Applicant expressed that snow removal will be hauled off site because the lack of space on the site. This is shall be addressed in an Agreement between Lots 1 & 2 in the Development.

## Surfaced Water requirements are satisfied; pending approval from the District.

### Landscape Plan

The Subject Property has a vacant building and has little to no landscaping and minimal trees. For landscaping, City Code merely requires the Applicant to provide a plan that shows the location, size and type of tree and plant species. The Landscape Plan shows 40 shrubs and five (5) trees around Buildings

1 & 2. The submitted landscape plan does not show any landscaping around the perimeter of the property abutting I-94 or Main Street. New plans will be resubmitted with landscaping in those areas. The City requires all trees planted to have a minimum caliper of 2.5 inches. According to City Code [§125-313(c)(6)], for every 12 parking spaces in a row a landscaped island shall be provided with at least one (1) tree per island. The minimum size of the island is nine (9) feet by 18 feet. City staff has discussed the size of the islands with the Applicant. Smaller islands are not often conducive to successful and sustainable plant and tree growth; staff requested combining the two (2) center islands into one (1) island. As the Applicant is satisfying minimum standards it was decided to leave the islands as shown on the plans. Applicant will also add a tree on the parking island with the freestanding sign.

Landscape requirements for properties in the Highway Corridor Overlay District [§125-225(e)(1-2)] require a 20-foot wide irrigated landscaped area adjacent to all street rights of way. The north and east side of the property along Main Street and I-94, does not satisfy the landscaped requirement, as parking is shown to be located within the space.

As a redevelopment infill site, there are site constraints with this property, creating the inability for this, or any development, to satisfy certain code requirements. Although the redevelopment of this site enables the City to enhance the appearance of this property, the 20-foot landscaping setback requirement creates other challenges for the Development to satisfy other city code requirements, such as parking. The Applicant has indicated they will over landscape the site in other areas to account for the 20-foot landscaping requirement. The City has accepted this as a reasonable alternative with other projects, such as Primrose Schools and Graco.

### Landscape Plan requirements are satisfied.

### <u>Signage</u>

The Subject Property is in the *CB Community Business Sign Overlay District*. Applicable sign standards for this district [§113-9] allow the following: wall signs with a maximum area of 2 square feet per lineal feet, up to a maximum of 100 square feet; and freestanding signs with a maximum area of 60 square feet and maximum height of 12 feet. Lighting for wall and freestanding signs may be either internally or externally lit; any external lighting source must be downward facing only.

### Wall Signs

The submitted sign plan shows Building 1 of having two (2) wall signs; one per street frontage [113-9(1)]. Building 2 shows the possibility of three (3) wall signs, all on the east building elevation for each possible tenant. The total sign square footage on Building 2 does not exceed the allowable 100 square feet. Sign permits will be pulled as a separate permit and plans shall be in similar concept to the plans attached to this memo.

### Freestanding Signs

City Code permits one (1) freestanding sign per property [113-9(3)]. The Subject Property has two freestanding signs on the site. One is owned by the gas station, that, with the construction of the existing vacant Diner in 1975, established a sign easement on the property to keep the sign for advertising purposes. At one point in time, the Diner was given a permit to construct a second freestanding sign. Thus two freestanding signs were located on a single parcel. Although both the number, size, and height of the signs exceed current city standards, both are non-conforming and can maintain their non-conforming status per City Code and State Statute. The gas station will continue the use of the freestanding sign, and the new tenants will use the existing Diner freestanding sign.

### Directional/Auxiliary Signs

Directional signage, referred to as Auxiliary signage in City Code, will be installed and directional arrows will be painted on the asphalt to mitigate traffic flow within the site with the goal of directing traffic to and from Industrial Boulevard. City Code restricts the size of auxiliary signage to 6 square feet. Auxiliary signage is defined as: *Auxiliary sign means a sign that has a purpose secondary to the use of the lot on which it is located, such as telephone, drive-thru, cash machine, air, entrance, exit, parking restriction, security warnings, or similar directives.*—Previous site plan approvals have included auxiliary signage in the site plan approval because of the complexities of site movement and the need for drive-thru operations to mitigate traffic. The sign plan shows a monument sign to be placed on the gas station property, within a pending designated sign easement area. The plans have been altered to show that monument sign to be 6' x 7' with two sign cabinets to encourage traffic direction. The auxiliary sign on the gas station property must provide easement documentation and prove the sign is not encroaching into the 'clear vision triangle' at time of permitting. Staff requested directional signage and arrows throughout the site to help customers navigate to exit onto Industrial Boulevard.

# Sign requirements are satisfied.

### Fire

The Applicant provided a drawing showing fire apparatus access and circulation. Fire staff has commented on the proposed development and site plan. Those comments have been addressed by the Applicant.

## Fire Department requirements are satisfied.

### 4. Variance Standards

The Applicant has submitted two (2) Variance requests – setback encroachment for the access drive, and parking variance per the parking requirement for proposed uses.

### Access Drive

The proposed Development shows a parking lot driveway to be placed on the northeast property line, adjacent to MnDot right-of-way. City Code states the access drives (aka driveways) shall be setback from property lines at least 5 feet [§125-330(a)]. The Applicant identifies this an important for site circulation and for turning radius requirements per the Fire Department.

### Parking Variance

The Applicant proposes to lessen the parking to 64 parking stalls versus the required 139. Both Freddy's and Dunkin' expressed their support for the reduced number of stalls and feel those numbers are of no concern to their business operations. In addition, the site has drive-thru vehicle stacking counts of 10 for each building.

### Variance Considerations

For variance applications, the Planning Commission shall use the following criteria as part of its analysis and evaluation when considering whether to approve such requests [§125.58(a)].

- 1. Variances shall only be permitted when they are in harmony with the general purpose and intent of city code and consistent with the comprehensive plan.
- 2. Variances may only be permitted when the applicant establishes that there are non-economic practical difficulties in complying with the zoning ordinance, meaning the property owner proposes to use the lot or parcel in a reasonable manner not permitted by the zoning code.
- 3. The plight of the property owner must be due to circumstances that are unique to the lot or parcel and is not created by the property owner.
- 4. The variances must not alter the essential character of the locality including all zoning district and overlay district provisions.

Although the practical difficulty aspect of variance requests looks at the "reasonable use" of a property, that consideration by the Planning Commission should also take into account whether a variance is absolutely necessary. In other words, is the Applicant able to comply with current zoning code as stated without the need for a Variance.

## Analysis of Request

City code has setback requirements for driveways on residential and commercial properties. This requirement is to ensure developments are completely within their property boundaries and do not hinder adjoining properties or future development. City staff has reviewed the request and find the parking lane setback will not affect MnDot right-of-way, but will increase fire truck accessibility as well as traffic circulation. The Subject Property maintains the 5-foot drive access setback on the western property line and meets all building setbacks according to code. Staff views this request as reasonable due to the size of the property, traffic circulation and view this as a public safety requirement.

Parking requirements have been reduced in recent projects within the City, and staff has received requests for reduced parking stalls, one such project was Graco. The tenants, Dunkin' and Freddy's, predict many people traveling to and from the Highway will utilize the drive-thru lands in comparison to customers entering and eating in the restaurant. Of course, customers who chose to walk in and eat are still considered in their request for reduced parking. The proposed tenants also project faster 'turn-around' times than sit down restaurants where people dine for longer periods of time. Staff supports to reduced parking requirements as we feel the drive-thru lanes, and fast food component will contribute to the reduced parking as well as the different peak hours with each restaurant.

The property is constructing a use that is consistent with the 2030 Comprehensive plan as well as the draft 2040 Comprehensive Plan. Staff feels this project is a higher and better use of the property and will increase the aesthetics of the area and bring new opportunity to south Rogers.

### **Staff Recommendation**

City staff recommends approval of the Preliminary Plat, Site Plan and Variance requests with the following conditions:

- 1. The Applicant shall submit and obtain approval for the storm water and erosion control plans, and receive the required permit(s), from Elm Creek Watershed Management Commission.
- 2. The Applicant shall construct a sidewalk with pedestrian ramp from the Main Street and Industrial Boulevard intersection north to the shared access on Main Street.
- 3. External lighting for property shall be revised to satisfy City Code to avoid light spillage or excess light at the property line.
- 4. Applicant must provide Easement documentation as required by City Staff.

- 5. The Applicant must show improved Landscaping areas.
- 6. The parking stalls shall be reduced to 64 stalls.
- 7. Main Street access shall be constructed according to layout to be determined by Applicant and Hennepin County.
- 8. The off premise sign shall be approved with size and location restrictions.

Jason Ziemer, City Planner City of Rogers 22350 South Diamond Lake Road Rogers MN 55374

**SUBJECT:** Minnie's Diner plat

MnDOT Review #P19-030

SW quad I-94 and CSAH 81 (Industrial Blvd)

City of Rogers, Hennepin County

Control Section: 2780

Dear Mr. Ziemer:

MnDOT has reviewed plans for the above referenced project in compliance with Minnesota Statute 505.03, subdivision 2, Plat approval; road review. Before further development, please address the following:

# **Traffic**

The existing and future driveway access location is not ideal but appears to be unavoidable due to the lack of other viable access locations. MnDOT encourages the city to work closely with the proponent to ensure that signage and sightlines at the driveway entrances are optimized to improve safety. Please contact Chad Erickson of the Metro District's Traffic Engineering Section at <a href="mailto:Chad.Erickson@state.mn.us">Chad.Erickson@state.mn.us</a> or 651-234-7806 with questions.

### Drainage

Irrigation is not allowed on the state right-of-way.

A drainage permit (<u>Form 30795-02</u>) will be required for this site to ensure that current drainage rates to MnDOT right-of-way will not be increased. Please provide computations and plans so that MnDOT may verify that the proposed development maintains or reduces drainage rates to the state right-of-way. Please include both existing and proposed site conditions. Drainage permit applications are available and may be submitted online at: <a href="https://dotapp7.dot.state.mn.us/OLPA">https://dotapp7.dot.state.mn.us/OLPA</a>. Please submit the following documents with the drainage permit application:

- 1. A grading plan showing existing and proposed contours.
- 2. Drainage area maps for the proposed project showing existing and proposed drainage areas. Any off-site areas that drain to the project area should also be included in the drainage area maps. The direction of flow for each drainage area must be indicated by arrows.
- 3. Drainage computations for pre- and post-construction conditions during the 2-, 10-, 50-, and 100-year rain events.
- 4. Time of concentration calculations.
- 5. An electronic copy of any computer modeling used for the drainage computations.

MnDOT's drainage permits checklist is attached for your convenience.

For drainage-related questions, please contact Brian Kelly of the Metro District's Water Resources Section at <u>Brian.Kelly@state.mn.us</u> or 651-234-7536.

### Permits

In addition to the drainage permit mentioned above, Miscellaneous Work Permits (Form #1397) will be required for the removal of the existing driveway and utility connections within state right-of-way.

Further, any other use of, work within, or impacts to MnDOT right-of-way will also require a permit.

All permit forms are available and may be submitted online at: <a href="https://dotapp7.dot.state.mn.us/OLPA">https://dotapp7.dot.state.mn.us/OLPA</a>. Please direct questions regarding permits to Buck Craig of MnDOT's Metro Permits Section at Buck.Craig@state.mn.us or 651-234-7911.

# Pedestrians and Bicycles

There are sidewalks and paths on three sides of the intersection of Main Street and Industrial Boulevard. MnDOT strongly recommends that a pedestrian connection be included from that intersection to the building entrances so that pedestrians may access the businesses without having to walk in the driveway and mix with automotive traffic.

Also, the Main Street/Industrial Boulevard intersection is part of an upcoming MnDOT pavement improvement project (SP 2780-97 Maple Grove) scheduled for FY2020. MnDOT recommends coordinating design and construction work at that intersection with the manager of the MnDOT project, Jerome Adams, at Jerome.Adams@state.mn.us or 651-234-7611.

Please direct related questions to Cameron Muhic of MnDOT's Metro Multimodal Planning Section at Cameron.Muhic@state.mn.us or 651-234-7797.

### Review Submittal Options

MnDOT's goal is to review proposed development plans and documents within 30 days of receipt. Electronic file submittals are typically processed more rapidly. There are four submittal options:

- 1. Email documents and plans in PDF format to <a href="mailto:metrodevreviews.dot@state.mn.us">metrodevreviews.dot@state.mn.us</a>. Attachments may not exceed 20 megabytes per email. If multiple emails are necessary, number each message.
- 2. Upload PDF file(s) to MnDOT's external shared internet workspace site at: <a href="https://mft.dot.state.mn.us">https://mft.dot.state.mn.us</a>. Contact MnDOT Planning development review staff at <a href="metrodevreviews.dot@state.mn.us">metrodevreviews.dot@state.mn.us</a> for access instructions and send an email listing the file name(s) after the document(s) has/have been uploaded.
- 4. Submit printed documents via U.S. Mail, courier, or hand delivery to the address above. Include one set of full-size plans.

You are welcome to contact me at (651) 234-7795 with questions.

Sincerely,

David Elvin, AICP Principal Planner

### <u>Variance [Parking] Submittal – Written Statement</u>

This variance request is submitted together with the Site Plan Submittal, Preliminary Plat and Final Plat for the project described below.

The variance request is for a reduction in the amount of required parking stalls s calculated using the current zoning code for the applicable proposed uses for the project from 139 required stalls to 64 spaces as depicted on the enclosed site plan. This is a substantial reduction in parking stalls, however, we believe the request is reasonable due to the following:

- Restaurants with drive-thrus and dine-in areas are subject to additional parking requirements
  than if it were just a sit down or drive thru restaurant which, when comparing to other uses,
  creates an extremely high stall count that would be difficult to achieve on any of the smaller
  sized, higher value properties along the I-94/ Main Street corridor similar to this property;
- The tenants typically have parking requirements that need to be achieved prior to them approving a site plan. Both the proposed tenants below have approved the site plans and have no concerns about the site being under-parked. This should be considered when reviewing this request.
- Due to the proximity of the property to the I-94 and Hwy 81, it is expected that a majority of the business will come from Rogers residents commuting from the North and West heading to and from Minneapolis as well as those utilizing the City as a regional center and travel hub, most of which are expected to utilize the drive thrus rather than park and dine in.
- The proposed site plan has 64 stalls, but also has long drive thru queues that can act as "additional stalls" for those waiting to order via the drive thru. The attached plan conservatively shows an additional 16 car stack that does not interfere at all with the parking lot/circulation. In some cities, these car stack slots may be considered as part of the parking field count. This would bring our total from 64 to 80; and
- A goal of the 2030 Comprehensive Plan is to optimize the development potential of properties along the I-94/ Hwy 101 corridor, which the proposed project is a part. We have proposed a development that we believe achieves the highest and best use for the property and will provide for a lively gateway to the City.

The proposed project located at 13105 Main Street plans to replace the former (and currently vacant) Minnie's Restaurant building with two (2) brand new commercial buildings, together totaling approximately 8,560 square feet.

The northern building of approximately 3,400 square feet is planned to be a free-standing Freddy's Frozen Custard and Steakburger sit down and drive thru restaurant.

The southern building is planned to be occupied by a Dunkin' drive thru coffee shop, with approximately 3,160 square feet remaining to be leased to a compatible retail/ service/ medical type user.

The proximity of the property to both Interstate 94 and County Rd 81/ Main St. provides an ideal location for the intended commercial uses as they are less "destination oriented" and more "convenience based" uses. Due to this, the uses will draw customers from existing traffic and will not create significantly more traffic than any other future uses that may be proposed at this location.

The proposed uses are compatible with the surrounding uses for a couple reasons:

- When compared to the north side of Interstate 94, there are few quick-service restaurants to choose from South of Interstate 94. This project will provide options in an otherwise underserved area.
- The proposed project provides for a more mixed-use landscape than currently exists today which is in line with the City's comprehensive plan.
- The demolition of a vacant, tired building will be replaced with brand new construction that will follow City design guidelines and be constructed with first class materials shown on the Exterior Elevations sheet, including a mix of stone, EIFS and CMU with decorative awnings, lighting and cornices. This will be a beautiful "gateway" project that will proudly welcome residents and passers-by to the City south of I-94.

Due to the reasons mentioned above, we believe that the proposed project will only improve the existing conditions of the site. In addition, we believe this is the highest and best use for the property given the proximity to the highway, parcel size and access.

We are excited about the opportunity to bring new construction and some exiting users to the City of Rogers.

### Preliminary & Final Plat Submittal – Written Statement

This Preliminary and Final Plat request is submitted in conjunction with the Site Plan and Variance Applications for the 13105 Main Street property (as described below).

The property currently is of record via metes and bounds. As advised by the City attorney, we are proposing a plat of the three (3) parcels today located at 13101 and 13105 Main Street, which, as a result, will complete a lot line adjustment, a lot combination, and a lot subdivision, resulting in three (3) parcels.

We believe that the preliminary and final plat request benefits the City because it creates a plat over currently metes and bounds described land and it fulfils the City's request to do so.

The proposed project mentioned above is located at 13105 Main Street plans to replace the former (and currently vacant) Minnie's Restaurant building with two (2) brand new commercial buildings, together totaling approximately 8,560 square feet.

The northern building of approximately 3,400 square feet is planned to be a free-standing Freddy's Frozen Custard and Steakburger sit down and drive thru restaurant.

The southern building is planned to be occupied by a Dunkin' drive thru coffee shop, with approximately 3,160 square feet remaining to be leased to a compatible retail/ service/ medical type user.

The proximity of the property to both Interstate 94 and County Rd 81/ Main St. provides an ideal location for the intended commercial uses as they are less "destination oriented" and more "convenience based" uses. Due to this, the uses will draw customers from existing traffic and will not create significantly more traffic than any other future uses that may be proposed at this location.

The proposed uses are compatible with the surrounding uses for a couple reasons:

- When compared to the north side of Interstate 94, there are few quick-service restaurants to choose from South of Interstate 94. This project will provide options in an otherwise underserved area.
- The proposed project provides for a more mixed-use landscape than currently exists today which is in line with the City's comprehensive plan.
- The demolition of a vacant, tired building will be replaced with brand new construction that will follow City design guidelines and be constructed with first class materials shown on the Exterior Elevations sheet, including a mix of stone, EIFS and CMU with decorative awnings, lighting and cornices. This will be a beautiful "gateway" project that will proudly welcome residents and passers-by to the City south of I-94.

Due to the reasons mentioned above, we believe that the proposed project will only improve the existing conditions of the site. In addition, we believe this is the highest and best use for the property given the proximity to the highway, parcel size and access.

We are excited about the opportunity to bring new construction and some exiting users to the City of Rogers.

# UTILITY GENERAL NOTES

- I. CONTRACTOR SHALL BE RESPONSIBLE FOR COORDINATING ALL UTILITY RELOCATIONS.
- 2. CONTRACTOR SHALL LOCATE AND VERIFY ALL UTILITIES WHICH MAY AFFECT THIS WORK AND NOTIFY OWNER OF ANY CHANGES. CONTACT LOCAL UTILITY COMPANIES FOR EXACT LOCATIONS PRIOR TO BIDDING THE PROJECT AND COMMENCING WORK.
- 3. CONTRACTOR SHALL VERIFY CRITICAL ELEVATIONS TO ENSURE CONFORMANCE WITH GRADING PLAN AND EXISTING UTILITIES, PARTICULARLY WITH EXISTING STRUCTURES AND/OR PAVEMENTS TO REMAIN.
- 4. THE CONTRACTOR SHALL NOTE ANY DISCREPANCIES BETWEEN EXISTING CONDITIONS AS EXIST IN THE FIELD AND AS REPRESENTED WITHIN THE PLANS AS SHOWN AND ALERT THE ENGINEER BEFORE BIDDING THE PROJECT AND BEGINNING CONSTRUCTION.
- 5. WATER LINE TO BE MINIMUM 8.0 FEET DEPTH.
- 6. VERIFY INVERT ELEVATIONS OF EXISTING SANITARY LINE AT POINT OF
- CONNECTION WITH NEW SANITARY LINE PRIOR TO INSTALLING ANY NEW UTILITIES.
- 7. ALL CROSSING ELEVATIONS OF NEW UTILITIES & SIZES OF EXISTING UTILITIES ARE BASED ON ASSUMED ELEVATIONS AND SIZES PROVIDED BY THE SURVEY.
- 8. ALL SANITARY SERVICE PIPE AND FITTINGS WILL BE PVC SDR 26.
- 9. ALL WATER PIPE AND FITTINGS WILL BE DIP CLASS 52.
- 10. ALL HDPE STORM SEWER SHALL BE DUAL WALL. ALL RCP STORM SEWER SHALL
- BE CLASS 5 PIPE.

  II. IF DEWATERING IS REQUIRED FOR THIS PROJECT, THE PUMP DISCHARGE SHALL BE TREATED PRIOR TO BEING DISCHARGED OFF—SITE OR INTO A SURFACE WATER.
- TREATED PRIOR TO BEING DISCHARGED OFF—SITE OR INTO A SURFACE WATER. THE DISCHARGE SHALL BE VISUALLY CHECKED TO ENSURE THAT IT IS VISIBLY CLEAN WATER.

SHEET NO.

 IF DEWATERING IS REQUIRED FOR THIS PROJECT, THE PUMP DISCHARGE SHALL BE TREATED PRIOR TO BEING DISCHARGED OFF-SITE OR INTO A SURFACE

WATER. THE DISCHARGE SHALL BE VISUALLY CHECKED TO ENSURE THAT IT IS

TEMPORARY SEDIMENT CONTROL PRACTICES

VISIBLY CLEAN WATER.

DOWN GRADIENT SILT FENCE AND SEDIMENT LOG INSTALLATIONS ARE TO BE INPLACE PRIOR TO THE COMMENCEMENT OF ANY EARTHWORK OPERATIONS.

- TOPSOIL IS TO BE WINDROWED ALONG THE CONSTRUCTION LIMITS AND PLACED AS SLOPE DRESSING IMMEDIATELY FOLLOWING COMPLETION OF THE GRADING OPERATIONS, AS THE GRADING OPERATIONS PROCEED.
- TOPSOIL PLACEMENT ALONG THE EMBANKMENT SLOPES THOUGH THE WETLANDS AREA IS TO BE SPREAD BY A LOW IMPACT CRAWLER TRACTOR OPERATING UP AND DOWN THE SLOPES SO AS TO PROVIDE TRACK PRINTS PARALLEL WITH THE CONTOURS.
- INSTALLATION OF MN/DOT CATEGORY 3 EROSION CONTROL BLANKET ALONG THE EMBANKMENT SLOPES ADJACENT THE WETLANDS AREA.
- ALL TEMPORARY SOILS STOCKPILES WILL REQUIRE AN EFFECTIVE MEANS OF SEDIMENT CONTROL SUCH AS AN EROSION CONTROL BLANKET COVERING OR SILT FENCE INSTALLATION ALONG THE TOE OF SLOPE.
- ALL COMPLETED SWALES SLOPES AND BOTTOMS NOT DRAINING TOWARDS WETLAND AREAS ARE TO BE STABILIZED WITHIN 7 DAYS.
- TEMPORARY STABILIZATION WILL BE REQUIRED IN AREAS WHERE GRADING OPERATIONS ARE SUSPENDED OR CEASED FOR A PERIOD OF 7 DAYS OR GREATER.
- A ROCK CONSTRUCTION ENTRANCE FOR SEDIMENT CONTROL IS TO BE PROVIDED AT THE PROJECT ENTRANCE ON PARK AVENUE SOUTH.
- STREET SWEEPING OF THE PAVED SURFACES WILL BE REQUIRED AS DIRECTED BY THE ENGINEER.

# TIMING OF EROSION CONTROL:

SILT FENCE AND SEDIMENT LOGS WILL BE INSTALLED PRIOR TO CONSTRUCTION.

RIPRAP AND FILTER BLANKET WILL BE PLACED AT THE OUTLETS WITHIN 24 HOURS OF THE OUTLET PLACEMENT.

THE CONTRACTOR MUST STABILIZE ALL EXPOSED SOIL AREAS IMMEDIATELY FOLLOWING CONSTRUCTION WHEREVER CONSTRUCTION WILL NOT OCCUR FOR A PERIOD GREATER THAN OR EQUAL TO 7 DAYS.

STABILIZATION WORK MUST BE COMPLETE WITHIN 7 CALENDAR DAYS AFTER THE CONSTRUCTION WORK IN THAT AREA HAS TEMPORARILY OR PERMANENTLY CEASED.

AREAS THAT ARE WITHIN 200 FT OF A PUBLIC WATER MUST BE STABILIZED WITHIN 24 HOURS OF COMPLETING CONSTRUCTION DURING PERIODS OF "WORK IN WATER RESTRICTIONS" FOR TIME PERIODS DECLARED BY THE DNR.

THE CONTRACTOR IS RESPONSIBLE TO MAINTAIN THE DISTURBED AREA UNTIL VEGETATION IN ESTABLISHED.

ONCE VEGETATION IS ESTABLISHED AND CONSTRUCTION IS COMPLETE, THE SILT FENCE AND ANY OTHER TEMPORARY EROSION CONTROL THAT IS NOT BIODEGRADABLE SHALL BE REMOVED.

STREET SWEEPING TO BE PROVIDED AS DIRECTED BY THE ENGINEER OR OWNER. THE CITY REQUIRES STREET SWEEPING TO OCCUR WITHIN 8 HOURS OF NOTICE FROM THE CITY.

APPLYING MULCH, HYDROMULCH, TACKIFIER, POLYACRYLAMIDE OR SIMILAR EROSION PREVENTION PRACTICES IS NOT ACCEPTABLE STABILIZATION IN ANY PART OF A TEMPORARY OR PERMANENT DRAINAGE DITCH OR SWALE. BLANKETS OR OTHER APPROVED, BY THE ENGINEER, METHOD SHALL BE USED.

# INSPECTION AND MAINTENANCE ACTIVITIES

THE END OF THE NEXT BUSINESS DAY.

THE CONTRACTOR SHALL BE RESPONSIBLE FOR COORDINATING AND SCHEDULING THE WORK OF ALL OPERATIONS, INCLUDING SUBCONTRACTORS AND UTILITY COMPANIES, SUCH THAT EROSION AND SEDIMENT CONTROL MEASURES ARE FULLY EXECUTED FOR EACH OPERATION AND IN A TIMELY MANNER OVER THE DURATION OF THE PROJECT. OPERATORS HAVE DAILY ACCESS TO THE PROJECT SITE. THE CONTRACTOR SHALL BE FULLY RESPONSIBLE FOR THE SWPPP IMPLEMENTATION UNTIL THE ENTIRE SITE HAS UNDERGONE FINAL STABILIZATION AND N.O.T HAS BEEN SUBMITTED TO THE MPCA.

THE CONTRACTOR IS TO PROVIDE A TRAINED INDIVIDUAL RESPONSIBLE FOR THE IMPLEMENTATION, INSPECTION AND MAINTENANCE OF THE EROSION AND SEDIMENT CONTROL BMPS ON THE PROJECT. THAT INDIVIDUAL IS TO BE IDENTIFIED AT THE PRE-CONSTRUCTION CONFERENCE AND LISTED IN THE

THE APPOINTED INDIVIDUAL IS TO PERFORM A ROUTINE INSPECTION OF THE ENTIRE SITE AT LEAST ONCE EVERY SEVEN DAYS DURING CONSTRUCTION OPERATIONS AND WITHIN 24 HOURS AFTER A RAINFALL EVENT GREATER THAN 0.5 INCHES IN 24 HOURS.

A INSPECTION FORM WILL BE PROVIDED BY THE CONTRACTOR. ANY DEFICIENCIES IN THE EROSION AND SEDIMENT CONTROL BMPS ARE TO BE NOTED ON THE INSPECTION FORM AND CORRECTED BY

PERIMETER CONTROL DEVICES ARE TO BE REPAIRED OR REPLACED WHEN THEY ARE NO LONGER EFFECTIVE OR WHEN THE SEDIMENT REACHES ONE-HALF THE HEIGHT OF THE DEVICE.

TRAINNING DOCUMENTATION:

SWPPP IMPLEMENTATION, REVISING, AMENDING, AND INSPECTING (TO BE FILLED IN BY THE CONTRACTOR)

# POLLUTION PREVENTION

FERTILIZERS ARE TO BE APPLIED ONLY IN THE AMOUNTS AS SPECIFIED AND WORKED INTO THE SOIL TO MINIMIZE EXPOSURE TO STORMWATER RUNOFF.

ONSITE REFUELING OPERATIONS ARE TO BE CONDUCTED WITH CARE. ANY INADVERTENT SPILLAGE OF FUEL OR CHEMICALS IS TO BE IMMEDIATELY CLEANED UP, REMOVED FROM THE SITE AND DISPOSED OF IN ACCORDANCE TO STATE AND LOCAL REGULATIONS. MAJOR SPILLS ARE TO BE REPORTED TO THE MPCA 24 HOUR NOTIFICATION NETWORK AT 800 422 0798. ALL VEHICLES ON-SITE ARE TO BE MONITORED FOR LEAKS AND SUBJECT TO ROUTINE PREVENTIVE MAINTENANCE EFFORTS TO REDUCE THE LIKELIHOOD OF LEAKAGE AND OR SPILLS.

PORTABLE SANITARY WASTE FACILITIES ARE TO BE PROVIDED ONSITE AND EMPTIED ON A BI-WEEKLY BASIS.

CONCRETE BATCH TRUCKS WILL NOT BE ALLOWED TO DISCHARGE DRUM AND CHUTE WASHOUT DIRECTLY ON THE GROUND. A PORTABLE WASHOUT RECEPTACLE IS TO BE PROVIDED BY THE CONTRACTOR AT THE LOCATION AS PROVIDED BY THE OWNER.

# FINAL STABILIZATION

FINAL STABILIZATION OCCURS WHEN 70 PERCENT OF THE PERVIOUS AREA IS COVERED WITH UNIFORM, PERMANENT VEGETATION.

ALL TEMPORARY EROSION AND SEDIMENT CONTROL FEATURES ARE TO BE REMOVED AND THE NPDES NOTICE OF TERMINATION IS TO BE PREPARED AND SUBMITTED TO THE MPCA.

TEMPORARY EROSION AND SEDIMENT CONTROL SPECIFICATIONS

# PART I GENERAL

# I.01 SECTION INCLUDES

A. PREVENTION OF SEDIMENTATION OF WATERWAYS, OPEN DRAINAGE WAYS, AND STORM AND SANITARY SEWERS DUE TO CONSTRUCTION ACTIVITIES.

# I.02 REFERENCE STANDARDS

# A. GENERAL PERMIT AUTHORIZATION TO DISCHARGE STORM WATER ASSOCIATED WITH CONSTRUCTION ACTIVITY UNDER

THE NATIONAL POLLUTANT DISCHARGE ELIMINATION SYSTEM. MINNESOTA PERMIT NO: MN RI00001. I.03 PERFORMANCE REQUIREMENTS

# A. COMPLY WITH ALL REQUIREMENTS OF THE MINNESOTA POLLUTION CONTROL AGENCY FOR EROSION AND SEDIMENT

- B. DO NOT BEGIN CLEARING, GRADING, OR OTHER WORK INVOLVING DISTURBANCE OF GROUND SURFACE COVER UNTIL APPLICABLE PERMITS HAVE BEEN OBTAINED; FURNISH ALL DOCUMENTATION REQUIRED TO OBTAIN APPLICABLE
- I. OBTAIN AND PAY FOR PERMITS REQUIRED BY AUTHORITY HAVING JURISDICTION.
- C. TIMING: PUT PREVENTIVE MEASURES IN PLACE PRIOR TO DISTURBANCE OF SURFACE COVER AND BEFORE PRECIPITATION OCCURS.
- D. EROSION OFF SITE: PREVENT EROSION OF SOIL AND DEPOSITION OF SEDIMENT ON OTHER PROPERTIES CAUSED BY WATER LEAVING THE PROJECT SITE DUE TO CONSTRUCTION ACTIVITIES FOR THIS PROJECT.
- I. PREVENT TRACKING OF MUD ONTO PUBLIC ROADS OUTSIDE SITE. 2. PREVENT MUD AND SEDIMENT FROM FLOWING ONTO PAVEMENTS.
- E. SEDIMENTATION OF WATERWAYS OFF SITE: PREVENT SEDIMENTATION OF WATERWAYS OFF THE PROJECT SITE. INCLUDING RIVERS, STREAMS, LAKES, PONDS, OPEN DRAINAGE WAYS, STORM SEWERS, AND SANITARY SEWERS I. IF SEDIMENTATION OCCURS. INSTALL OR CORRECT PREVENTIVE MEASURES IMMEDIATELY AT NO COST TO OWNER; REMOVE DEPOSITED SEDIMENTS; COMPLY WITH REQUIREMENTS OF AUTHORITIES HAVING JURISDICTION
- F. MAINTENANCE: MAINTAIN TEMPORARY PREVENTIVE MEASURES UNTIL PERMANENT MEASURES HAVE BEEN

# PART 2 PRODUCTS

# 2.01 MATERIALS

- A. TEMPORARY SILT FENCE: WOVEN POLYPROPYLENE GEOTEXTILE RESISTANT TO COMMON SOIL CHEMICALS, MILDEW, AND INSECTS; NON-BIODEGRADABLE; IN LONGEST LENGTHS POSSIBLE; FABRIC INCLUDING SEAMS WITH THE FOLLOWING MINIMUM AVERAGE ROLL LENGTHS:
- I. AVERAGE OPENING SIZE: 20 U.S. STD. SIEVE, MAXIMUM, WHEN TESTED IN ACCORDANCE WITH ASTM D4751.
- 2. PERMITTIVITY: 0.05 SEC^-I, MINIMUM, WHEN TESTED IN ACCORDANCE WITH ASTM D4491. 3. ULTRAVIOLET RESISTANCE: RETAINING AT LEAST 70 PERCENT OF TENSILE STRENGTH, WHEN TESTED IN
- ACCORDANCE WITH ASTM D4355/D4355M AFTER 500 HOURS EXPOSURE.
- 4. TENSILE STRENGTH: 100 LB-F, MINIMUM, IN CROSS-MACHINE DIRECTION; 124 LB-F, MINIMUM, IN MACHINE DIRECTION; WHEN TESTED IN ACCORDANCE WITH ASTM D4632.
- 5. ELONGATION: 15 TO 30 PERCENT, WHEN TESTED IN ACCORDANCE WITH ASTM D4632.
- 6. TEAR STRENGTH: 55 LB-F, MINIMUM, WHEN TESTED IN ACCORDANCE WITH ASTM D4533.
- 7. COLOR: MANUFACTURER'S STANDARD, WITH EMBEDMENT AND FASTENER LINES PREPRINTED. 8. SILT FENCE POSTS: ONE OF THE FOLLOWING, MINIMUM 5 FEET LONG:
- a. STEEL U- OR T-SECTION, WITH MINIMUM MASS OF 1.33 LB PER LINEAR FOOT.
- b. SOFTWOOD, 4 BY 4 INCHES IN CROSS SECTION.
- c. HARDWOOD, 2 BY 2 INCHES IN CROSS SECTION. B. TEMPORARY SEDIMENT LOGS: FILTER LOGS SHALL CONSIST OF TYPE WOOD FIBER BIOROLLS AND THE
- REQUIREMENTS OF MNDOT SPEC. 3897. I. SHALL BE ONE OF THE FOLLOWING.
- SHALL BE SILTSOXX PERIMETER CONTROL BY FILTREXX, INC., OR EQUAL.
- C. TEMPORARY SEDIMENT FILTER.
- I. SHALL BE ONE OF THE FOLLOWING. a. DROP-IN SEDIMENT FILTER UNIT THAT INSERTS INTO THE INLET.
- I) SHALL BE FLEXSTORM PURE: PERMANENT INLET FILTER BY ADS, INC., OR EQUAL.
- (a) PROVIDE CURB OPENING PROTECTION FOR EXISTING INLETS WITH CURB OPENINGS.
- D. TEMPORARY ROCK CONSTRUCTION ENTRANCE. I. ROCK SHALL BE CLEAN I TO 2 INCH WASHED ROCK.
- E. TEMPORARY SLOPE EROSION PROTECTION.
- I. SHALL BE ONE OF THE FOLLOWING.
- I) SHALL CONSIST OF A UNIFORM WEB OF INTERLOCKING STRAW OR WOOD FIBERS SANDWICHED BETWEEN AN ATTACHED TOP AND BOTTOM LAYER OF NET BACKING.

HAVING A SPAN WIDTH OF I INCH AND A LENGTH OF 8 INCHES OR MORE FROM TOP TO BOTTOM AFTER

- 2) THE NETTING SHALL BE BIODEGRADABLE CONTAINING SUFFICIENT UV STABILIZATION FOR BREAKDOWN TO
- OCCUR WITHIN A NORMAL GROWING SEASON. 3) STAPLES USED TO ANCHOR THE BLANKETS SHALL BE U-SHAPED, II GAUGE OR HEAVIER STEEL WIRE
- 4) THE EROSION CONTROL BLANKETS ACCEPTABLE FOR USE ON THIS PROJECT INCLUDE: (a) GEO-SYNTHETICS, INC., - LANDLOK 52.
- (b) NORTH AMERICAN GREEN SI50. (c)OR EQUAL
- b. BONDED FIBER MATRIX I) THE FIBERS SHALL BE COMPOSED OF 100% WOOD OR WOOD BY-PRODUCTS. A MINIMUM OF 25% OF THE FIBERS SHALL AVERAGE IO.16 MM (0.4 INCHES) IN LENGTH AND 50% OR MORE SHALL BE RETAINED ON A CLARK FIBER CLASSIFIER 24 MESH SCREEN. FIBERS SHALL BE COLORED WITH A WATER SOLUBLE.
- NON-TOXIC DYE, TO AID IN UNIFORM APPLICATION OVER THE SITE. 2) THE BINDER SHALL BE A HYDRO COLLOID BASED (GUAR GUM) WITH ADDED SLOW-RELEASE AND
- AGRICULTURAL BASED FERTILIZERS. THE BINDER SHALL NOT DISSOLVE OR DISPERSE UPON REWETTING. 3) THE BFM SLURRY SHALL DRY TO FORM A CRUST APPROXIMATELY 3-6 MM (1/8 TO 1/4 INCHES) THICK ADHERING TO THE SOIL SURFACE.
- 4) THE MOISTURE CONTENT OF THE MATRIX SHALL BE 12% +/- 3% BY WEIGHT.
- 5) THE MATRIX SHALL CONSIST OF MATERIALS THAT ARE 100% BIODEGRADABLE AND 100% BENEFICIAL TO PLANT LIFE.
- 6) THE MATRIX SHALL PROVIDE 100% CONTINUOUS COVERAGE AND SHALL HAVE NO HOLES GREATER THAN
- IMM IN SIZE. 7) THE HYDRATED MIXTURE DENSITY SHALL BE APPROXIMATED BY A SLUMP TEST PRIOR TO APPLICATION. 8) THE BFM MULCH: WATER RATIO SHALL BE AS MANUFACTURER RECOMMENDATIONS. THE MINIMUM BFM MULCH TO WATER RATIO IS 50LBS BFM MULCH AND 100 GALLONS WATER. THE WATER RATE WILL VARY

BETWEEN 100 GALLONS AND 125 GALLONS PER 50LBS, DEPENDING ON WHICH OF THE PRODUCTS IS

- 9) THE BONDED FIBER MATRIX MULCH PRODUCTS ACCEPTABLE FOR USE ON THIS PROJECT INCLUDE. (a) ECOAEGIS - MANUFACTURED BY CANFOR.
- (b) SOIL GUARD MANUFACTURED BY MAT, INC.
- (c) CONWED 3000 MANUFACTURED BY CONWED FIBERS, INC.
- F. TEMPORARY PUMPED SEDIMENT CONTROL DEVICE.
- I. NON-WOVEN GEOTEXTILE FABRIC SEWN INTO A BAG USING A DOUBLE NEEDLE MACHINE AND HIGH STRENGTH
- a. SEAMS SHALL HAVE AN AVERAGE WIDTH STRENGTH OF 60LB/INCH AS PER ASTM D4883 AND MEET OR EXCEED THE FOLLOWING.
- I) GRAB TENSILE OF 205 LBS AS PER ASTM D 4632. 2) PUNCTURE OF 110 LBS AS PER ASTM D 4833.
- 3) FLOW RATE OF 95 GAL/MIN/SF AS PER ASTM D 4491.
- 4) PERMITTIVITY OF 1.5 SEC-I AS PER ASTM D 4491.
- 5) MULLEN BURST STRENGTH OF 350 PSI AS PER ASTM D 3786. 6) AOS% OF 80% US SIEVE AS PER ASTM D 4751.
- 2. SPOUT LARGE ENOUGH TO ACCOMMODATE A 4 INCH DISCHARGE HOSE WITH STRAP TO TIE UNIT CLOSED. 3. SHALL BE ONE OF THE FOLLOWING. a. DIRTBAG.
- I) ACF ENVIRONMENTAL, INC., 2831 CARDWELL ROAD, RICHMOND, VIRGINIA 23234, 800-448-3636. b. DANDY DEWATERING BAG.
- I) DANDY PRODUCTS, INC., P.O. BOX 1980, WESTERVILLE, OHIO 43086, 800-591-2284. c. OR EQUAL

# PART 3 EXECUTION

- 3.01 PREPARATION
- A. SCHEDULE WORK SO THAT SOIL SURFACES ARE LEFT EXPOSED FOR THE MINIMUM AMOUNT OF TIME. B. THE CONSTRUCTION SITE OPERATOR SHALL FOLLOW ALL REQUIREMENTS OF THE MINNESOTA STORMWATER PERMIT
- NO. MN R100001.
- C. THE CONTRACTOR SHALL COMPLETE AND SIGN THE NOTICE OF INTENT, OBTAIN THE OWNER'S SIGNATURE, AND SUBMIT TO THE MPCA. I. PROVIDE A SIGNED COPY TO THE OWNER.

- 3.02 SCOPE OF PREVENTIVE MEASURES
- A. NATURAL VEGETATION SHALL BE RETAINED WHENEVER FEASIBLE.
- B. LAND GRADING AND EXCAVATING SHALL BE KEPT AT A MINIMUM TO REDUCE THE POSSIBILITY OF CREATING RUNOFF AND EROSION PROBLEMS WHICH REQUIRE EXTENSIVE CONTROL MEASURES.
- C. LAND EXPOSURE SHALL BE MINIMIZED IN TERMS OF AREA AND TIME.
- D TEMPORARY SILT FENCE
- I. PROVIDE ALONG THE DOWNGRADE PERIMETER EDGE OF SOIL STOCKPILES.
- 3. PROVIDE AT ADDITIONAL LOCATIONS AS NECESSARY TO MEET THE REQUIREMENTS UNDER SECTION 1.03 OF THIS SPECIFICATION.
- E. TEMPORARY SEDIMENT LOGS.
- I. PROVIDE AT LOCATIONS SHOWN ON THE PLANS.

2. PROVIDE AT LOCATIONS SHOWN ON THE PLANS.

- 2. PROVIDE AT ADDITIONAL LOCATIONS AS NECESSARY TO MEET THE REQUIREMENTS UNDER SECTION 1.03 OF THIS SPECIFICATION.
- F. TEMPORARY SEDIMENT FILTERS.
- I. PLACE IMMEDIATELY BEFORE LAND IS DISTURBED ADJACENT TO EXISTING STORM SEWER MANHOLES WITH OPEN GRATES.
- 2. PLACE IMMEDIATELY AFTER NEW STORM SEWER MANHOLES WITH OPEN GRATES ARE INSTALLED AND IMMEDIATELY BEFORE LAND IS DISTURBED ADJACENT TO EXISTING STORM SEWER MANHOLES WITH OPEN GRATES.

I. PROVIDE BEYOND NONAGGREGATE DISTURBED AREAS PRIOR TO THE CONSTRUCTION

- G. TEMPORARY ROCK CONSTRUCTION ENTRANCE.
- VEHICLES ENTERING PUBLIC PAVED ROADWAYS. H. TEMPORARY CONCRETE WASHOUT
- I. PROVIDE AT A DEFINED AREA ON SITE OR TO AN AREA DESIGNATED FOR CEMENT
- 2. SHALL BE SUFFICIENT IN SIZE TO CONTAIN THE WASH WATER AND RESIDUAL CEMENT I. TEMPORARY PUMPED SEDIMENT CONTROL DEVICE. I. DEVICE SHALL BE USED TO CONTROL SEDIMENT DISCHARGE IN ANY DEWATERING OR

# 3.03 INSTALLATION

A. TEMPORARY ROCK CONSTRUCTION ENTRANCE.

PUMPED WATER APPLICATION.

- I. THE ROCK AREA SHALL BE A MINIMUM OF 6 INCHES DEEP, EXTEND THE FULL WIDTH OF THE EGRESS AREA AND SHALL BE AT LEAST 50FT LONG, HOWEVER, LONGER
- ENTRANCES MAY BE REQUIRED TO ADEQUATELY CLEAN THE TIRES. 2. GEOTEXTILE FABRIC MAY BE USED TO PREVENT MIGRATION OF MUD FROM THE UNDERLYING SOIL INTO THE ROCK.
- B. TEMPORARY SILT FENCES: I. STORE AND HANDLE FABRIC IN ACCORDANCE WITH ASTM D4873.
- 2. USE NOMINAL 30 INCH HIGH BARRIERS, MINIMUM 60 INCH LONG POSTS SPACED AT 6 FEET MAXIMUM SPACING. 3. EMBED BOTTOM OF FABRIC IN A TRENCH ON THE UPSLOPE SIDE OF FENCE, WITH 6
- INCHES OF FABRIC LAID FLAT ON BOTTOM OF TRENCH FACING UPSLOPE; BACKFILL TRENCH AND COMPACT
- 4. MINIMUM POST EMBEDMENT.
- a. STEEL POST = 24 INCHES, MINIMUM b. WOOD POST = 18 INCHES, MINIMUM.
- 5. DO NOT SPLICE FABRIC WIDTH; MINIMIZE SPLICES IN FABRIC LENGTH; SPLICE AT POST ONLY, OVERLAPPING AT LEAST 18 INCHES, WITH EXTRA POST.
- 6. FASTEN FABRIC TO WOOD POSTS USING ONE OF THE FOLLOWING: a. FOUR NAILS PER POST WITH 3/4 INCH DIAMETER FLAT OR BUTTON HEAD, I INCH
- LONG, AND 14 GAGE, 0.083 INCH SHANK DIAMETER. b. FIVE STAPLES PER POST WITH AT LEAST 17 GAGE, 0.0453 INCH WIRE, 3/4 INCH CROWN WIDTH AND 1/2 INCH LONG LEGS.
- 7. FASTEN FABRIC TO STEEL POSTS USING WIRE, NYLON CORD, OR INTEGRAL POCKETS. C. TEMPORARY SEDIMENT LOGS:
- I. PERIMETER CONTROL SHOULD BE INSTALLED PARALLEL TO THE BASE OF THE SLOPE OR OTHER DISTURBED AREA. 2. STAKES SHOULD BE INSTALLED THROUGH THE MIDDLE OF THE PERIMETER CONTROL
- ON 10 FT CENTERS, USING 2 IN BY 2 IN BY 3 FT WOODEN STAKES. IN THE EVENT STAKING IS NOT POSSIBLE, I.E., WHEN PERIMETER CONTROL IS USED ON PAVEMENT, HEAVY CONCRETE BLOCKS SHALL BE USED BEHIND THE PERIMETER CONTROL TO HELP STABILIZE DURING RAIN EVENTS.
- D. TEMPORARY SEDIMENT FILTERS.
- DROP-IN SEDIMENT TRAP. a. PLACE AS RECOMMENDED BY THE MANUFACTURER.
- E. TEMPORARY PUMPED SEDIMENT CONTROL DEVICE.
- I. INSTALL AS PER MANUFACTURER'S RECOMMENDATIONS. F. TEMPORARY SLOPE EROSION PROTECTION.

SLOPE EROSION PROTECTION.

- I. PLACE AT ANY AND ALL FINISH SLOPES THAT ARE STEEPER THAN IOH: IV. 2. SEED AND FERTILIZE PER SPECIFICATION 32 9219 PRIOR TO INSTALLING TEMPORARY
- 3. BONDED FIBER MATRIX. a. INSTALL THE BFM AS PER THE MANUFACTURER'S INSTRUCTIONS WITH THE FOLLOWING MINIMUM GUIDELINES.
- I) THE BFM SHALL BE APPLIED WITH HYDRAULIC SPRAY EQUIPMENT BY A MANUFACTURER'S CERTIFIED APPLICATOR. 2) APPLICATION SHALL BE DONE AT LEAST 24 HOURS IN ADVANCE OF PROJECTED
- RAINFALL TO ALLOW THE BFM MULCH ADEQUATE TIME TO DRY. 3) THE BFM MULCH SHALL BE APPLIED IN TWO STAGES (ONE-HALF RATE) WITH AMPLE TIME TO DEWATER THE FIRST APPLICATION.
- 4) THE BFM MULCH SHALL BE APPLIED FROM AT LEAST TWO ALTERNATE DIRECTIONS, PREFERABLY 90 DEGREES APART, IF POSSIBLE, TO ENSURE ALL SOIL FACES ARE COVERED. 5) THE INSTALLATION RATE OF THE BFM MULCH SHALL BE 3500 LBS PER ACRE,
- MINIMUM AND 100% COVERAGE. 4. EROSION CONTROL BLANKET.

# a. INSTALL AS PER MANUFACTURER'S RECOMMENDATIONS. 3.04 MAINTENANCE

- A. INSPECT PREVENTIVE MEASURES WEEKLY, WITHIN 24 HOURS AFTER THE END OF ANY STORM THAT PRODUCES 0.5 INCHES OR MORE RAINFALL AT THE PROJECT SITE, AND DAILY DURING PROLONGED RAINFALL.
- B. REPAIR DEFICIENCIES IMMEDIATELY.

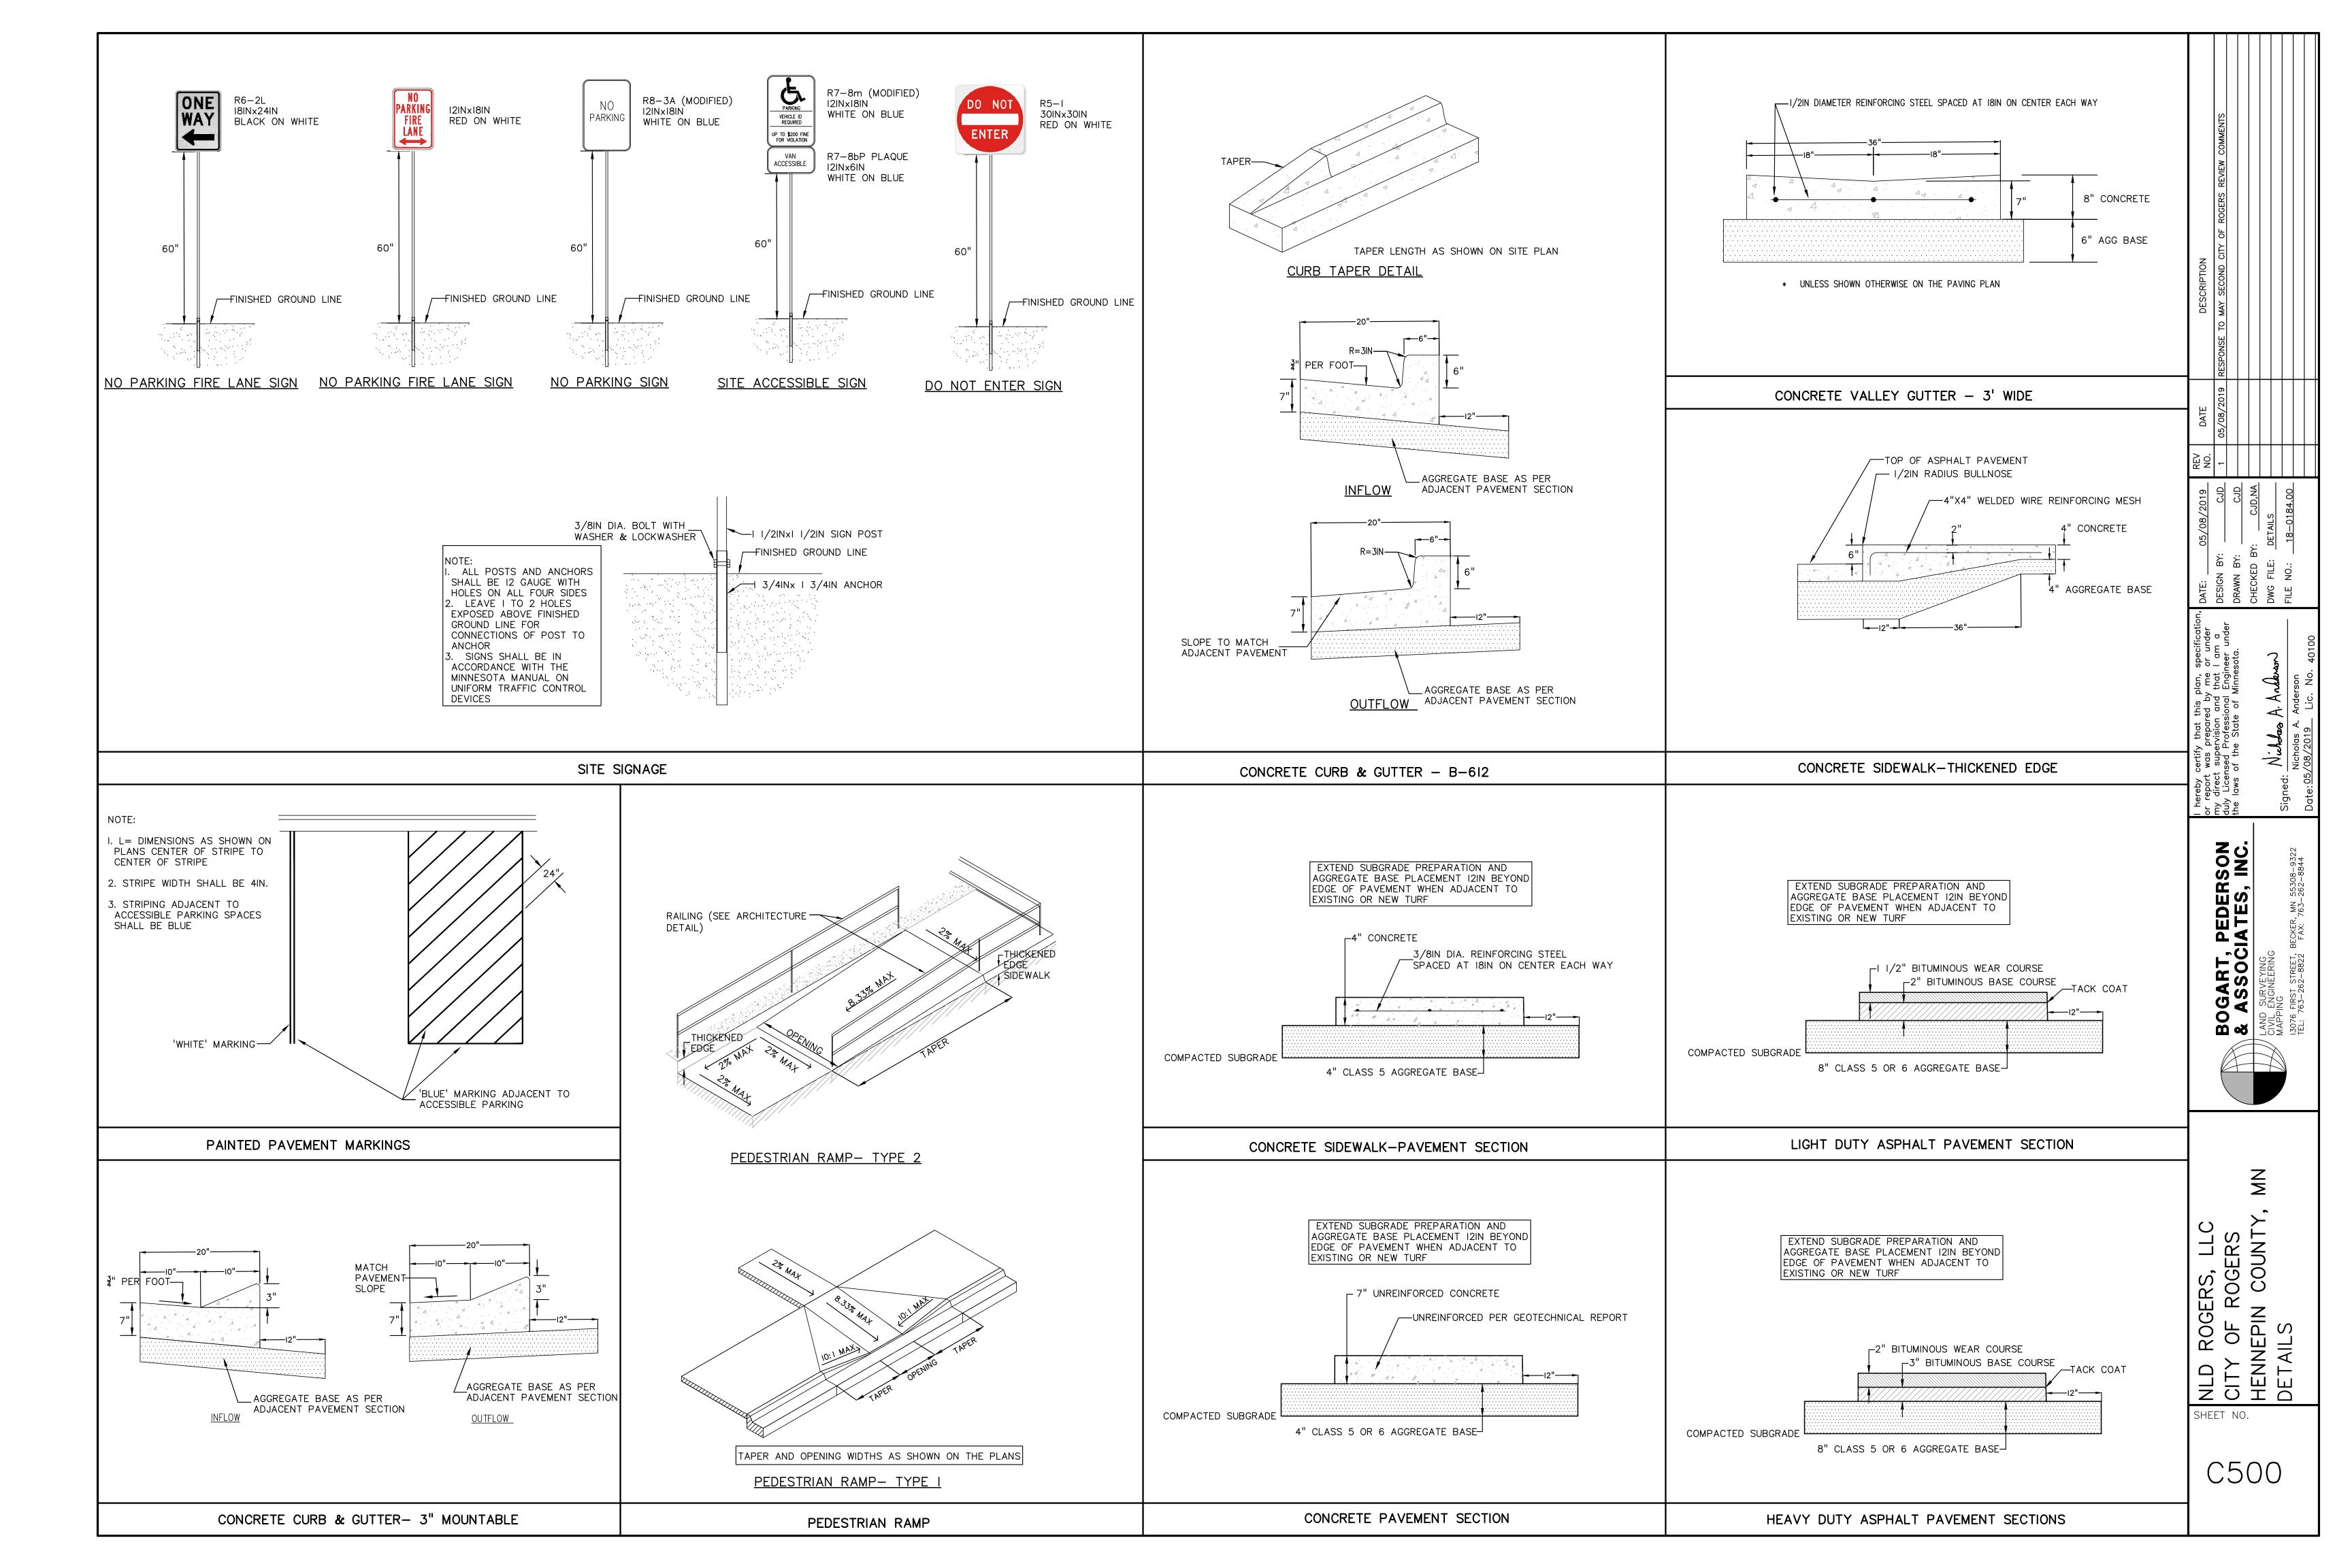

D. TEMPORARY CONSTRUCTION EXIT.

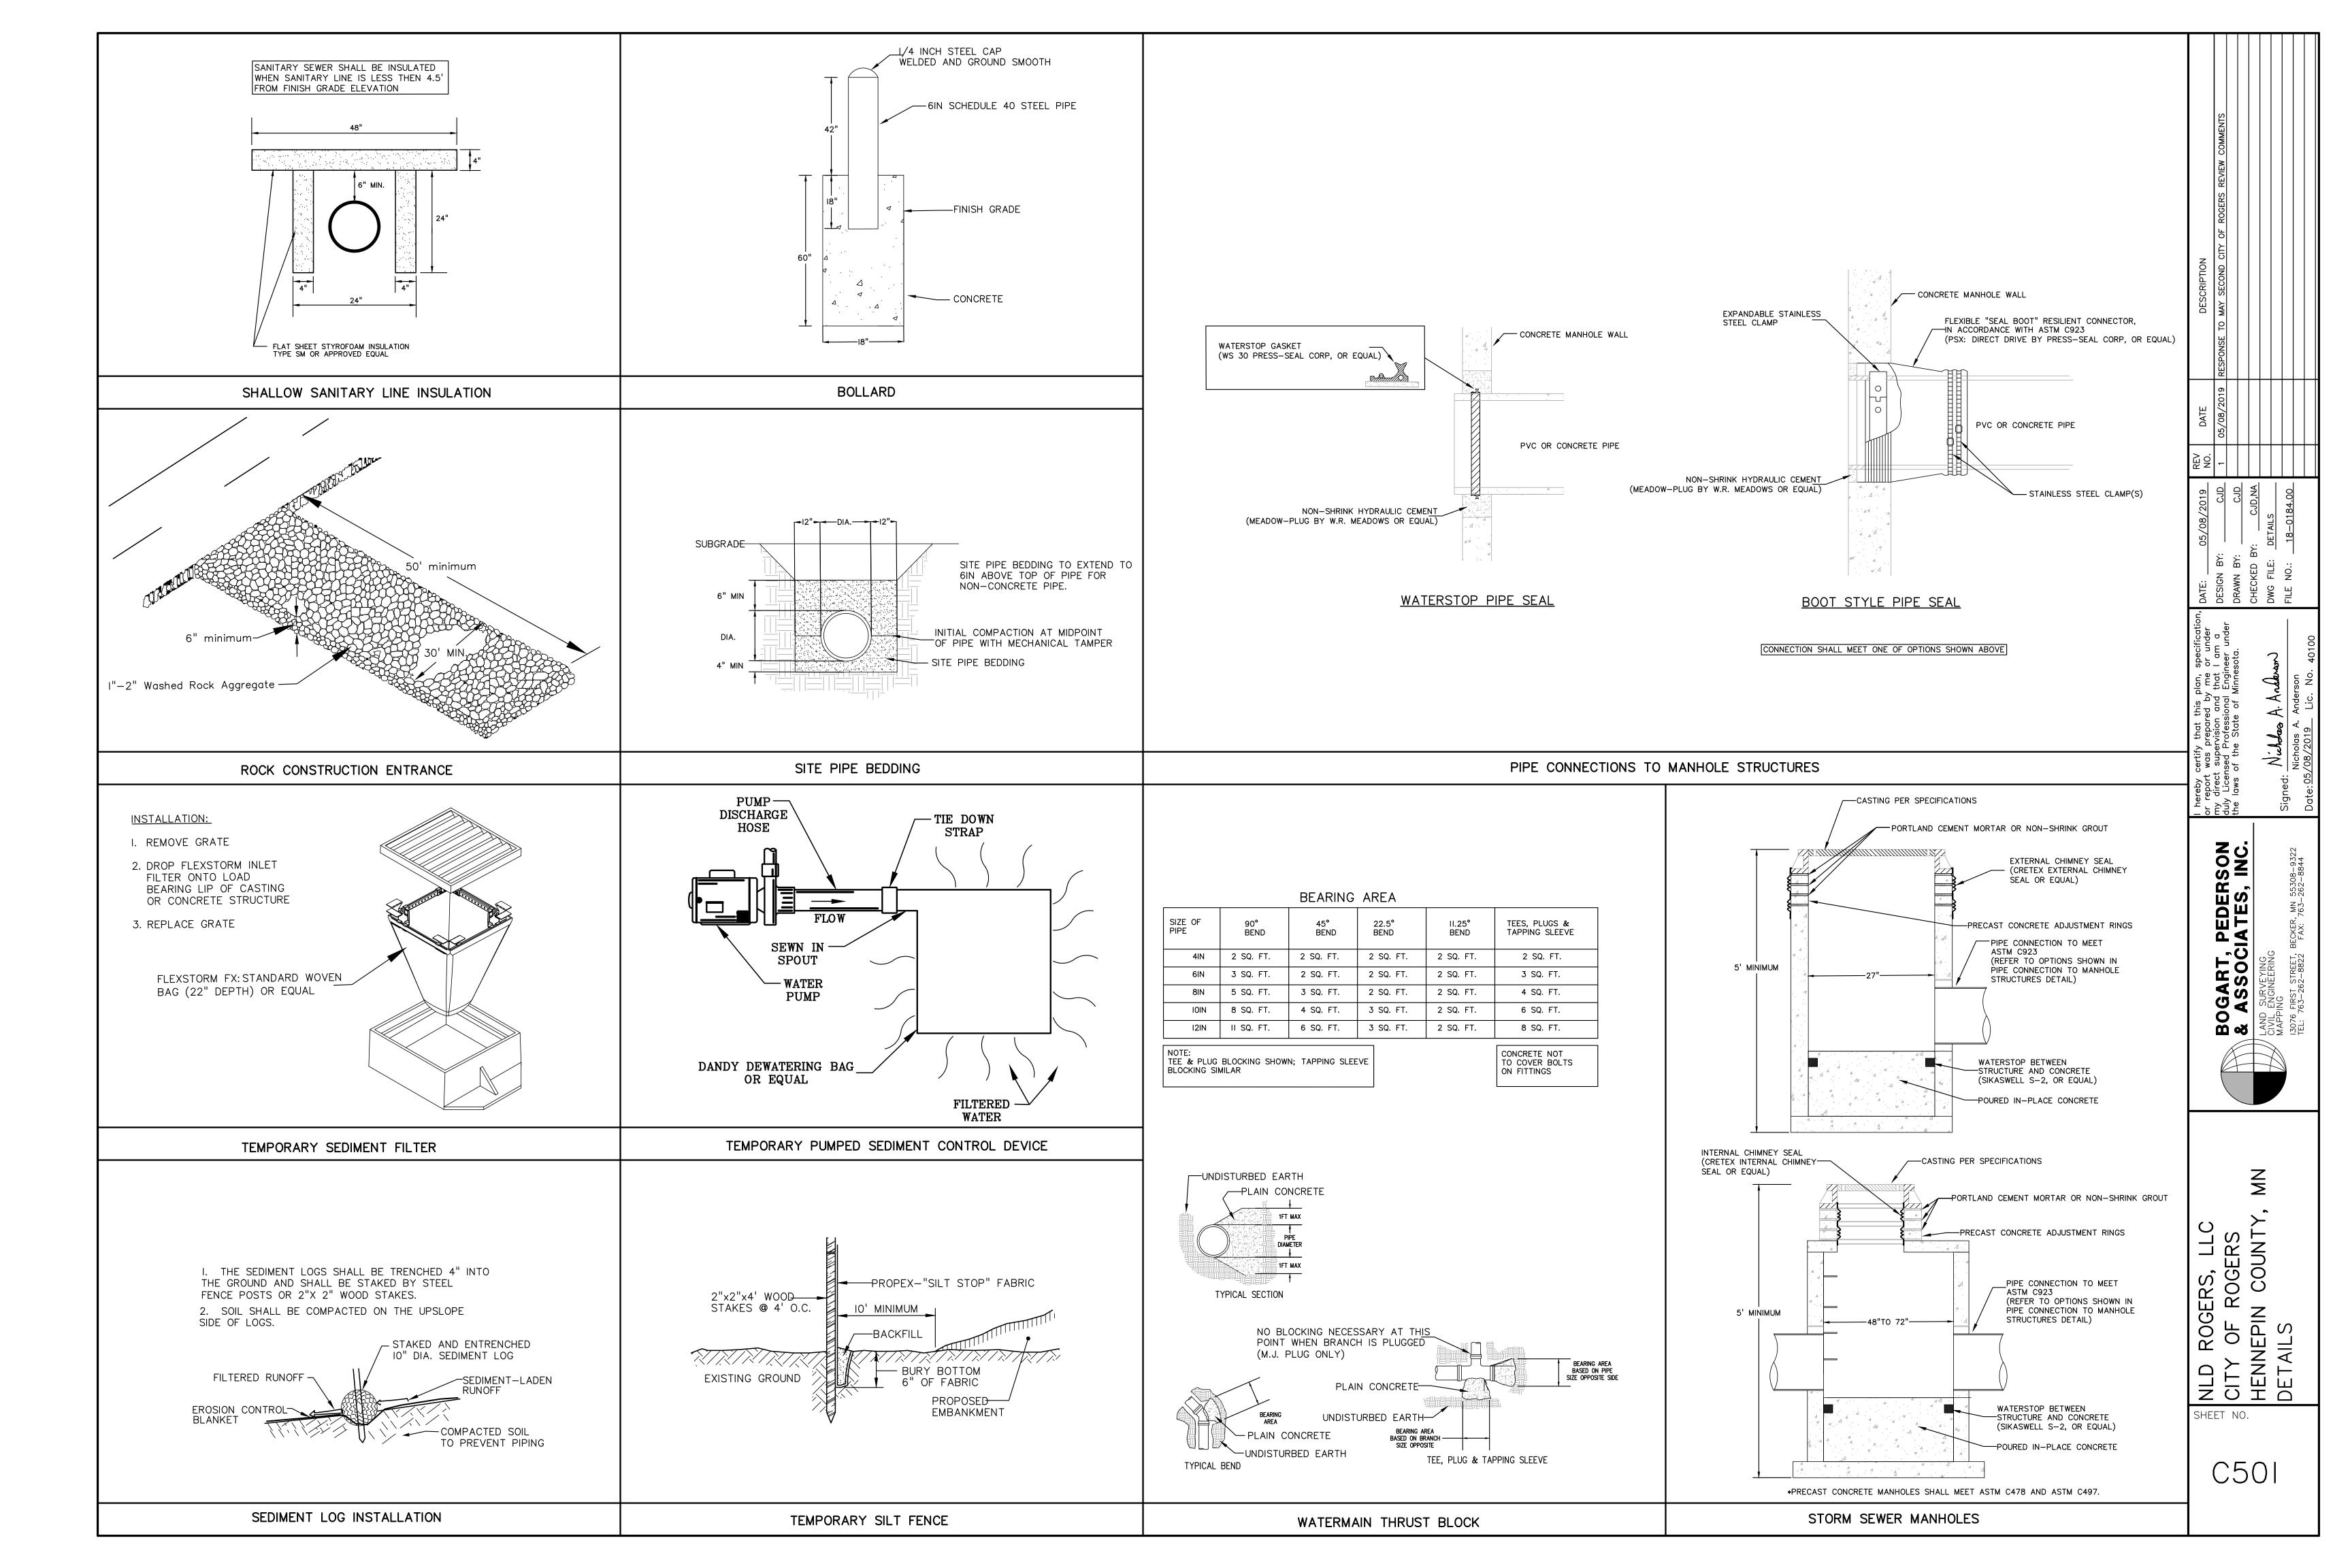

- C. TEMPORARY SILT FENCES:
- I. PROMPTLY REPLACE FABRIC THAT DETERIORATES UNLESS NEED FOR FENCE HAS PASSED.
- 2. REMOVE SILT DEPOSITS THAT EXCEED ONE-THIRD OF THE HEIGHT OF THE FENCE. 3. REPAIR FENCES THAT ARE UNDERCUT BY RUNOFF OR OTHERWISE DAMAGED, WHETHER BY RUNOFF OR OTHER CAUSES.
- I. PERIODIC ADDITION OF ROCK, OR REMOVAL AND REPLACEMENT OF PAD SHALL BE PROVIDED AS VOIDS BECOME FILLED WITH SOIL. E. TEMPORARY PUMPED SEDIMENT CONTROL DEVICE.
- REPLACE THE UNIT WHEN 1/2 FULL OF SEDIMENT OR WHEN SEDIMENT HAS REDUCED THE FLOW RATE OF THE PUMP DISCHARGE TO AN IMPRACTICAL RATE. F. PLACE SEDIMENT IN APPROPRIATE LOCATIONS ON SITE; DO NOT REMOVE FROM SITE.
- 3.05 CLEAN UP A. REMOVE TEMPORARY MEASURE AFTER PERMANENT VEGETATION HAS BEEN ESTABLISHED. B. WHERE REMOVAL OF TEMPORARY MEASURES WOULD LEAVE EXPOSED SOIL, SHAPE
- SURFACE TO AN ACCEPTABLE GRADE AND FINISH TO MATCH ADJACENT GROUND SURFACES. END OF SECTION

2. STORMTECH COMPACTION REQUIREMENTS ARE MET FOR 'A' LOCATION MATERIALS WHEN PLACED AND COMPACTED IN 6" (150 mm) (MAX) LIFTS USING TWO FULL COVERAGES WITH A VIBRATORY COMPACTOR. WHERE INFILTRATION SURFACES MAY BE COMPROMISED BY COMPACTION, FOR STANDARD DESIGN LOAD CONDITIONS, A FLAT SURFACE MAY BE ACHIEVED BY RAKING OR DRAGGING WITHOUT COMPACTION EQUIPMENT. FOR SPECIAL LOAD DESIGNS, CONTACT STORMTECH FOR COMPACTION REQUIREMENTS.

# NOTES:

- SC-740 CHAMBERS SHALL CONFORM TO THE REQUIREMENTS OF ASTM F2418 "STANDARD SPECIFICATION FOR POLYPROPYLENE (PP) CORRUGATED WALL STORMWATER COLLECTION CHAMBERS", OR ASTM F2922 "STANDARD SPECIFICATION FOR POLYETHYLENE (PE) CORRUGATED WALL STORMWATER COLLECTION CHAMBERS".
- 2. SC-740 CHAMBERS SHALL BE DESIGNED IN ACCORDANCE WITH ASTM F2787 "STANDARD PRACTICE FOR STRUCTURAL DESIGN OF THERMOPLASTIC CORRUGATED WALL STORMWATER COLLECTION
- 3. "ACCEPTABLE FILL MATERIALS" TABLE ABOVE PROVIDES MATERIAL LOCATIONS, DESCRIPTIONS, GRADATIONS, AND COMPACTION REQUIREMENTS FOR FOUNDATION, EMBEDMENT, AND FILL
- 4. THE SITE DESIGN ENGINEER IS RESPONSIBLE FOR ASSESSING THE BEARING RESISTANCE (ALLOWABLE BEARING CAPACITY) OF THE SUBGRADE SOILS AND THE DEPTH OF FOUNDATION STONE WITH CONSIDERATION FOR THE RANGE OF EXPECTED SOIL MOISTURE CONDITIONS.
- 5. PERIMETER STONE MUST BE EXTENDED HORIZONTALLY TO THE EXCAVATION WALL FOR BOTH VERTICAL AND SLOPED EXCAVATION WALLS.
- 6. ONCE LAYER 'C' IS PLACED, ANY SOIL/MATERIAL CAN BE PLACED IN LAYER 'D' UP TO THE FINISHED GRADE. MOST PAVEMENT SUBBASE SOILS CAN BE USED TO REPLACE THE MATERIAL REQUIREMENTS OF LAYER 'C' OR 'D' AT THE SITE DESIGN ENGINEER'S DISCRETION.

Agenda Item: No. 5.3

**Subject:** Conduct Public Hearing to Review Requests from Daniel Scharber, Located at

12500 Scharber Street

Prepared

Amy Patnode, Associate Planner

By:

# Overview / Background

Daniel Scharber (Applicant) submitted a variance application to be presented on the April 16, 2019 Planning Commission agenda for his property at 12500 Scharber Street (Subject Property). The request was to locate a detached accessory structure in the side yard, and to exceed the allowable area of the detached accessory structure by 1,472 square feet, for a total of 2,000 square feet.

Staff opened the public hearing and took comment from the public on April 16, 2019. The Commission then closed the public hearing and considered the request. The Planning Commission recommended approval of the variance to allow the structure to be located in the side yard. Denial was recommended for the 2,000 square foot accessory structure. The Planning Commissioners explained the reason for denial as too excessive of a size and not in harmony with the general neighborhood. The general feedback from the Commission would reevaluate a new request for a smaller accessory structure size of 2,000 square feet, but bigger than the allowable 528 square feet due to the lot size of the Subject Property.

The Applicant withdrew his application before the April 23, 2019 City Council meeting with plans to resubmit an application with a smaller structure size to the Planning Commission. The new variance request has been received by City Staff. The Applicant is asking to located the detached accessory structure in the size yard, and to exceed the allowable area of the detached accessory structure by 480 square feet, for a total of 1,008 square feet.

# **Primary Issues to Consider**

- 1. Land Use and Zoning
- 2. Accessory Structure Standards
- 3. Site Plan
- 4. Criteria for Granting Approval

### **Analysis of Primary Issues**

1. Land Use and Zoning

The Subject Property is a single-family residence, located on 5.11 acres in the Scharber 5<sup>th</sup> Addition. The property is zoned Single Family Residential (R-2). The 2030 Comprehensive Plan established the underlying land use designation as Single Family Residential and the draft 2040 Comprehensive Plan establishes the property as Low Density Residential. Detached accessory structures are allowed in the R-2 zoning district.

# The type of use is allowed by both the Comprehensive Plan and Zoning.

# 2. Accessory Structure Standards

Unlike the Rural Estate 2-Acre (RE-2) and Rural Estate 5-Acre (RE-5) districts, the Single-Family Residential district has a maximum *attached* garage size and *detached* garage size. Properties within the R-2 zoning district are allowed a maximum area of 950 square feet for their attached garage and a maximum of 528 square feet for a detached accessory structure [§125-323 (c)(10)]. Aerial photos indicate the attached garage is larger and non-conforming to city code.

Unlike rural residential standards, detached accessory structures in the R-2 district cannot be located anywhere besides the rear yard, completely behind the primary structure [125-323(c)(11)]. The proposed location for the detached structure is in-line with the front yard setback of the existing house.

### 3. Site Plan

The Subject Property is located on a dead-end street in an older, Main Street neighborhood. The home was constructed in 1973 and at the same time as Scharbers 2<sup>nd</sup> addition was platted and recorded. Throughout the years the original homestead – which is now the Subject Property, sold land for development. Scharbers 5<sup>th</sup> addition was platted in 2016 and resulted in dividing approximately 7.37 acres to become the Subject Property (5.11 acres) and two Outlots. Outlot C, which is across Scharber Street from the Subject Property is 2.1 acres and Outlot B is 0.16 acres. All properties within the Scharbers 5<sup>th</sup> Addition has a watermain easement that continues from Scharber Street into Outlot B and C, and runs along the south property line of the Subject Property. Outlots B and C were split off to be used for future development, with plans of Outlot B becoming a cul-de-sac.

### Location

Taking into consideration the size of the requested detached accessory structure placement of the structure is limited on the Subject Property due to a wetland in the rear yard and wooded land to the south and east of the house. Wooded areas are not usually seen as a hardship for a variance request. A creek runs through the yard in multiple locations which makes locating the structure in the backyard difficult in regards to access.

South Pointe Addition, the neighborhood to the south of the Subject Property, abuts its rear yards with the Subject Properties side yard and is separated by trees and a wetland. The southern portion of Outlot C will have direct view of the proposed structure, but is currently vacant, wooded land.

### <u>Size</u>

The structure is proposed to be used for recreational vehicles and other non-daily vehicles. The detached accessory structure is proposed to be approximately 1,000 square feet in size, which is less than double the size than what is allowed. The property itself is bigger than a typical R-2 property with most R-2 properties ranging from 13,000 square feet to 16,000. This property is approximately 12 times larger than a typical single-family lot, excluding the wetlands on the property.

Staff is concerned about access to the detached structure and will prohibit any installation of a second driveway. City code Section 125-330 limits the number of driveways servicing a residential lot to one. The Applicant cannot improve the area between the public right-of-way and the detached structure; that area must remain as grass.

## 4. Criteria for Granting Variances

The Planning Commission shall make findings of fact that the proposed variance is pursuant, but not limited to the following considerations [§125-58(a)]:

- (1) Variances shall only be permitted when they are in harmony with the general purpose and intent of city code and consistent with the comprehensive plan.
- (2) Variances may only be permitted when the applicant establishes that there are non-economic practical difficulties in complying with the zoning ordinance, meaning the property owner proposes to use the lot or parcel in a reasonable manner not permitted by the zoning code.
- (3) The plight of the property owner must be due to circumstances that are unique to the lot or parcel and is not created by the property owner.
- (4) The variances must not alter the essential character of the locality including all zoning district and overlay district provisions.

The requests are dealt with on its own merits. The Planning Commission should consider if the requests meet the variance criteria listed above. The following should be considered with determining the request.

Location: The creeks, wetland, and topography of the property is not created by the property owner. This establishes the side yard as a reasonable consideration to allow a detached accessory structure in that location as long as front and side yard setbacks are met and shall not be located in front of the existing house.

*Size*: The Applicant has reduced the shed size and is intending to construct a shed which would be in harmony with the general neighborhood.

Staff proposes approval of the variance to allow a detached accessory structure be located in the side yard and is recommending approval of the variance for the excessive size of the proposed structure.

### **Staff Recommendation**

City Staff proposes the following action by the Planning Commission:

Motion to recommend approval of the variance to locate the detached accessory structure within the side yard, located at 12500 Scharber Street, with the following conditions:

- 1. The detached accessory structure shall be constructed at the location indicated on the site plan.
- 2. The detached accessory structure shall not be constructed in front of the house.
- 3. There shall be no additional driveway installed; only one driveway shall service the Subject Property.

Motion to recommend approval of the variance to construct a 1,008 square foot detached accessory structure, located at 12500 Scharber Street, subject to the following conditions:

- 1. Building must be conforming to all other building and zoning code requirements, exempt the size.
- 2. A building permit must be applied for.
- 3. Shingles and vinyl siding will need to be used as the exterior finish.

#### Estimated Total Price: \$12492.68\*

\*Today's estimated price, future pricing may go up or down. Tax, labor, and delivery not included. Price does not reflect mail-in rebates.

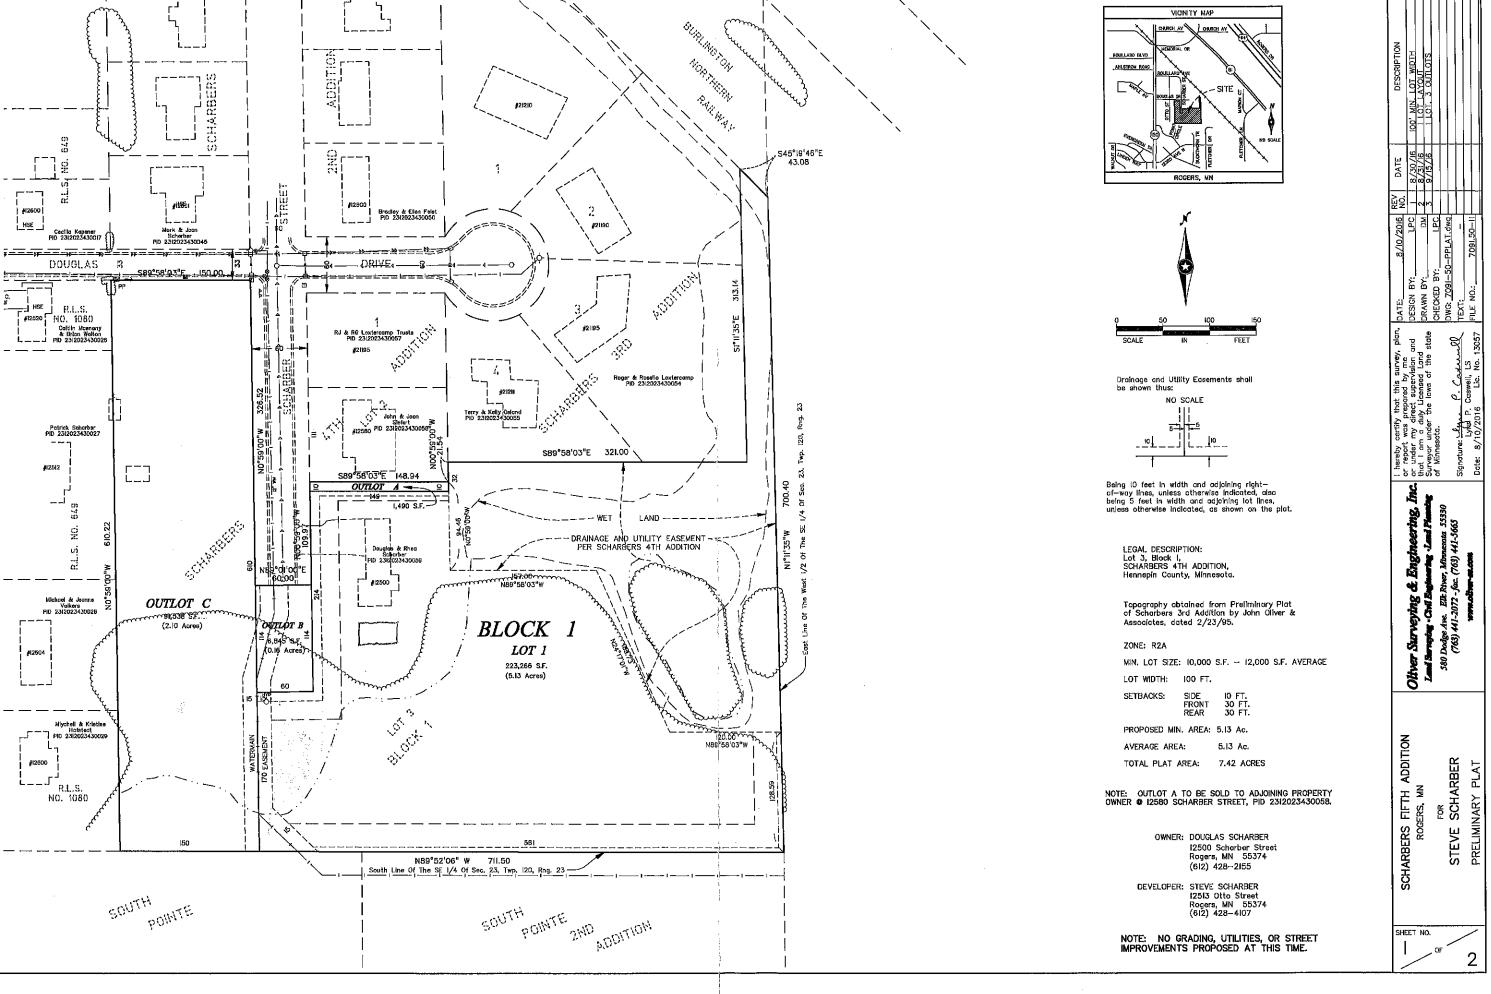

#### How to purchase at the store

- 1. Take this packet to any Menards store.
- 2. Have a building materials team member enter the design number into the Garage Estimator Search Saved Designs page.
- Apply the design to System V to create the material list.
- 4. Take the purchase documents to the register and pay.

## How to recall and purchase a saved design at home

- 1. Go to Menards.com.
- Select the Garage Estimator from the Project Center.
- 3. Select Search Saved Designs.
- 4. Log into your account.
- Select the saved design to load back into the estimator.
- 6. Add your garage to the cart and purchase.

Floor type (concrete, dirt, gravel) is NOT included in estimated price. The floor type is used in the calculation of materials needed. Labor, foundation, steel beams, paint, electrical, heating, plumbing, and delivery are also NOT included in estimated price. This is an estimate. It is only for general price information. This is not an offer and there can be no legally binding contract between the parties based on this estimate. The prices stated herein are subject to change depending upon the market conditions. The prices stated on this estimate are not firm for any time period unless specifically written otherwise on this form. The availability of materials is subject to inventory conditions.

#### Scharber Narrative - 12500 Scharber St.

1. Describe how the request is in harmony with the general purpose and intent of zoning for the property.

The property is zoned R-2, Single Family District. The purpose of the R-2 District is to provide for a continuation of residential uses within existing developed areas of the City as stated in Sec. 125-194(a) of the Zoning Ordinance.

The existing principal use of the property is a single family detached residence, which is a permitted use in accordance with Section 125-194(b)(10) of the Zoning Ordinance. Sec. 125-194(c)(3) of the Zoning Ordinance allows garages as an accessory use. Section 125-1 of the Zoning Ordinance defines an accessory use as "a use incidental or subordinate to the principal use of the same land". There is an existing three stall private garage attached to the single family detached dwelling. proposed detached private garage will be used for off-season parking/storage of passenger vehicles and recreational vehicles owned and used by the occupants of the single family detached dwelling. Being able to store off season vehicles in the detached structure will free up the attached garage stalls for daily vehicle use. The use of the detached private garage for off-street parking is an incidental activity to the residential use of the single family detached dwelling upon the property consistent with the purpose of the allowed uses within the R-2 District.

Accessory structures for properties zoned R-2 District are regulated by Section 125-323(c) of the Zoning Ordinance. Accessory structures are regulated for the purpose of ensuring that their use remains secondary to the principal use of property, and in terms of allowed area, that the mass of the accessory structure is appropriate for the property upon which it is constructed. Section 125-323(c)(1) of the Zoning Ordinance allows construction of one detached accessory building upon a lot. Section 125-323(c)(8) of the Zoning Ordinance further establishes a maximum gross floor area of 950 square feet for a detached private garage used for storage of passenger automobiles, such as proposed to be constructed upon the property. Although the gross floor area of the proposed detached private garage exceeds the maximum 950 square foot limit, it is less than 1 percent of the lot area. The area of the proposed detached accessory building is therefore consistent with the intent of the Zoning Ordinance to limit the area of detached accessory structures to an appropriate scale relative to lot area.

The requested variance is in harmony with the general purpose and intent of the Zoning Ordinance in regards to allowed uses within the R-2 District and regulations for the area of detached accessory buildings.

2. Describe how the request is consistent with the Comprehensive Plan. The 2030 Rogers Comprehensive Plan includes the following land use policy: "Promote a balanced mix of residential land uses and densities to meet the varied needs of residents based on age, household size, and economic means" (Rogers Comprehensive Plan, Page 4-5). The proposed detached private garage will meet the housing and incidental off-street parking needs

of the occupants, which consists of a married couple with school aged children. The demonstrated need for the proposed detached private garage is consistent with the cited policy of the 2030 Comprehensive Plan, as well as the purpose of the R-2 District and accessory building regulations adopted within the Zoning Ordinance to provide for a range of housing options in Rogers to implement the Comprehensive Plan.

3. Describe why the proposed use is reasonable.

The residents of the single family detached dwelling are a married couple and five school age children. The age and size of the household means that there will be the need for off-street parking greater than the minimum two off-street parking spaces required by Section of the 125-323(c)(8) of the Zoning Ordinance and it is preferable from a storage perspective to have these vehicles parked within a structure. In consideration of the needs of the household occupying the property, the area of the proposed detached private garage is reasonable. Moreover, the demonstrated need for the proposed detached private garage is consistent with the practical difficulty criteria set forth in Minnesota Statues 462.357 Subd. 6(2) for approval of a variance from the requirements of the Zoning Ordinance.

4. Describe the following: Circumstances unique to the property, why the need for the variance was not created by the property owner, and why the need is not soley based on economic considerations.

The property is 5.11 acres or 222,596 square feet in area. The minimum lot area required for lots within the R-2 District is 15,000 square feet. The subject site is unique in that it is a developed single-family lot that is almost 15 times larger than the minimum lot area within the R-2 District. The provision of Section 125-323(c)(8) of the Zoning Ordinance limiting the area of accessory structures causes a practical difficulty for the reasonable use of the property related to construction of a proposed 2,000 square foot detached private garage that will proportional to the area of the property to meet the housing and incidental off-street parking needs of the residents.

5. Describe why the variance would not alter the essential character of the neighborhood. The proposed 2,000 square foot detached private garage will be proportional in scale to the area of the property with a foot print occupying less than 1 percent of the lot area. The proposed detached private garage will be located in the side yard to the south of the single family detached dwelling. This location is at a lower elevation than the single family detached dwelling and will be surrounded by existing mature trees. The proposed detached private garage will be screened from view of surrounding existing residential uses to the west and north by the single family detached dwelling, existing mature trees, and topography within the property. The scale of the proposed detached private garage relative to area of the property and the location of the structure being screened from view of existing surrounding dwellings ensures that approval of the requested variance will not alter the residential character of the property or neighborhood.

Meeting Date: May 21, 2019

Agenda Item: No. 6.1

Subject: Site Plan Approval of the Community Amenity Center in Laurel Creek

Development

**Prepared** 

Amy Patnode, Planning Associate

By:

#### Overview / Background

The City of Rogers received an application from U.S. Home Corporation DBA Lennar, for Site Plan approval of the Community Amenity Center ("Center") for the Laurel Creek Development ("Development"). The 3,500 square foot Center has a wide range of amenities and activities for the residents of the Development to utilize.

#### **Primary Issues to Consider**

- 1. Land Use and Zoning
- 2. Site Plan
- 3. Parking

#### **Analysis of Primary Issues**

#### 1. Land Use and Zoning

The Laurel Creek development is zoned Planned Unit Development ("PUD") with the underlying land use designation in the draft 2040 Comprehensive Plan is Mixed Residential. PUD's allow for flexibilities otherwise not allowed within certain zoning districts although low to mid-density zoning districts allow Community Centers as a permitted use. The Center was approved as part of the overall Development and the Master PUD Agreement requires the developer to apply for a formal site plan review of the Amenity Center.

#### Land Use and Zoning requirements are satisfied.

#### 2. Site Plan

The Center is proposed to be located on 2.52 acres of land which was platted in the 2<sup>nd</sup> phase of the Development. In addition to the Center, there is currently a pool and pool house on the same lot. The pool house and Center are on the same lot and share vehicle access to the site. Walking and biking trails intertwine throughout the site and outdoor amenities are proposed with the development of the Center. The amenities include outdoor lawn bowling, a pickleball court, a patio and firepit. An indoor meeting room, a kitchen, hearth room, two offices, an exercise room and a yoga room are offered in the Center.

#### 3. Parking

Community Centers do not have a parking ratio as determined code, although uses not specifically noted in the parking requirements can be determined by the zoning administrator [§125-313 (7)]. If the parking ratio was determined to be one space per 200 square feet; similar to that of an office or health/fitness club, the stalls required would be 17 for the Center. The pool and Center share parking

and only 17 stalls are provided for the site. Because this is a Center for only Laurel Creek residence, it can be assumed residents will opt to bike, walk or carpool to the pool on the warmer days, leaving parking stalls open for the Center use. The 17 stalls are not seen as insufficient to City staff or the developers at Lennar. If there were to be a big event at the Center, parking is allowed on one side 114<sup>th</sup> Ave, although not dedicated for parking use.

City staff supports the request and recommends approval for the Planning Commissions recommendation to the City Council. All memo's from the Fire Department and Public Works shall be addressed as the Community Amenity Center applies for building permits and progresses through City approvals.

#### **Staff Recommendation**

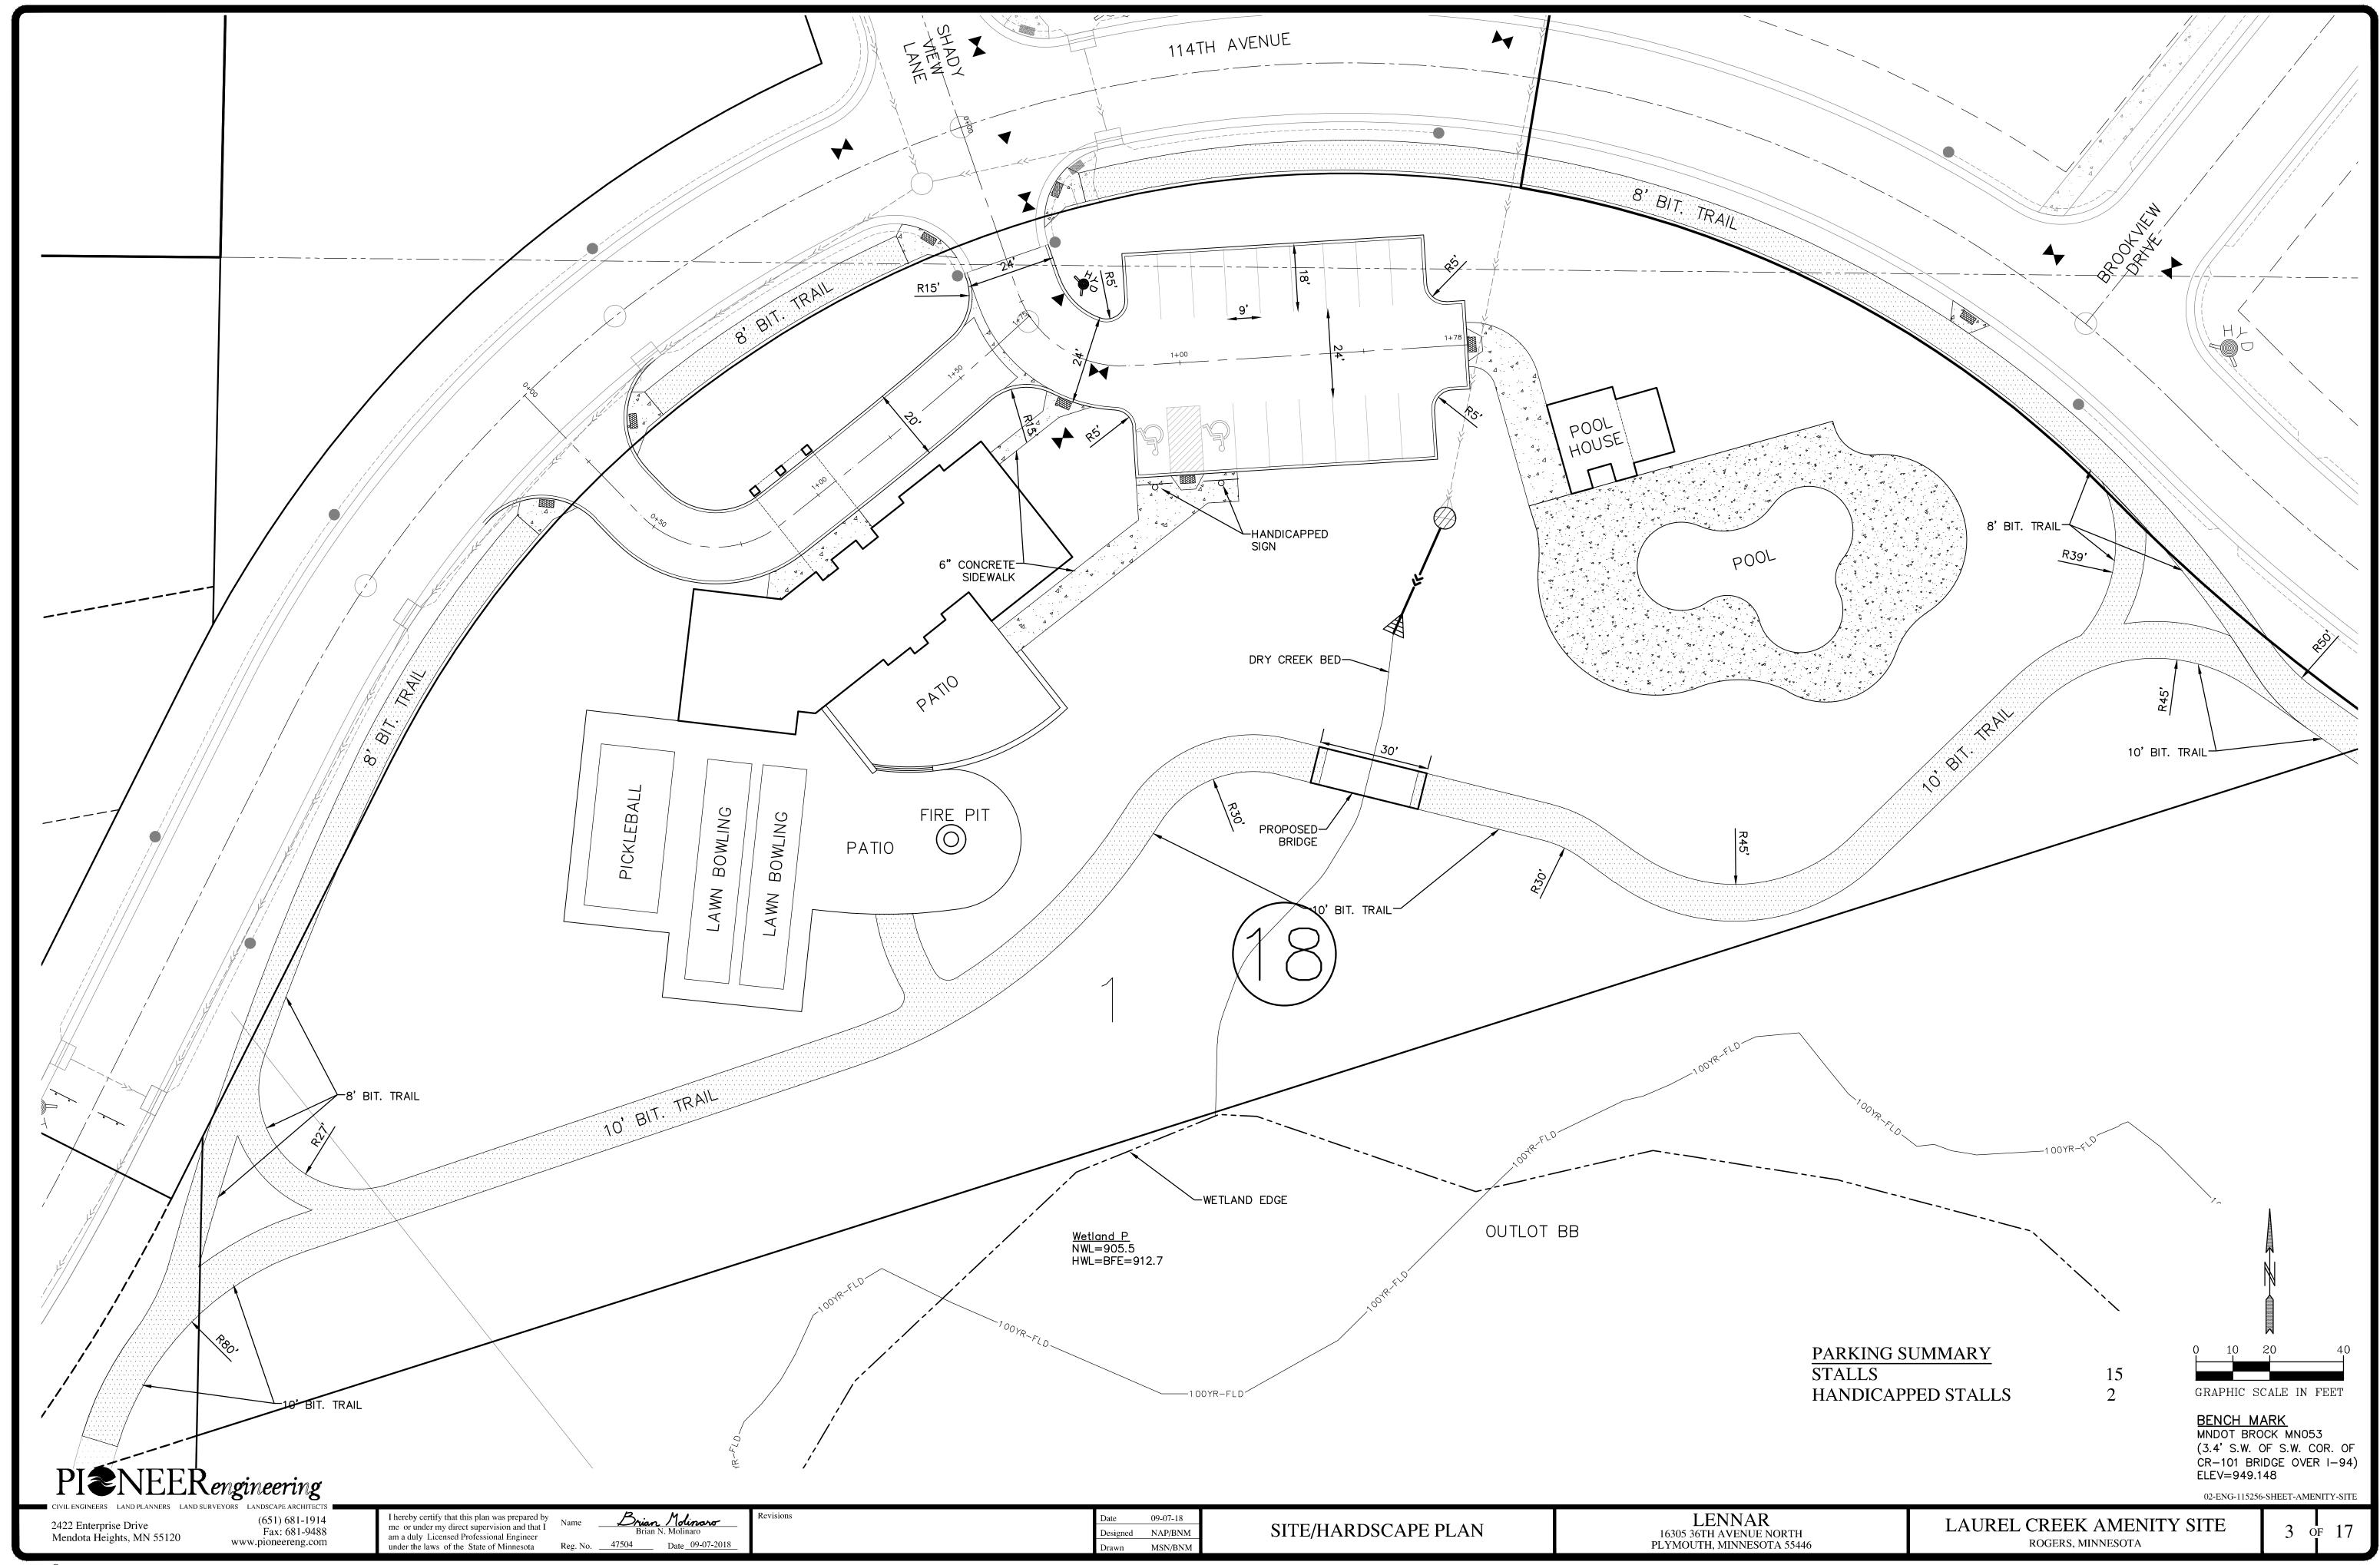

Motion to approve the Site Plan for the Laurel Creek Community Amenity Center, located at 19802 114<sup>th</sup> Ave.

### GENERAL NOTES

- THE CONTRACT DRAWINGS & SPECIFICATIONS REPRESENT THE FINISHED PROJECT UNLESS OTHERWISE NOTED. THEY DO NOT INDICATE THE MEANS OR METHOD OF CONSTRUCTION.
- .. CONTRACTOR SHALL PROVIDE ALL WORK AND MATERIALS AS REQUIRED BY THE CONSTRUCTION DOCUMENTS AND IN FULL ACCORDANCE WITH ALL APPLICABLE CODES & ORDINANCES
- CONTRACTOR SHALL VERIFY ALL EXISTING DIMENSIONS AND FIELD CONDITIONS PRIOR TO ANY DEMOLITION, FABRICATION, CONSTRUCTION OR INSTALLATION & NOTIFY ARCHITECT IF CONDITIONS, MATERIALS, SIZES & DIMENSIONS ARE DIFFERENT FROM THOSE SHOWN.
- . CROSS REFERENCE ALL DIMENSIONS AND DETAILS WITH STRUCTURAL, CIVIL, MECHANICAL & ELECTRICAL DRAWINGS BEFORE COMMENCING ANY FABRICATION AND/OR CONSTRUCTION
- . CONTRACTORS SHALL INSTALL ALL MANUFACTURED ITEMS, MATERIALS AND EQUIPMENT IN STRICT ACCORDANCE WITH THE MANUFACTURER'S RECOMMENDED SPECIFICATIONS, EXCEPT WHERE THE SPECIFICATIONS HEREIN, ARE MORE STRINGENT, AND SHALL BE COMPLIED WITH.
- . MATERIALS WHICH ARE SHOWN ON THE DRAWINGS AND WHICH MAY NOT BE SPECIFICALLY DESCRIBED IN THE SPECIFICATIONS OR DRAWINGS SHALL BE FURNISHED BY THE CONTRACTOR AND SHALL BE SUITABLE FOR THE INTENDED USE. MATERIALS SHALL BE IN HARMONY WITH ADJACENT MATERIALS AND SHALL BE SUBJECT TO REVIEW FOR CONFORMANCE WITH THE INTENT OF THE CONTRACT DOCUMENTS, WHERE INSTALLATION TECHNIQUES ARE NOT SPECIFIED. THEY SHALL BE IN ACCORDANCE WITH MANUFACTURER'S CURRENT INSTRUCTION AND INDUSTRY STANDARDS.
- . SHOP DRAWINGS PREPARED BY SUPPLIERS, SUBCONTRACTORS, ETC. SHALL BE REVIEWED, COORDINATED AND SIGNED AND STAMPED BY GENERAL CONTRACTOR PRIOR TO SUBMITTING TO
- B. THE CONTRACTOR SHALL SECURE ALL NECESSARY PERMITS, LICENSES AND CERTIFICATES AND PAY ALL FEES CONNECTED WITH THE ABOVE REFERENCED PROJECT.
- 9. CONTRACTOR SHALL BE RESPONSIBLE TO PREPARE ALL SURFACES FOR PROPER INSTALLATION OF FINISHES. THIS IS TO INCLUDE BUT IS NOT LIMITED TO PATCHING, SANDING, FLOOR LEVELING, PRIMING, SEALING, SKIM COATING, ETC.
- 0. CONTRACTOR SHALL AT ALL TIMES KEEP THE PREMISES FREE FROM WASTE MATERIAL OR RUBBISH CAUSED BY THE WORK.
- CONTRACTOR SHALL MINIMIZE ANY DAMAGE TO EXISTING CONSTRUCTION AND AREAS ON THE SITE OUTSIDE OF THE CONSTRUCTION LIMITS. CONTRACTOR TO CONSTRUCT TEMPORARY WALLS & BARRIERS AS REQUIRED TO CONTAIN DUST & DEBRIS AND TO PROVIDE SAFE PUBLIC ACCESS & PASSAGE.
- 2. GENERAL CONTRACTOR SHALL LOCATE ALL NEW MECHANICAL UNITS OR RELOCATE ANY EXISTING UNITS OR ITEMS THAT CONFLICT WITH NEW OR EXISTING FRAMING AND FULL HEIGHT WALLS. THIS INCLUDES ACCESS FOR ALL CONTROLS, FILTERS, ETC. THIS WORK MUST BE COORDINATED & VERIFIED PRIOR TO BIDDING.
- 13. GENERAL CONTRACTOR SHALL COORDINATE & VERIFY WITH THE REPECTIVE TRADES THE SIZES AND LOCATIONS OF MECHANICAL AND/OR ELECTRICAL PENETRATIONS, LOCATIONS OF FIRE TREATED BACKING/BLOCKING REQUIRED FOR MOUNTING ELECTRICAL AND/OR MECHANICAL EQUIPMENT. AS WELL AS CUTTING & PATCHING FOR WORK REQUIRED BY MECHANICAL/ELECTRICAL.
- 14. WHEN WORK IS COMPLETED IN AN AREA. THOROUGHLY CLEAN THE SPACES. ITEMS & SURFACES OF SOIL, WASTE MATERIAL, SMUDGES, SPATTERS, MISAPPLIED MATERIALS, SPOTS, STAINS AND THE LIKE WITHOUT DAMAGING THE MATERIALS & SURFACES INVOLVED.
- 15. ALL DOORS, FRAMES, HARDWARE, LIGHTING & CEILING MATERIALS ARE TO FOLLOW BUILDING STANDARDS UNLESS OTHERWISE NOTED.
- 16. GENERAL CONTRACTOR WILL BE RESPONSIBLE TO FIRE CAULK ALL NEW & EXISTING PENETRATIONS WITHIN WALL PARTITIONS, ABOVE THE CEILING, AS INDICATED BY THE APPLICABLE CODES.
- 17. PASSIVE RADON REMOVAL SYSTEM AS REQUIRED BY CODE

## **RADON NOTE:**

ALL BASEMENT SLABS WILL HAVE A MIN. 4" CLEAN AGGREGATE, COVERED BY 6 MIL POLY. THIS POLY WILL HAVE 12" LAP AT ALL SEAMS. ALL TEARS OR PUNCTURES WILL BE SEALED OR COVERED BY POLY. ALL OPENINGS WILL BE SEALED USING POLYURETHANE CAULK OR ELASTOMERIC SEALANT AT ALL OPENINGS. ALL SUMP BASKETS WILL HAVE SEALED LIDS.

AN INSTALLED 3" GASTIGHT PVC PIPE WILL BE CONNECTED TO THE DRAIN TILE SYSTEM. A "T" FITTING WILL BE INSTALLED WITH 10 L.F. EACH END OF THE "T", OF PERFORATED PIPE, INTO THE DRAIN TILE SYSTEM. THE SHORTEST ROUTE WILL BE USED TO EXIT THE ROOF SYSTEM, WITH A MAX. OF 2 90 DEGREE ELBOWS. IN UNCONDITIONED AREAS, THE RADON EXHAUST PIPE WILL BE INSULATED WITH AN R4 SLEEVE. THIS PIPE WILL BE LABELED "PASSIVE RADON" AT ALL ACCESSIBLE LOCATIONS.

AT ROOF EXIT LOCATIONS, MAINTAIN A 10' DISTANCE TO ANY WINDOW LOCATION, 2' BELOW EXHAUST POINT AND ANY ADJACENT STRUCTURE. THE LOCATION OF THE EXIT POINT, IN TRUSS AREA, WILL BE CLEAR OF ANY OBSTRUCTIONS WITHIN 24" HORIZONTALLY AND 36" VERTICALLY. INSTALL AN OUTLET AND PULL CHORD LIGHT FOR FUTURE EXHAUST FAN ADDITION.

#### GENERAL NOTES (CONT.)

#### <u>FINISHES</u>

#### . SEE ROOM FINISH SCHEDULE FOR FINISHES

- . CONTRACTOR SHALL PATCH AND REPAIR ANY AND ALL FLOORS, WALLS, CEILINGS, ETC. IN A WORKMAN-LIKE MANNER TO MATCH THE SURROUNDING SURFACE AREAS, SURFACES OR MATERIALS DAMAGED BY DEMOLITION OR CONSTRUCTION SHALL BE REPAIRED, RESTORED AND REFINISHED TO MATCH THE EXISTING, UNLESS OTHERWISE NOTED. IN ADDITION THOSE EXISTING SURFACES OR MATERIALS (SERVING AS A SUBSTRATE FOR NEW MATERIALS OR FINISHES) WHICH HAVE BEEN DAMAGED FROM ANY CAUSE, SHALL BE REPAIRED, RESTORED, PROPERLY PREPARED AND CLEANED TO RECEIVE THE NEW MATERIALS AND FINISH WORK. ALL NEW MATERIALS & FINISH WORK TO BE FREE FROM FLAWS & DEFECTS.
- B. GENERAL CONTRACTOR IS RESPONSIBLE FOR VERIFYING LEAD TIMES OF ALL MATERIALS SUCH THAT MATERIALS ARE ON SITE WHEN REQUIRED FOR INSTALLATION.
- 4. ALL PREPARATION, STORING, INSTALLATION & CLEANUP OF FINISHES TO CONFORM TO MANUFACTURER'S SPECIFICATIONS.

### MECHANICAL

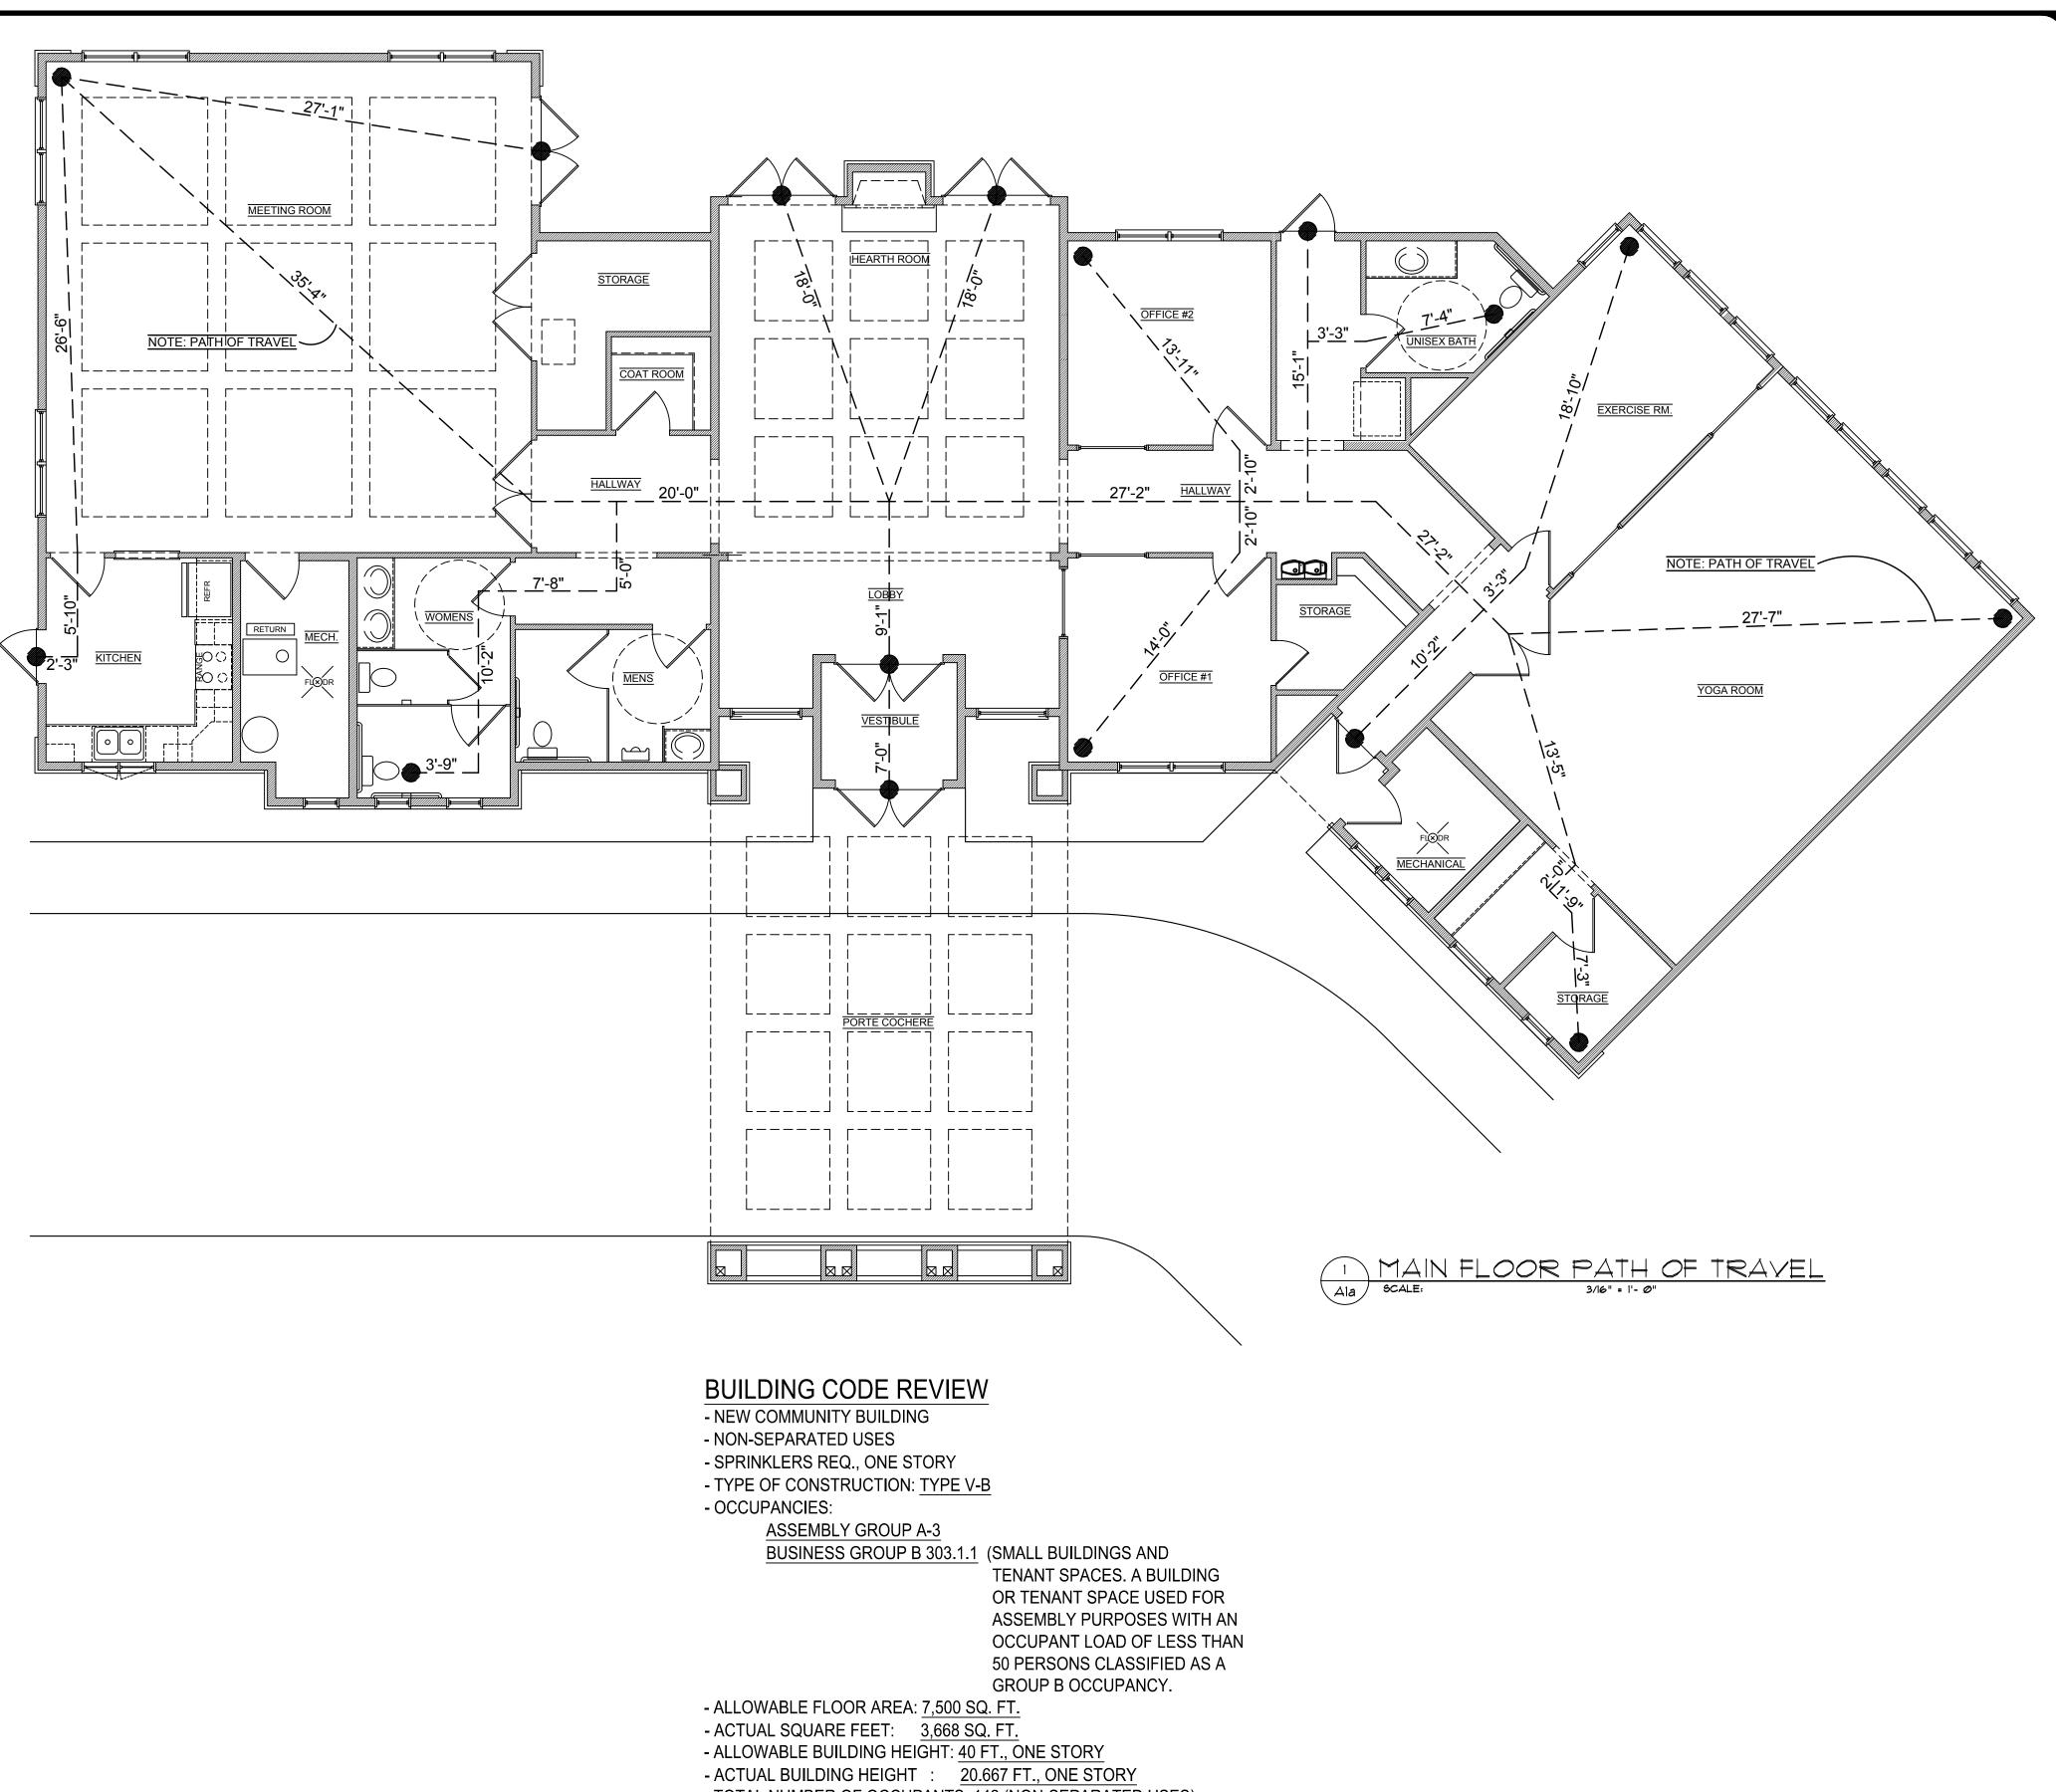

- MECHANICAL CONTRACTOR IS TO DESIGN ALL MECHANICAL SYSTEMS AND OBTAIN NECESSARY PERMITS, MECHANICAL DOCUMENTS ARE TO BE PROVIDED BY THE MECHANICAL CONTRACTOR AND SIGNED BY A PROFESSIONAL ENGINEER AS REQUIRED BY CODE. THE MECHANICAL DESIGN IS TO BE COORD-INATED WITH THE ATTACHED ARCHITECTURAL CONSTRUCTION DOCUMENTS. THE DESIGNS TO BE REVIEWED BY THE OWNER PRIOR TO IMPLEMENTATION.
- . MECHANICAL CONTRACTOR IS RESPONSIBLE TO PROVIDE ALL MECHANICAL EQUIPMENT AND CONTROLS TO COMPLETE THE JOB. MECHANICAL CONTRACTOR IS TO COORDINATE WITH THE ELECTRICAL CONTRACTOR ALL THE NECESSARY WIRING TO COMPLETE THE JOB. THE WIRING IS TO BE COMPLETED BY THE ELECTRICAL CONTRACTOR.
- . VERIFY LOCATION AND SIZES OF ALL OPENINGS WITH GENERAL PRIOR TO COMMENCING WORK. THE GENERAL CONTRACTOR IS RESPONSIBLE TO CUT & PATCH OR ADD REINFORCING AS REQ'D. FOR THE INSTALLATION OF MECHANICAL ROOF TOP EQUIPMENT.
- 4. ALL SINKS TO HAVE HOT & COLD WATER.
- 5. PROVIDE AND INSTALL AN APPROPRIATE SIZED WATER HEATER

## ELECTRICAL

- . ELECTRICAL CONTRACTOR IS TO DESIGN ALL ELECTRICAL SYSTEMS AND OBTAIN NECESSARY PERMITS. THE ELECTRICAL DESIGN IS TO BE COORDINATED WITH THE ATTACHED ARCHITECTURAL CONSTRUCTION DOCUMENTS. THE ELECTRICAL DESIGN IS TO BE REVIEWED BY THE ARCHITECT OF RECORD AND TENANT PRIOR TO IMPLEMENTATION.
- ELECTRICAL CONTRACTOR IS TO COORDINATE THE INSTALLATION OF ALL MECHANICAL EQUIPMENT AND TO PROVIDE DISCONNECT AND POWER WIRING FOR ALL MECHANICAL EQUIPMENT.
- ELECTRICAL CONTRACTOR IS TO PROVIDE SMOKE DETECTION AND ALARM DEVICES AND WIRING OF THE SPACE AS REQUIRED BY APPLICABLE CODES AND ORDINANCES FOR THE INTERIOR BUILD OUT SPACE.

## GENERAL PROJECT NOTES

- 1. ALL EXTERIOR DIMENSIONS TO OUTSIDE OF SHEATHING
- 2. ROOF & FLOOR TRUSS MANUFACTURER TO VERIFY SIZE & SPACING OF ALL TRUSSES.
- 3. 3" RETURNS ON ALL DOORS U.N.O.

**Subject:** Review Site Plan Request for Proposed Indoor Tennis Facility at 21098 145th

Avenue North.

Prepared

Jason Ziemer, City Planner / Community Development Coordinator

By:

#### Recommended Planning Commission Action

Motion to recommend to the City Council approval of the Site Plan with the following conditions:

- 1. The Applicant shall submit application for zoning text amendment to revise the definition of Public Recreation to permit indoor facilities.
- 2. The Applicant shall provide evidence of plan and permit approval from the Elm Creek Watershed Management Commission.
- 3. The Applicant shall provide a parking plan and detailed justification for number of spaces provided in relation to City Code to determine whether a parking Variance is necessary. Applicant analysis shall include handling of potential parking conflicts with the adjacent athletic fields,
- 4. The Applicant shall provide a landscape plan for entire Development including location and type of plant and trees species.
- 5. The Applicant shall provide a Sign Plan, including sign calculations, for the monument sign and all other signage proposed for the Development.
- 6. The Applicant shall provide revised Site Plan drawings to address required changes and concerns cited by the Fire Department and other required or requested plan revisions.
- 7. The Applicant shall make application for any Variances as determined by City staff.

#### Overview / Background

The City of Rogers (Applicant), in partnership with Ultimate Tennis, has submitted a Zoning & Land Use application, requesting Site Plan approval for a proposed 48,080 square foot indoor tennis facility (Development). The Development is to be located on City property, located at 21098 145<sup>th</sup> Avenue North (Subject Property); it is part of a public-private partnership between the City and Ultimate Tennis. On February 26, 2019, the City Council approved the Final Plat for Reservoir Fields, creating two (2) lots. Lot 2 was created as a 48,080 square foot pad site specifically for the tennis facility building. The Development is currently referred to as the Rogers Tennis Center.

The application for Site Plan was received on April 19, 2019. The 60-day statutory review period expires on July 19, 2019.

#### **Primary Issues to Consider**

- 1. Land Use & Zoning
- 2. Plat

#### 3. Site Plan

#### **Analysis of Primary Issues**

#### 1. Land Use & Zoning

The Subject Property, a 1.10-acre site, is currently guided as **Rural Estate**, per the Rogers 2030 Comprehensive Plan, which is defined as follows: *The rural estate land use pattern is intended to be limited to areas currently guided by this land use category or already developed to this pattern. Key characteristics include a maximum density of one unit per two gross acres with detached single family homes utilizing private wells and individual or community sewage treatment systems. The City recognizes that regional policy directs this area for higher density. However, as the area is largely developed and development at higher densities would be difficult, the Comprehensive Plan maintains the historical land use pattern. The City recognizes that if connecting to the regional sewage treatment system is needed in the future, the City will need to submit a Comprehensive Plan amendment which includes the larger lots in the community's overall density calculation used for sewered areas.* 

The draft 2040 Comprehensive Plan proposes to re-guide this property as Park & Open Space, which is defined as: *Park and Open Space land use includes active and passive lands that area part of the City's park system, are protected open space areas, or are part of the Three Rivers Park District System. Open space uses include natural resource protection or buffer areas, stormwater drainage areas, and preservation of unaltered land in its natural state for environmental or aesthetic purposes. To determine net acreage available for future development, a 50-foot buffer was created around lakes and wetlands. This buffered area reflects requirements for development setbacks from sensitive water features. The buffered acreage is included in the Park and Open Space land use category.* 

The current corresponding zoning for the property is **Special Industrial (S-I)**. Permitted uses include *Public Recreation* [§125-200(b)(5)]. The definition [§125-1] for this, states: *An outdoor recreation facility owned or operated by a non-profit organization in which athletic activities are permitted to be played by the general public. Examples of such a facility would be a softball complex, soccer fields, etc. The definition contemplates outdoor, open space facilities and that such facilities must be operated by a non-profit organization. Thus, the proposed indoor facility would not satisfy two elements of the definition – it is not an outdoor facility and will be operated by a for-profit organization. Permitting the Development requires some type of zoning change. City staff have proposed the following text amendment to the definition:* 

An <u>indoor or</u> outdoor recreation facility owned or operated by a non-profit organization, <u>or</u> <u>public use approved by the City or in partnership with the City</u> in which athletic activities are permitted to be played by the general public. Examples of such a facility would be a softball complex, soccer fields, etc.

The zoning text amendment was not requested with this application. If the Planning Commission recommends Site Plan approval to the City Council a condition regarding the zoning text amendment should be placed as a condition.

#### Land Use is satisfied. Zoning is not satisfied.

#### 2. Plat

The Applicant received approval of the Preliminary and Final Plats for Reservoir Fields on February 26, 2019. Minimum lot standards for properties zoned Special Industrial require a minimum area of five (5) acre. The City Council approved a variance to the minimum lot size standard, allowing the creation of Lot 2 (48,080 square feet). The remainder of the original property was platted as Lot 1 (11.92 acres).

#### Platting conditions are satisfied.

#### 3. Site Plan

#### <u>Site</u>

As described above, the Subject Property was created specifically for the purpose of constructing the indoor tennis facility building. The building will be located entirely on Lot 2 (48,080 square feet) The Subject Property is addressed 21098 145<sup>th</sup> Avenue North. Driveway access for the tennis facility will come from 147<sup>th</sup> Avenue North. The property today is completely vacant, except for a ground storage (water) reservoir.

The proposed building is 48,080 square feet and shall be constructed on Lot 2, as described above. The parking lot and required storm water retention will be located on Lot 1, which surrounds the building site. Access to and parking for the facility shall be provided from the City to the owners/operators of the tennis facility by easement agreement. The remainder of Lot 1 shall be graded and seeded for two (2) multi-purpose athletic fields. The Site Plan shows two (2) outdoor tennis courts, proposed for the southside of the building. Currently, the owners/operators of the tennis facility do not plan to construct those courts. There is a proposed internal trail system that connects the building to the existing parking lot on the southside of Lot 1; it is not clear when this would be constructed and whether that trail is asphalt or another type of material. There is no there is currently no pedestrian access provided to the site. Although the Subject Property is somewhat remote and is surrounded by more industrial uses and larger lot rural residential development it is recommended a trail or sidewalk be constructed along 147<sup>th</sup> Avenue North. The City would typically require developers to sidewalks/trails as part of new developments to aid the City in the build out of its trail system.

For security purposes, the Applicant is proposing a decorative, six (6) foot high fence to surround the south, east and north sides of the building to enclose the play areas. The trash enclosure is located on the north end of the parking lot.

#### Performance Standards

Property zoned as Special Industrial (S-I) must satisfy the following Performance Standards for setbacks. The lot area requirement of a five (5) acre minimum was addressed with the approved Variance at the time of Final Plat. Setbacks are as follows:

Front Yard	30 feet	
Side Yard (Interior)	20 feet, 50 feet next to residential	
Rear Yard	30 feet; 50 feet next to residential	

As the building will occupy the entirety of Lot 2 the Development would not satisfy the setback requirements. However, when considering the building in relation to the larger property (Lot 1) the building sits 90 feet back from the 147<sup>th</sup> Avenue North right of way (front yard), 90 feet from the west lot line and approximately 250 feet from the east lot lines (side yards), and more than 600 feet to the

south lot line (rear yard).

#### Performance Standards for lot area and setbacks are satisfied.

#### Lot Coverage

Calculating lot coverage for the Development is somewhat complicated as the building occupies the entire 48,080-square foot property, resulting in 100% lot coverage. As there are assumptions of shared uses – parking lot, outdoor tennis courts, trails, etc., a total lot coverage calculation for both lots would be prudent. A quick calculation of all existing (roads, parking lots and structures) plus proposed impervious surfaces, excluding the parking lot, outdoor tennis courts and trails, results in a lot coverage of approximately 15.3% - 86,629 square feet improved surface areas.

There are no lot cover standards for developments in Commercial and Industrial Districts. Residential districts restrict impervious surface area to 75% [City Code §125-329(4)].

#### Lot coverage is satisfied.

#### Parking & Site Circulation

The parking plan shows 72 total parking spaces, but does not define accessible spaces. ADA standards determine the minimum number of accessible spaces based on the total number of parking spaces. City Code §125-313(c)(7) requires the following for a health and/or fitness club use: One space for each 200 square feet of floor area. This would result in the need for the Development to provide 240 parking spaces. It may be argued the tennis facility is not the same as a health/fitness club, yet City Code offers no other parking requirements for recreation facilities.

There is a provision in City Code that states that uses not specifically noted may be determined by the zoning administrator. With that, we would typically require the Applicant to provide rationale as to the parking count shown on the Site Plan. No such explanation was provided. In addition to tennis, the plan is to provide some level of public and private fitness classes and other recreational-type activities at the facility. Whether 72 parking stalls accurately describes and provides for the need is debatable.

There is some concern about parking space demand during potential peak hours of the tennis facility and adjacent athletic field. As the parking lot will be publicly-owned, it is not likely the City can restrict use of the parking lot for private purposes only (i.e. tennis facility). According to the owners/operators, the volume of users increases during winter months, when the fields are not in use, and decreases during the summer months.

The Fire Department has reviewed and commented on site circulation.

#### Parking and site circulation requirements are pending further review.

#### **Materials**

Developments in all industrial districts must satisfy architectural design standards. Those standards [§125-347], state: *In all industrial zoning districts (L-I, S-I) 75 percent of the exterior building finish shall consist of the following materials: face brick; natural stone; glass; specifically designed precast concrete unnits if the surfaces have been integrally treated with an applied decorative material or texture* 

and smooth concrete block if scored at least twice; rock face; cast stone; cultured stone; EIFS; architectural precast; precast concrete panel with at least two architectural reveals per panel/block. The building must also use up to three of the following to break up long walls: window bays, special treatments at entrances, variations in rooflines or parapet, and building setbacks or articulation of the façade. Buildings 10,000 to 20,000 square feet, and greater than 20,000 square feet, must also satisfy certain building setbacks or façade articulations.

The exterior of the facility is proposed to be constructed using as a membrane material. Thus, it does not satisfy the architectural design standards. However, the material type is also not specifically identified as a prohibited material. It is understood the type of building is recreation in nature. However, the City has historically not permitted membrane structures in any commercial or industrial district. The City has also been consistent in applying the exterior material standards to projects with minimal flexibility to material type. From a structural perspective, the building itself must be engineered to satisfy wind and snow loads which is determined by the building official. Material requirements need further review and thus a determination is pending.

#### Surface Water

The City is proposing to construct the required storm water treatment facility adjacent to the parking lot on Lot 1. Approval is required by the Elm Creek Watershed Management Commission.

#### Surfaced Water requirements are pending.

#### Landscape Plan

The Development proposes a very minimal Landscaping Plan. The Landscaping Plan shows 19 trees, but does not specify the types of trees to be planted. The City requires all trees planted to have a minimum caliper of 2.5 inches. According to City Code [§125-313(c)(6)], for every 12 parking spaces in a row a landscaped island shall be provided with at least one (1) tree per island. There are no parking islands shown on the Plan. The Landscaping Plan states "Foundation Plantings by Others" which is not acceptable. Although City Code regarding landscaping is not detailed, the Landscaping Plan provided is not a thorough as the City would typically see or require for developments. A more detailed Landscaping Plan showing the type of and placement of plants is required and should be a condition of approval.

#### Landscape Plan requirements are not satisfied.

#### <u>Signage</u>

The Subject Property is zoned Special Industrial (S-I) and located north of Interstate 94 and east of Highway 101, making it part of the *Industry Large Site (ILS) Sign Overlay District*. Applicable sign standards for this district [§113-9] allows the following: wall sign area 2 square feet per lineal feet up to a maximum of 120 square feet, and freestanding sign area of 36 square feet at a height not to exceed 8 feet. Signs must be externally lit and directed toward the sign Auxiliary signs are also permitted on the property. City Code further restricts wall signs to walls abutting public roads; there is a maximum of one (1) freestanding sign per property.

The Site Plan shows only one (1) sign: a monument sign at the northeastern entrance into the property from 147<sup>th</sup> Avenue North. However, detail regarding that sign was not included with the application so staff was not able to determine whether the proposed sign area complies with City Code.

The Sign Plan was required with the Site Plan application; sign details will be required prior to issuance of a permit.

#### Satisfaction of signage requirements are pending.

#### Fire

The Applicant has met with Fire Department staff regarding the project. Based on the plans submitted, Fire staff requested revisions including, but not limited to the following:

- fire hydrants locations must be adjusted with final locations approved by the Fire Chief
- the tennis facility must be sprinkled
- revise plans to sprinkler room on the west side of the building with an exterior door
- revise plans to show fire plans and location of "No Parking Fire Lane" signs
- fire lane road on west side of building will require a south access gate with fire key box
- fire lane road on west side of building must be a hard surface (i.e. asphalt) from the gate to the reservoir roadway.

Other comments from the Fire Department were provided to the Applicant.

#### Fire Department requirements are pending.

#### <u>Variances</u>

The Applicant has not indicated a need for any Variances, yet it would seem plausible there are issues addressed in this memo that may require such considerations. City staff identify possible variances for parking and exterior building materials.

#### **Staff Recommendation**

City staff recommends approval of the Site Plan with conditions as stated in the motion.

EROSION PREVENTION MEASURES SHOWN ON PLANS ARE THE ABSOLUTE MINIMUM REQUIREMENTS. THE CONTRACTOR SHALL IMPLEMENT ADDITIONAL EROSION PREVENTION MEASURES AS NECESSARY TO PROPERLY MANAGE THE PROJECT AREA.

THE CONTRACTOR SHALL PLAN AND IMPLEMENT APPROPRIATE CONSTRUCTION PRACTICES AND CONSTRUCTION PHASING TO MINIMIZE EROSION AND RETAIN VEGETATION WHENEVER

THE CONTRACTOR SHALL DELINEATE AREAS NOT TO BE DISTURBED AND/OR TO BE PROTECTED WITH FLAGS, STAKES, SIGNS, SILT FENCE, OR OTHER MEANS NECESSARY TO PROTECT THESE AREAS BEFORE CONSTRUCTION BEGINS ON THE SITE.

THE CONTRACTOR SHALL STABILIZE OF ALL EXPOSED SOILS IMMEDIATELY TO LIMIT SOIL EROSION. IN NO CASE SHALL ANY EXPOSED AREAS, INCLUDING STOCK PILES, HAVE EXPOSED SOILS FOR MORE THAN 7 DAYS WITHOUT PROVIDING TEMPORARY OR PERMANENT STABILIZATION

DRAINAGE PATHS, DITCHES, AND/OR SWALES SHALL HAVE TEMPORARY OR PERMANENT STABILIZATION WITHIN 24 HOURS OF CONNECTING TO A SURFACE WATER OR 24 HOURS AFTER CONSTRUCTION ACTIVITY IN THE DITCH/SWALE HAS TEMPORARILY OR PERMANENTLY

THE CONTRACTOR SHALL COMPLETE THE STABILIZATION OF ALL EXPOSED SOILS WITHIN 24 HOURS THAT LIE WITHIN 200 FEET OF PUBLIC WATERS PROMULGATED "WORK IN WATER RESTRICTIONS" BY THE MN DNR DURING SPECIFIED FISH SPAWNING TIMES

THE CONTRACTOR SHALL IMPLEMENT STORMWATER CONVEYANCE CHANNELS WHEN APPROPRIATE TO ROUTE WATER AROUND UNSTABILIZED AREAS ON SITE TO REDUCE EROSION.

THE CONTRACTOR SHALL IMPLEMENT EROSION CONTROL BMPS AND VELOCITY DISSIPATION DEVICES ALONG CONSTRUCTED STORMWATER CONVEYANCE CHANNELS AND OUTLETS.

THE CONTRACTOR SHALL STABILIZE TEMPORARY AND/OR PERMANENT DRAINAGE DITCHES OR SWALES WITHIN 200 LINEAL FEET FROM PROPERTY EDGE, OR DISCHARGE POINT(S) WITHIN 24 HOURS AFTER CONNECTING TO A SURFACE WATER OR PROPERTY EDGE

TEMPORARY OR PERMANENT DITCHES OR SWALES USED AS A SEDIMENT CONTAINMENT SYSTEM DURING CONSTRUCTION MUST BE STABILIZED WITHIN 24 HOURS AFTER NO LONGER BEING USED AS A SEDIMENT

THE CONTRACTOR SHALL NOT UTILIZE HYDROMULCH, TACKIFIER, POLYACRYLAMIDE OR SIMILIAR EROSION PREVENTION PRACTICES AS A FORM OF STABILIZATION FOR TEMPORARY OR PERMANENT DRAINAGE

THE CONTRACTOR SHALL ENSURE PIPE OUTLETS HAVE TEMPORARY OR PERMANENT ENERGY DISSIPATION

THE CONTRACTOR SHALL DIRECT DISCHARGES FROM BMPS TO VEGETATED AREAS TO INCREASE SEDIMENT REMOVAL AND MAXIMIZE STORMWATER INFILTRATION. VELOCITY DISSIPATION DEVICES MUST BE USED TO PREVENT EROSION WHEN DIRECTING STORMWATER TO VEGETATED AREAS.

SEDIMENT CONTROL MEASURES AND TIMING:
THE CONTRACTOR IS RESPONSIBLE FOR ALL SEDIMENT CONTROL MEASURES FOR THE PROJECT.

SEDIMENT CONTROL MEASURES SHOWN ON PLANS ARE THE ABSOLUTE MINIMUM REQUIREMENTS THE CONTRACTOR SHALL IMPLEMENT ADDITIONAL SEDIMENT CONTROL MEASURES AS NECESSARY TO PROPERLY MANAGE THE PROJECT AREA.

THE CONTRACTOR SHALL ENSURE SEDIMENT CONTROL MEASURES ARE ESTABLISHED ON ALL DOWN GRADIENT PERIMETERS BEFORE ANY UPGRADIENT LAND DISTURBING ACTIVITIES BEGIN. THESE MEASURES SHALL REMAIN IN PLACE UNTIL FINAL STABILIZATION HAS BEEN ESTABLISHED.

THE CONTRACTOR SHALL ENSURE THERE ARE NO UNBROKEN SLOPE LENGTH GREATER THAN 75 FEET

THE CONTRACTOR SHALL ENSURE SEDIMENT CONTROL PRACTICES REMOVED OR ADJUSTED FOR SHORT-TERM ACTIVITIES BE RE-INSTALLED IMMEDIATELY AFTER THE SHORT-TERM ACTIVITY HAS BEEN COMPLETED. SEDIMENT CONTROL PRACTICES MUST BE REINSTALLED BEFORE THE NEXT PRECIPITATION EVENT EVEN IF THE SHORT-TERM ACTIVITY IS NOT COMPLETE

THE CONTRACTOR SHALL ENSURE STORM DRAIN INLETS AND CULVERT INLETS ARE PROTECTED BY APPROPRIATE BMPS DURING CONSTRUCTION UNTIL ALL SOURCES WITH POTENTIAL FOR DISCHARGING TO THE INLET HAS BEEN STABILIZED. INLET AND CULVERT PROTECTION SHALL CONFORM TO THE 2014

THE CONTRACTOR SHALL ENSURE STOCK PILES ARE PROVIDED WITH AN EFFECTIVE SEDIMENT PERIMETER CONTROL AND STOCK PILES SHALL NOT BE PLACED IN ANY TYPE OF SURFACE WATER OR NATURAL

THE CONTRACTOR SHALL INSTALL PERIMETER CONTROL AROUND ALL STAGING AREAS, BORROW PITS, AND AREAS CONSIDERED ENVIRONMENTALLY SENSITIVE.

THE CONTRACTOR SHALL ENSURE VEHICLE TRACKING BE MINIMIZED WITH EFFECTIVE BMPS. WHERE THE BMPS FAIL TO PREVENT SEDIMENT FROM TRACKING ONTO STREETS THE CONTRACTOR SHALL CONDUCT STREET SWEEPING TO REMOVE ALL TRACKED SEDIMENT.

THE CONTRACTOR SHALL IMPLEMENT CONSTRUCTION PRACTICES TO MINIMIZE SOIL COMPACTION.

THE CONTRACTOR SHALL ENSURE ALL CONSTRUCTION ACTIVITY REMAIN WITHIN PROJECT LIMITS AND THAT ALL IDENTIFIED RECEIVING WATER BUFFERS ARE MAINTAINED

THE CONTRACTOR SHALL NOT UTILIZE SEDIMENT CONTROL CHEMICALS ON SITE

EROSION PREVENTION BMP SUMMARY: SEE EROSION AND SEDIMENT CONTROL PLAN SHEET AND BID FORM FOR TYPE, LOCATION, AND QUANTITY OF EROSION PREVENTION BMPS.

SEDIMENT CONTROL BMP SUMMARY:
SEE EROSION AND SEDIMENT CONTROL PLAN SHEETS AND BID FORM FOR TYPE, LOCATION, AND QUANTITY OF SEDIMENT CONTROL BMPS

DEWATERING AND BASIN DRAINING ACTIVITIES: THE CONTRACTOR IS RESPONSIBLE FOR ADHERING TO ALL DEWATERING AND SURFACE DRAINAGE

WATER FROM DEWATERING ACTIVITIES SHALL DISCHARGE TO A TEMPORARY AND/OR PERMANENT SEDIMENT BASIN.

IF WATER CANNOT BE DISCHARGED TO A SEDIMENTATION BASIN, IT SHALL BE TREATED WITH OTHER APPROPRIATE BMPS, TO EFFECTIVELY REMOVE SEDIMENT

DISCHARGE THAT CONTAINS OIL OR GREASE MUST BE TREATED WITH AN OIL-WATER SEPARATOR OR SUITABLE FILTRATION DEVICE PRIOR TO DISCHARGE.

DISCHARGE POINTS SHALL BE PROTECTED FROM EROSION AND SCOUR.

DISCHARGE WATER SHALL BE DISPERSED OVER AN ACCEPTED ENERGY DISSIPATION MEASURE.

WATER FROM DEWATERING SHALL BE DISCHARGED IN A MANNER THAN DOES NOT CAUSE NUISANCE CONDITIONS, EROSION, OR INUNDATION OF WETLANDS

BACKWASH WATER USED FOR FILTERING SHALL BE HAULED AWAY FOR DISPOSAL, RETURNED TO THE BEGINNING OF TREATMENT PROCESS, OR INCORPORATED INTO THE SITE IN A MANNER THAT DOES NOT CAUSE EROSION. THE CONTRACTOR SHALL REPLACE AND CLEAN FILTER MEDIAS USED IN DEWATERING DEVICES WHEN REQUIRED TO MAINTAIN ADEQUATE FUNCTION.

#### INSPECTION AND MAINTENANCE:

ALL INSPECTIONS, MAINTENANCE, REPAIRS, REPLACEMENTS, AND REMOVAL OF BMPS IS TO BE CONSIDERED INCIDENTAL TO THE BMP BID ITEMS.

THE CONTRACTOR IS RESPONSIBLE FOR COMPLETING SITE INSPECTIONS, AND BMP MAINTENANCE TO ENSURE COMPLIANCE WITH THE PERMIT REQUIREMENTS.

THE CONTRACTOR SHALL INSPECT THE CONSTRUCTION SITE ONCE EVERY 7 DAYS DURING ACTIVE CONSTRUCTION AND WITHIN 24 HOURS AFTER A RAINFALL EVENT GREATER THAN 0.5 INCHES IN

THE CONTRACTOR SHALL DOCUMENT A WRITTEN SUMMARY OF ALL INSPECTIONS AND MAINTENANCE ACTIVITIES CONDUCTED WITHIN 24 HOURS OF OCCURRENCE. RECORDS OF EACH ACTIVITY SHALL INCLUDE THE FOLLOWING:

-DATE AND TIME OF INSPECTIONS;

-NAME OF PERSON(S) CONDUCTING INSPECTION

-FINDINGS AND RECOMMENDATIONS FOR CORRECTIVE ACTIONS IF NECESSARY;

-CORRECTIVE ACTIONS TAKEN;
-DATE AND AMOUNT OF RAINFALL EVENTS;

-POINTS OF DISCHARGE OBSERVED DURING INSPECTION AND DESCRIPTION OF THE DISCHARGE -AMENDMENTS MADE TO THE SWPPP.

THE CONTRACTOR SHALL SUBMIT A COPY OF THE WRITTEN INSPECTIONS TO THE ENGINEER AND OWNER ON A MONTHLY BASIS. IF MONTHLY INSPECTION REPORTS ARE NOT SUBMITTED, MONTHLY

THE CONTRACTOR SHALL KEEP THE SWPPP, ALL INSPECTION REPORTS, AND AMENDMENTS ONSITE. THE CONTRACTOR SHALL DESIGNATE A SPECIFIC ONSITE LOCATION TO KEEP THE RECORDS

THE CONTRACTOR IS RESPONSIBLE FOR THE OPERATION AND MAINTENANCE OF TEMPORARY AND PERMANENT WATER QUALITY BMP'S, AS WELL AS EROSION AND SEDIMENT CONTROL BMP'S

THE CONTRACTOR SHALL INSPECT EROSION PREVENTION AND SEDIMENTATION CONTROL BMPS TO ENSURE INTEGRITY AND EFFECTIVENESS. ALL NONFUNCTIONAL BMPS SHALL BE REPAIRED. REPLACED. OR SUPPLEMENTED WITH FUNCTIONAL BMPS WITHIN 24 HOURS OF FINDING. THE CONTRACTOR SHALL INVESTIGATE AND COMPLY WITH THE FOLLOWING INSPECTION AND MAINTENANCE REQUIREMENTS:

PERIMETER CONTROL DEVICES, INCLUDING SILT FENCE SHALL BE REPAIRED, OR REPLACED. WHEN THEY BECOME NONFUNCTIONAL OR THE SEDIMENT REACHES 1/3 OF THE DEVICE HEIGHT. THESE REPAIRS SHALL BE MADE WITHIN 24 HOURS OF DISCOVERY

TEMPORARY AND PERMANENT SEDIMENT BASINS SHALL BE DRAINED AND THE SEDIMENT REMOVED WHEN THE DEPTH OF SEDIMENT COLLECTED IN THE BASIN REACHES  $\! \%$  THE STORAGE VOLUME. DRAINAGE AND REMOVAL MUST BE COMPLETED WITHIN 72 HOURS OF DISCOVERY.

SURFACE WATERS. INCLUDING DRAINAGE DITCHES AND CONVEYANCE SYSTEMS, MUST BE INSPECTED FOR EVIDENCE OF EROSION AND SEDIMENT DEPOSITION. THE CONTRACTOR SHALL REMOVE ALL DELTAS AND SEDIMENT DEPOSITED IN SURFACE WATERS, INCLUDING DRAINAGE WAYS. CATCH BASINS. AND OTHER DRAINAGE SYSTEMS. THE CONTRACTOR SHALL RE-STABLIZE THE AREAS WHERE SEDIMENT REMOVAL RESULTS IN EXPOSED SOIL. REMOVAL AND STABILIZATION MUST TAKE PLACE WITHIN 7 DAYS OF DISCOVERY, UNLESS PRECLUDED BY LEGAL, REGULATORY, OR PHYSICAL CONSTRAINTS. THE CONTRACTOR IS RESPONSIBLE FOR CONTACTING ALL LOCAL, REGIONAL, STATE AND FEDERAL AUTHORITIES AND OBTAIN ANY APPLICABLE PERMITS, PRIOR TO CONDUCTING ANY WORK IN SURFACE WATERS

CONSTRUCTION SITE VEHICLE EXIT LOCATIONS SHALL BE INSPECTED DAILY FOR EVIDENCE OF SEDIMENT TRACKING ONTO PAVED SURFACES. TRACKED SEDIMENT MUST BE REMOVED FROM ALL PAVED SURFACES WITHIN 24 HOURS OF DISCOVERY.

IF SEDIMENT ESCAPES THE CONSTRUCTION SITE, OFF-SITE ACCUMULATIONS OF SEDIMENT MUST BE REMOVED IN A MANOR AND AT A FREQUENCY SUFFICIENT TO MINIMIZE OFF-SITE

INFILTRATION AREAS SHALL BE INSPECTED FOR SIGNS OF SEDIMENTATION AND COMPACTION.

POLLUTION PREVENTION MANAGEMENT MEASURES

THE CONTRACTOR SHALL BE RESPONSIBLE FOR ALL POLLUTION PREVENTION MANAGEMENT MEASURES.

ALL POLLUTION PREVENTION MEASURES ARE CONSIDERED INCIDENTAL TO THE MOBILIZATION BID ITEM,

THE CONTRACTOR IS RESPONSIBLE FOR INFORMING ALL VISITORS AND/OR PERSONNEL ON-SITE OF THE POLLUTION PREVENTION MANAGEMENT MEASURES. POLLUTION PREVENTION MANAGEMENT MEASURES INCLUDE BUT ARE NOT LIMITED TO THE FOLLOWING:

THE CONTRACTOR IS RESPONSIBLE FOR THE PROPER DISPOSAL, IN COMPLIANCE WITH MPCA DISPOSAL REQUIREMENTS, OF ALL HAZARDOUS MATERIALS, SOLID WASTE, AND PRODUCTS ON-SITE.

THE CONTRACTOR SHALL ENSURE BUILDING PRODUCTS THAT HAVE THE POTENTIAL TO LEACH POLLUTANTS ARE KEPT UNDER COVER TO PREVENT THE DISCHARGE OF POLLUTANTS

THE CONTRACTOR SHALL ENSURE PESTICIDES, HERBICIDES, INSECTICIDES, FERTILIZERS, TREATMENT CHEMICALS, AND LANDSCAPE MATERIALS ARE COVERED TO PREVENT THE DISCHARGE OF POLLUTANTS.

THE CONTRACTOR SHALL ENSURE HAZARDOUS MATERIALS AND TOXIC WASTE IS PROPERLY STORED IN SEALED CONTAINERS TO PREVENT SPILLS, LEAKS, OR OTHER DISCHARGE. STORAGE AND DISPOSAL OF HAZARDOUS WASTE OR HAZARDOUS MATERIALS MUST BE IN COMPLIANCE WITH MINN. R. CH. 7045 INCLUDING SECONDARY CONTAINMENT AS APPLICABLE.

THE CONTRACTOR SHALL ENSURE ASPHALT SUBSTANCES USED ON-SITE SHALL ARE APPLIED IN ACCORDANCE WITH MANUFACTURERS RECOMMENDATIONS.

THE CONTRACTOR SHALL ENSURE PAINT CONTAINERS AND CURING COMPOUNDS SHALL BE TIGHTLY SEALED AND STORED WHEN NOT REQUIRED FOR USE. EXCESS PAINT AND/OR CURING COMPOUNDS SHALL NOT BE DISCHARGED INTO THE STORM SEWER SYSTEM AND SHALL BE PROPERLY DISPOSED OF ACCORDING TO

THE CONTRACTOR SHALL ENSURE SOLID WASTE BE STORED, COLLECTED AND DISPOSED OF PROPERLY IN COMPLIANCE WITH MINN. R. CH. 7035.

THE CONTRACTOR SHALL ENSURE POTABLE TOILETS ARE POSITIONED SO THAT THEY ARE SECURE AND WILL NOT BE TIPPED OR KNOCKED OVER. SANITARY WASTE MUST BE DISPOSED OF PROPERLY IN

THE CONTRACTOR SHALL MONITOR ALL VEHICLES ON-SITE FOR LEAKS AND RECEIVE REGULAR PREVENTION

EXTERNAL WASHING OF TRUCKS AND OTHER CONSTRUCTION VEHICLES AND ENGINE DEGREASING ARE

THE CONTRACTOR SHALL ENSURE WASHOUT WASTE MUST CONTACT THE GROUND AND BE PROPERLY DISPOSED OF IN COMPLIANCE WITH MPCA RULES.

THE CONTRACTOR SHALL INCLUDE SPILL KITS WITH ALL FUELING SOURCES AND MAINTENANCE ACTIVITIES. SECONDARY CONTAINMENT MEASURES SHALL BE INSTALLED AND MAINTAINED BY THE CONTRACTOR.

THE CONTRACTOR SHALL ENSURE SPILLS ARE CONTAINED AND CLEANED UP IMMEDIATELY LIPON DISCOVERY. SPILLS LARGE ENOUGH TO REACH THE STORM WATER CONVEYANCE SYSTEM SHALL BE REPORTED TO THE MINNESOTA DUTY OFFICER AT 1.800.422.0798.

THE CONTRACTOR IS RESPONSIBLE FOR ENSURING FINAL STABILIZATION OF THE ENTIRE SITE. FINAL STABILIZATION INCLUDES BUT IS NOT LIMITED TO THE FOLLOWING:

ALL SOIL DISTURBING ACTIVITIES HAVE BEEN COMPLETED.

ALL EXPOSED SOILS HAVE BEEN UNIFORMLY STABILIZED WITH AT LEAST 70% VEGETATION COVERAGE.

PERMANENT STORM WATER MANAGEMENT SYSTEM(S) ARE CONSTRUCTED AND ARE OPERATING AS DESIGNED

ALL DRAINAGE DITCHES, PONDS, AND ALL STORM WATER CONVEYANCE SYSTEMS HAVE BEEN CLEARED OF SEDIMENT AND STABILIZED WITH PERMANENT COVER TO PRECLUDE EROSION

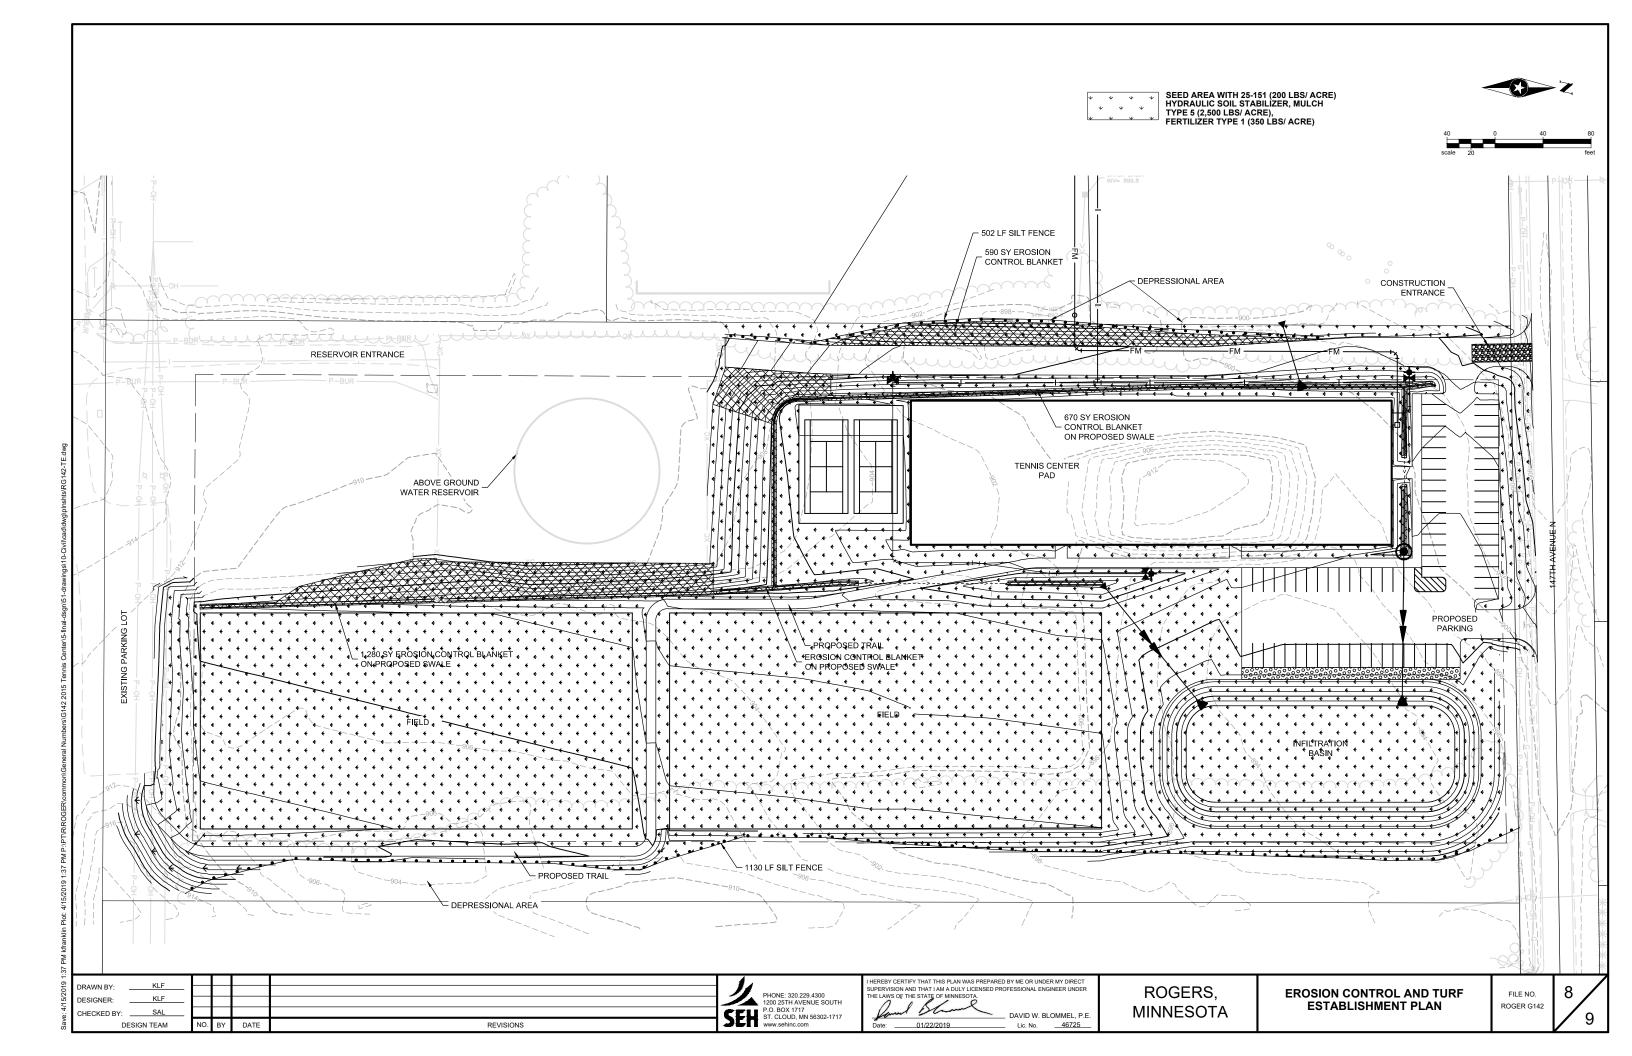

ALL TEMPORARY BMPS HAVE BEEN REMOVED AND PROPERLY DISPOSED OF

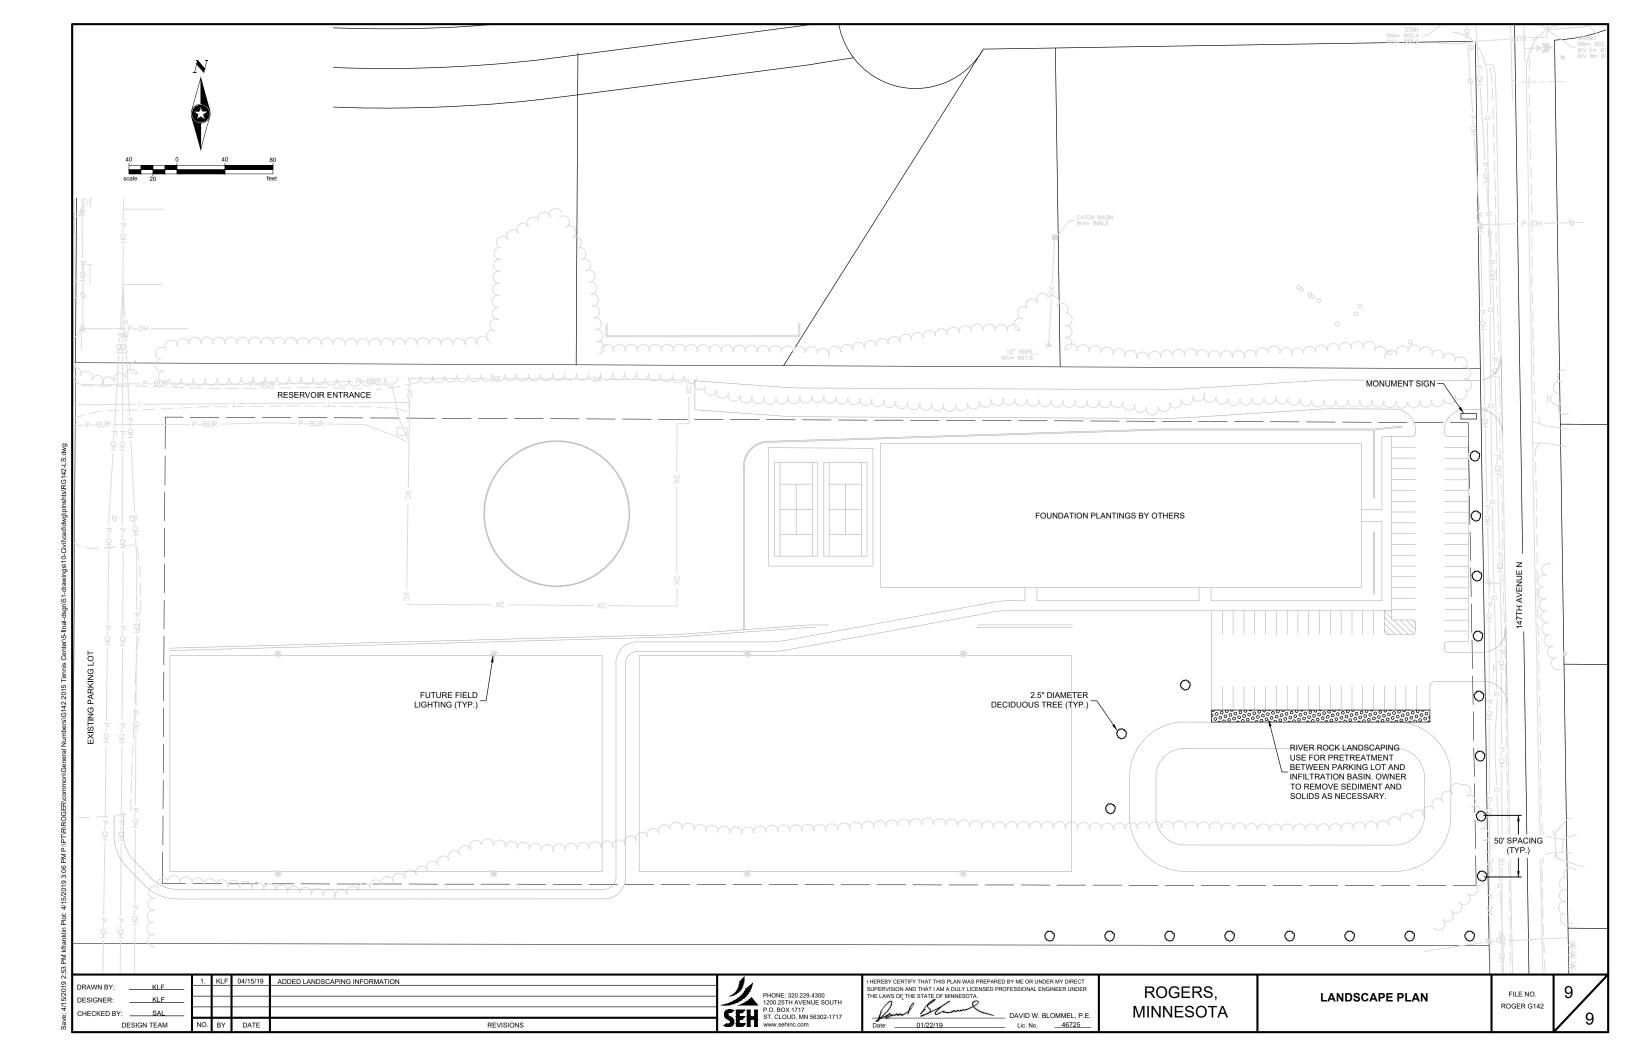

FINAL STABILIZATION SHALL BE PREFORMED IN ACCORDANCE WITH MNDOT 2014 SPECIFICATION 2575.

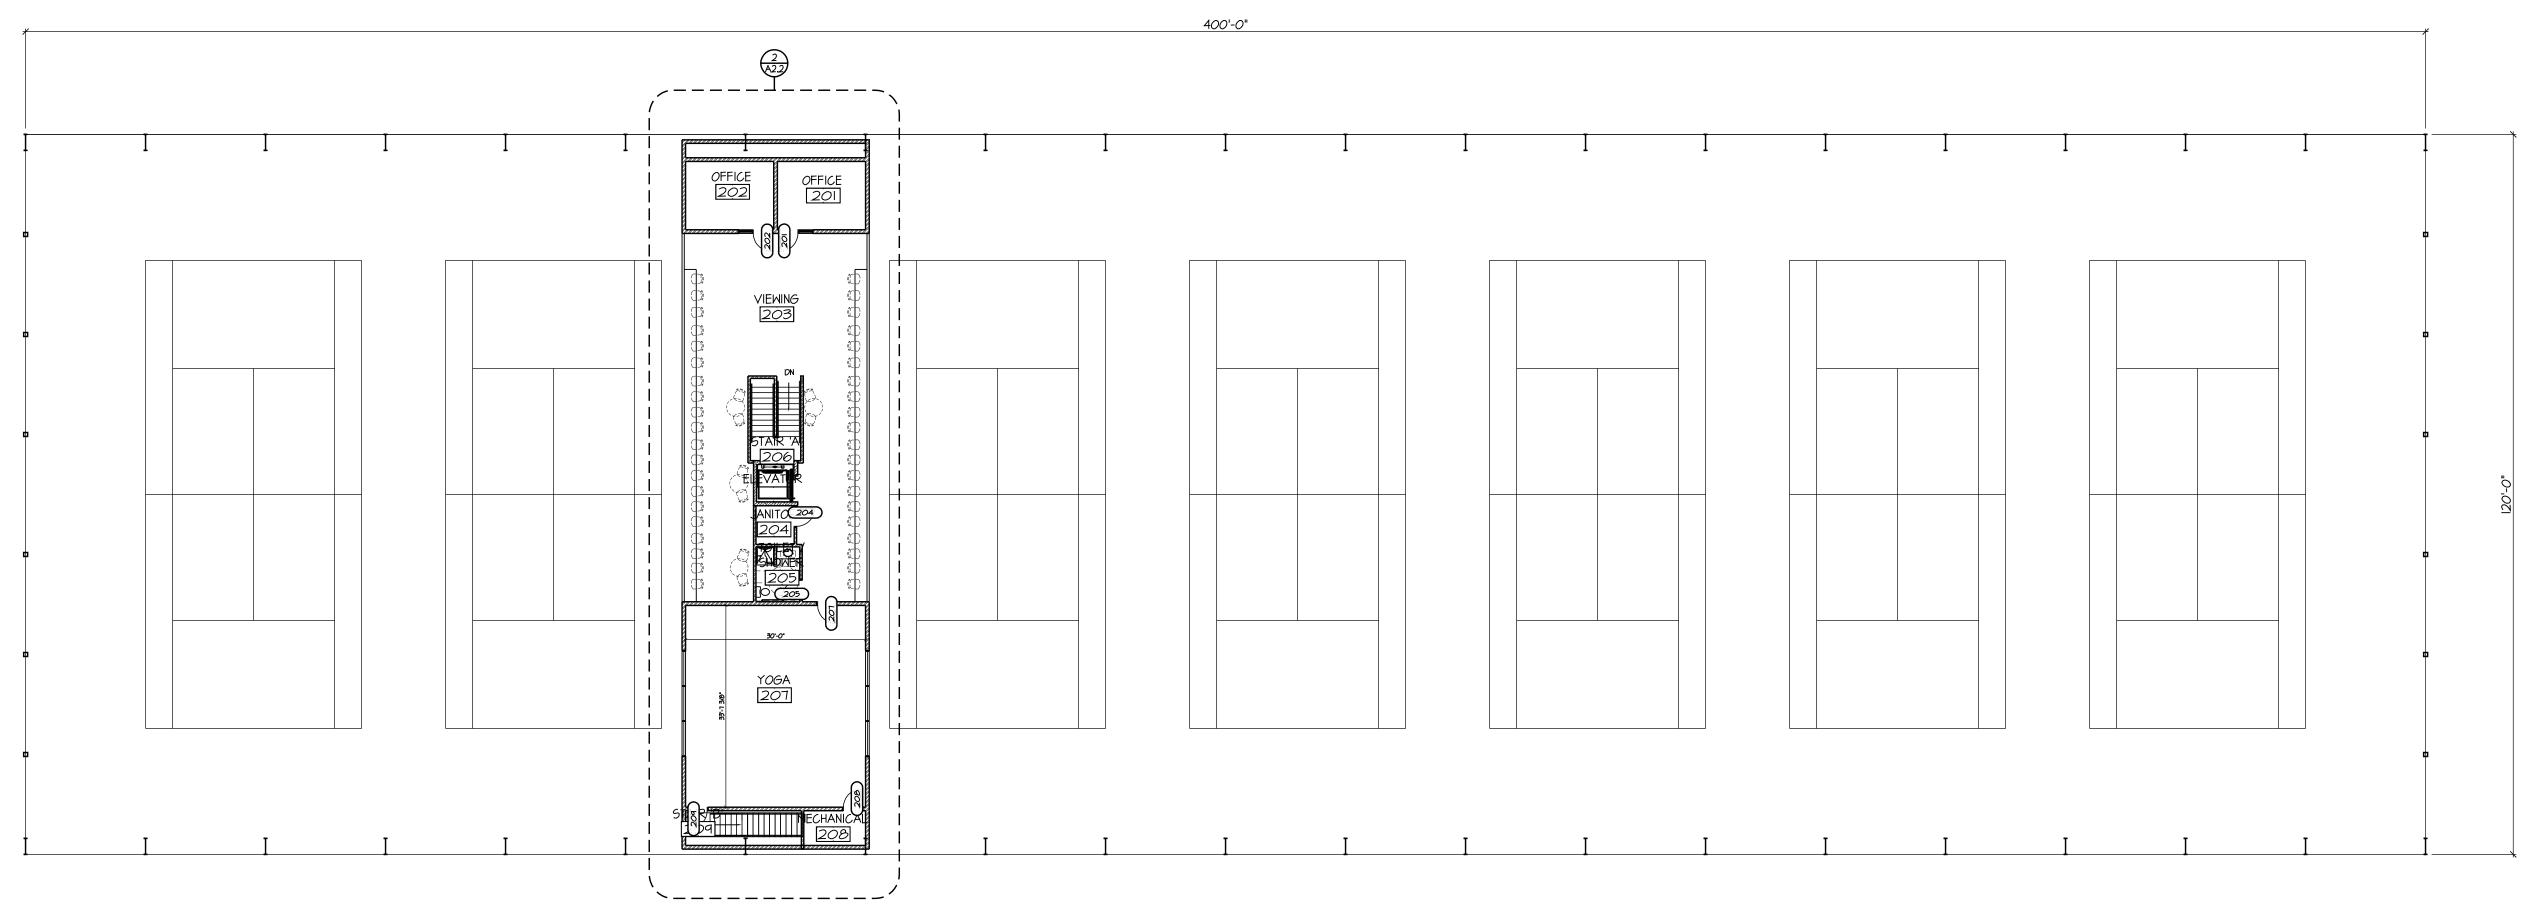

FREBY CERTIFY THAT THIS PLAN WAS PREPARED BY ME OR UNDER MY DIRECT

### **NV SERIES**

#### AREA LIGHTING

#### FORM AND FUNCTION

- Sleek, low profile housing
- Spec grade performance
- Engineered for optimum thermal management
- Low depreciation rate
- Reduces energy consumption and costs up to 65%
- Exceeds IES foot candle levels utilizing the least number of poles and fixtures per project
- Optical system designed for:
  - Parking Lots
  - Auto Dealerships
  - General Area Lighting

#### CONSTRUCTION

- · Die Cast Aluminum
- External cooling fins, Finite Element Analysis (FEA) designed
- · Corrosion resistant external hardware
- One-piece silicone gasket ensures IP-65 seal for electronics compartment
- One-piece Optics Plate<sup>™</sup> mounting silicone Micro Optics
- Two-piece silicone Micro Optic system ensures IP-67 level seal around each PCB
- Grade 2 Clear Anodized Optics Plate<sup>™</sup> standard

#### **FINISH**

- 3-5 mils electrostatic powder coat.
- NLS' standard high-quality finishes prevent corrosion protects against and extreme environmental conditions

#### WARRANTY

**Project Name:** 

\*NѶ-1 Ónly

Five-year limited warranty for drivers and LEDs.

- Certified to UL 1598
- UL 8750
- CSA C22.2 No. 250.0
- DesignLights Consortium® (DLC)
- DesignLights Consortium Premium® (DLCP)
- IP65/ IP67 Rated
- 3G Vibration Rated per ANSI C136.31-2010

\*For Round Pole, please specify RPA4

or RPA5

#### **ELECTRICAL**

- 120-277 Volts (UNV) or 347-480 Volts (HV)
- 0-10V dimming driver by Philips Advance
- Driver power factor at maximum load is ≥ .95, THD maximum load is 15%
- All internal wiring UL certified for 600 VAC and 105°C
- All drivers, controls, and sensors housed in enclosed IP-65 compartment
- · Lumileds Luxeon MX LED's
- CRI >70
- Color temperatures: 3000K, 4000K, 5000K

#### **OPTIONS**

- BIRD DETERRANT (BD)—offers effective and humane deterrent for larger bird species and provides cost-effective long-term solution to nuisance bird infestations and protect your property.
- MARINE GRADE FINISH (MGF)—A multi-step process creating protective finishing coat against harsh environments.
  - · Chemically washed in a 5 stage cleaning system.
  - · Pre-baked
  - Powder coated 3-5 mils of Zinc Rich Super Durable Polyester Primer.
  - 1-2 feet inside pole coverage top and bottom.
  - · Oven Baked.
  - Finished Powder Coating of Super Durable Polyester Powder Coat 3-5 mil thickness.
- HOUSE SIDE SHIELD (HSS)—Micro Optics' House Side Shield (HSS) is designed for full property line cut-off.
- ROUND POLE ADAPTER (RPA) When using round poles, specify Round Pole Adapter (RPA). Specify RPA4 when installing on 3"-4" round poles, and RPA5 when installing on 5"-6" round poles.

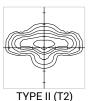

#### **CONTROLS**

- FSP-211 (FSP-X)—Passive infrared (PIR) sensor providing multi-level control based on motion/daylight contribution.
  - All control parameters adjustable via wireless configuration remote storing and transmitting sensor profiles.
  - · FSP-20 mounting heights 9-20 feet
  - · FSP-40 mounting heights 21-40 feet.
  - Includes 5 dimming event cycles, 0-10V dimming with motion sensing, reprogrammable in the field.
- NEMA 7-PIN RECEPTACLE (PE7)—An ANSI C136.41-2013 receptacle
  provides electrical and mechanical interconnection between photo control
  cell and luminaire. Dimming receptacle available two or four dimming
  contacts supports 0-10 VDC dimming methods or Digital Addressable
  Lighting Interface (DALI), providing reliable power interconnect.

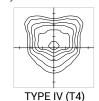

#### **OPTICS**

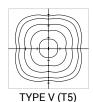

Silicone optics high photothermal stability and light output provides higher powered LEDs with minimized lumen depreciation LED life. UV and thermal stability with scratch resistance increases exterior application durability.

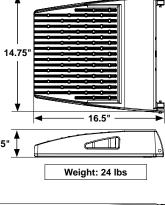

· IES Types

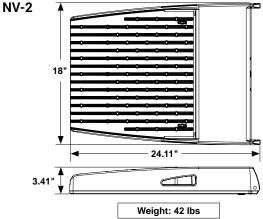

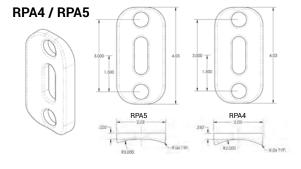

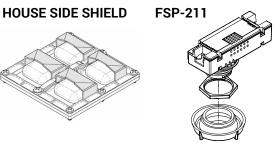

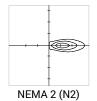

NV-1

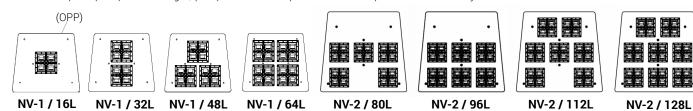

701 Kingshill Place, Carson, CA 90746 **Call Us Today** (310) 341-2037

nlslighting.com

#### **OPTICAL CONFIGURATIONS**

Rotatable Optics (ROR) Rotated Right, (ROL) Rotated Left options available. Optics field and factory rotatable.

\* OPTIC PLATE PAINTED TO MATCH FIXTURE FINISH (OPP) — Optic Plate standard clear anodized, Grade 2. When (OPP) specified, Optic Plate finish will match fixture finish.

#### **MOUNTING OPTIONS**

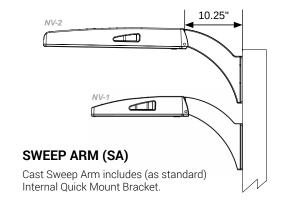

#### WALL MOUNT (WM)

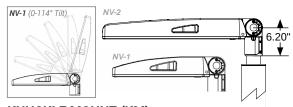

Cast Aluminum Plate for direct wall mount. 3" extruded aluminum arm mounts directly to a cast wall mount box.

Steel, bolt-on-mounting for adjustable installation with a maximum uplift of 90 degrees.

\*Unpainted stainless steel is standard

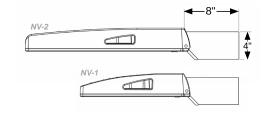

#### **KNUCKLE MOUNT (KM)**

Die Cast Knuckle great for adjustable installation on 2-3/8" OD vertical or horizontal tenon.

- Max Uptilt of 114 degrees (NV-1)
- Max Uplift of 90 degrees (NV-2)
- · Adjustable in 6 degree increments

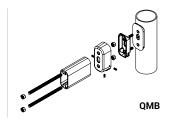

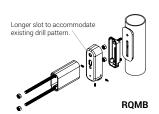

#### **TENNIS ARM (TA)**

Steel fitter slips over 3.5" x 1.5" rectangular arm. \*See Tennis Arm Spec Sheet for details

#### **OPTIONAL**

Optional Cast Aluminum Bracket, **Quick Mount Bracket (QMB)** and Retrofit **Quick Mount Bracket (RQMB)**, designed for quick mounting on Direct Square or Round Poles. Cleat mounts directly to pole for easily hung fixtures.

#### **NV-W**

#### HIGH PERFORMANCE FULL CUT OFF WALL PACK

#### FORM AND FUNCTION

- · Sleek, low profile housing
- Spec grade performance
- Engineered for optimum thermal management
- Low depreciation rate
- Reduces energy consumption and costs up to 65%

#### CONSTRUCTION

- Die Cast Aluminum
- Internal cooling fins, Finite Element Analysis (FEA) designed
- Corrosion resistant external hardware
- One-piece silicone gasket ensures IP-65 seal for electronics compartment
- Two-piece silicone Micro Optic system ensures IP-67 level seal around each PCB

#### **FINISH**

- 3-5 mils electrostatic powder coat.
- NLS' standard high-quality finishes prevent corrosion protects against and extreme environmental conditions

#### **WARRANTY**

**Project Name:** 

Five-year limited warranty for drivers and LEDs.

#### **LISTINGS**

- Certified to UL 1598
- UL 8750
- CSA C22.2 No. 250.0
- DesignLights Consortium® (DLC)
- IP65/ IP67 Rated

#### **Legal Description**

Lots 1 & 2, Block 1, Reservoir Fields, Hennepin County, MN.

#### **Written Statement**

Applicant Name: City of Rogers Project Name: Reservoir Fields

Location of Parcel: PID 1112023140006

The City of Rogers owns the parcel located at 21098 145<sup>th</sup> Ave N. Originally the land was purchased for a Ground Storage Reservoir, Water Treatment Facility and Fire Station. Once 147<sup>th</sup> Ave access was closed to Highway 101 the use of Fire Station was removed, the Ground Storage Reservoir was constructed, and there is space set aside for a future water treatment facility. For the past serval years, there has been an initiative to build a Public Private Partnership for an Indoor Tennis Center. Recently the City Council Agreed to a Purchase Agreement for the land under the building however the land surrounding the building would be developed into parking, athletic fields, and storm water ponds. The City of Rogers will sell the ground to build the building and retain ownership of the parking lot while the private group will build and own the building. The City of Rogers will exchange the City Portion of the property tax on the building for court time to be used for community recreation and greater public access. The agreement allows for the City of Rogers to have the right but not the responsibility to purchase the building should the business side of the venture fail. The City of Rogers also retains the right to have the approval of recreational activities that take place at the facility with the requirement that the activities remain recreational in nature.

Currently, Special Industrial zoning districts permit public recreation, and golf courses both uses are very similar to the use for the Public Private Partnership for this Tennis Center.

We look forward to working with the Planning Commission and Planning Staff to bring this partnership to fruition.

Sincerely,

Mike Bauer Recreation and Facilities Director

Meeting Date: May 21, 2019

Agenda Item: No. 7.1

**Subject:** Mural on 12905 Main Street

**Prepared** 

Amy Patnode, Planning Associate

By:

#### Overview / Background

A mural on Main Street will showcase historical Rogers on the side of the Antiques 101 building. Redevelopment plans for the area have been discussed recently; the mural location is on a building with no plans of redevelopment. The mural will be visible when driving south on Main Street.

The City does not have the right to permit works of art, as long as they do not contain a commercial message.
